OFFICE OF THE PITTSBURGH GAZETTE. Gold was firmer to-day, at 1391/2 to 1393/4; closing at the former figure; the tendency s downward so long as government is sellng, and money seven per cent for call loans. Should gold decline much below ts present prices, then a sharp reaction must follow as it is evidently the cheapest article in the market, and an advance above its real value, must be looked for. It seems that the government had not calculated to sell gold at present prices, but was forced to by the banks drawing the currency on their 3 per cent certificates. The state of our export trade will not yet warrant a heavy decline of gold unless there should be heavy export demand for bonds by actual investors in Europe, and not by speculative holders. But after all it is only defering payment to a future period, and will be heavier on us to pay them. In Government bonds a sharp reaction took place, and if it can be dependent on ndications, the market is likely to go much nigher next week. 1862s have advanced % prices, generally, are unchanged. per cent.; '64s, ¾; '65s, ¼; '68s, ¾, and Ten Forties, 💥 If the banks are free discouners on Monday, an advance of 2 pea cent. pressed or rather neglected. A resolution was offered on 'Change in Chicago the other day denouncing what is Collections made on all the principal points of the Inited States and Canadas. technically termed a "corner," as injurious to the best interests of the Grain trade in to the best interests of the Grain trade in Chicago. The hearty approval with which the resolution was received is a good indication, showing that even in Chicago, operators are becoming disgusted with the maintenance of the market, and the parties who form a combination of this kind and come out of it second best, as is generally the case, need not expect much sympathy from the public at large. We never had a "corner" in Corn here, but several attempts have been made to "corner" the oil market, and in nearly overy instance, the market, and in nearly every instance, the parties trying to make the "corner" got worsted. The oil business has become too extensive to be controlled by a clique or clique, with any degrae of success, and we predict that in the future, as in the past, all movements of this kind will result dis-astrously to those having it in charge.

astrously to those having it in charge.

—Says the Chicago Tribune of Thursday:
The excessively bad weather to-day has depressed business in the goods trades, and the still drooping prices of Wheat, and the corner in Corn, have brought legitimate business in the grain line almost to a dead lock, so that there is very little grain going forward, and the course of every kind of business is to some extent unsettled. Prices of the two grains mentioned have conbusiness is to some extent unsettled. Prices of the two grains mentioned have continued to go up for Corn and down for Wheat, so much contrary to the expectations of many that one heavy failure—that of E. V. Robbins & Co.—has been the result, and it is not improbable that some smaller operators are being seriously crippled. The active demand for Money continues but hards still accommendate all tinues but banks still accommodate all of their customers, others are putting them off until after statement day.

PITTSBURGH PETROLEUM MARKET. OFFICE OF THE PITTBURGH GAZETTE, } FRIDAY, October 2, 1868. CRUDE.

REPINED. The Refined market was also very sensi-The Refined market was also very sensitive to-day, and, as in the case of Crude, there was but little done. We can report sales in lots of 3,000 bbls, all for the last half of October at 31c, while late in the day there were offers for the same delivery at at 31½c, and some holders were asking 31½c. The advance was attributed to a Pittsburgh operator buying pretty freely in Philadelphia; and from this, it is fair to infer that there were few, if any, buyers in Fundational and Roll this, it is fair to infer, that there were few, if any, buyers aside from the one just referred to. It is said that there are a good many "short" sellers for October, and it is this, more than anything else, that strengthens the impreson that prices will rule higher during the month, as it is thought the "shorts" will be anxious to "cover up."—October promises to be fully as interesting in the oil business as September was.

FRIDAY, October 2, 1868. The metal market is steady and prices re well sustained, notwithstanding manusecturers of bar iron and nails realize very small margins, and leading forge irons, in consequence of diminished supplies, are held with even more firmness than last week. Consumers, in order to cheapen their mixtures, are buying more freely of medium and low grade descriptions, which, of course, tends somewhat to stiffen the general tone of the market. the following sales were reported:
