## FARM, GARDEN AND HOUSEHOLD.

Walking Horses, The best gait a horse ever had for every The best gait a horse ever had for every num. This will ease pain, allay inflamma-day use is a good walk. It is a gait that tion, and hasten a cirre. Remedies for not one in ten possesses. Colts are not cleansing the blood should be freely used. trained to walk in all of the Eastern States. Valued to walk in all of the Eastern States. Young America wants more speed. Ken-tucky has more good walking horses than any other State, for there horseback travel-ing has long been in fashion for men and men and women, over a country where muddr vode of times and other times and the ball of the same paper and the ball of the fashion for men and the ball of the fashion for men and men and women, over a country where the ball of the fashion for men and the Young America wants more speed. Kenmuddy reads, at times, render any other gait impossible, and so horses have been bred for the Saddle and trained to a walking gait. This is also the case in all the Western States, and perhaps might have been so in New England when our grandmothers rode to meeting on a pillion behind our grandfathers. But one-horse wagons have

put horseback riding out of fashion' and now a good walking horse is more rare than ne that can trot a mile in 2:40. At the Springfield (Mass.) Horse Show of 1860, the writer was one of the committee to

award prizes to the best walking horses. Out of seventeen entered, the committee found but one which was considered a first rate walker. This was a Morrill mare. which walked five miles an hour with, ease. Two others were fair walkers, and the rest knew no galt that could be called walking. At the New York State Fair the same state of facts was again developed. A letter from Wisconsin says: "I think horses trained to walk fast would be a greater benefit to our farmers in general than fast trotters, as almost all their work has to be done with a walk.

I once knew a man in Massachusetts who, fore the railroads were built, kept from two to four teams at work on the road. and never allowed them to trot all, and made the distance in quicker time than his neighbors, who made their horses trot at every. convenient place. He said that when a horse commenced to walk after a trot, he walked much slower than his usual gait, if kept on a walk, and thereby lost more than he gained. Will farmers think of this, and pay more attention to walking horses ?-Farmers' Home Journal.

OATS.

Oats are, of course, a most important article in stable management; and these, as everything a horse ests, ought to be of the finest quality. It may be thought that the weight of oats is not a matter of great con-sequence, nor, in fact, is it to cart or com-mon horses; but it is quite the reverse to such as we are particular about as to stam-ina, wind and condition. Horses are generally fed by measure, not by weight; consequently in giving light oats, we actually rob the horse of his proper quantum of meal, giving him husks instead; and if we feed him by weight, going on the principle that a pound of feathers and a pound of lead are both a pound, the principle would be a very bad one as regards oats; for in that case, though the horse gets his pound weight, if he gets an undue portion of it in husks he is only filled with that which is no use to him; so in every way light oats are bad for choice horses.

GROWTH OF WOOL IN THE UNITED STATES. The Rutland County (VL.) Journal says: The history of the growth of wool is very curious. Fifty years ago not a pound of fine wool was grown in the United States, in Great Britain, or in any other country except Spain. In 1784 a small flock was

TOB SALE ugar. Boil together one hour. A TABM OF 30 ACTES : on the line of the Conclustive Raincod, 37 miles from the diry, in Hisabeta township, Allegacay county, Ta. The Innorowensts are a me two story brick dows, with ion large rooms and ball. A large trained bars, with ion large rooms and ball. A large trained bars, with ion large rooms and ball. A large trained bars bern, with No. 1 stabiling, and all other entibuildings in complete order. One of the best of, orthords, of all kinds of fruit. The soil is rich new boltom. This property adjoins the village of Buchs, Vista, and has the advantage of christes, storold, mills, stores, dow, and will be said as the low price of all that do the inprovements alone are worth as the advantage of the property, to say network ing about the land, which for worth for gardes pur-poses at lasts \$10,000. For while patientare call st-my once, or WILLIAM A, BELL, East, on the promoter, where of a courter the fact. For Boils. Make a plaster of molass For Bous, make a platter, of molasses and flour, or housy and flour, and apply it as often as they get dry. If very painful, make a soft positice of bread and milk, molstened with volatile liniment and lauda-

Beef Blaks imothered with Onions .-- Cut the onions; let it simmer about ten minutes, and send it to the table very hot.

Baked Ham.-Most persons boil ham. It is much better baked, if baked right. Soak it for an hour in clean water, and wipe it dry; next spread it all over with thin batter; and then put it into a deep dish with sticks under it, to keep it out of the gravy. When it is fully done take off the skin /and batter crusted upon the flesh side, and set it away to cool.

To Remove "Proud Flesh."-Pulverize loaf sugar very fine, and apply it to the part affected. This is a new and easy remedy, and is said to remove it entirely, without pain. It has been practiced in England for vears.

For Stiff Joints .- Take strong salt and water, or brine, beef's gall, one gill each, four yolks of eggs, beat up; mix and shake them well together; apply three times a day. Discutient ointments are also good.

Indian Cake .-- Scald one cup of Indian meal with one pint of milk, two eggs, one table spoonful of sugar, hutter size of a walnut, one-half teaspoonful of soda. Bake half an hour.

VARIOUS ITEMS.

A Virginia farmer says that, with sheep and clover, he can make any land productive, unless it has the barrenness of the sands of Sahara.

Some farmers commence business in the morning in such a hurry that night over-takes them before they have determined

takes them before may any second may also be a second market of the second market prevalent, that soft corn is better for fattening stock than the matured portion has nothing in nature to

support it. Working horses, when in the stable, are better without a blanket than with it. When driven hard and standing out the blanket should be used.

Swinging a hat or screaming at a run-away horse is about as sensible as would be the application of burning straw to a burn-

ing building. Somebody has denominated Indian corn the great farm lever. If is certainly a useful product, but not quite so good for bread as wheat, to a Northern palate. It is contended by some that following

corn with oats or barley, and then with wheat, is not in any sense a rotation, as all these belong to the same family.

IT is said the best strawberry plants come from the third and fourth sets of runners, and that the first and second sets should be cut off.

RHUBARB requires a deeply tilled and very rich soil to afford a supply of nutriment sufficient to enable it to produce the im-mense crop of large succulent leaves which are removed from it in the season. The leaves should not be taken off in August or September, and a good top-dressing of ma-

nure should be given before winter.
