DISEASED LUNGS.

There is no doubt whatever that diseases of the lungs, or nicers of whatever sort, on any of the internal organs may be, and are frequently cared, and complete condition of health established. If the deers or sores, whether upon the langs, the liver, the kidneys or the bowels, or upon the legs, as is frequently the case, can be made to heal, and a complete standard of health re-established.

We have frequently seen these results from the use of Dr. KEYSER'S LUNG CURE, a pleasant and agreeable, medicine, which will ripen up and arry out of the animal economy all effete and used up material. Dr. K. says that he has known the nost distressing and harassing coughs, whose vibraions would threaten to shake the whole constitu tion to pieces, removed in the course of a few days In long standing cases of consumption, or of other ometimes fatal, but always troublesome and annoy ing maladies, known as catarris, chronic bronchitis trachitis or pharyagitis, it is a wonderful allevia ting medicine in the former and a sure cure in he

latter disease. DE KEYSER'S LUNG CURE IS EMBICHED BY SOME OF THE MOST VALUABLE PLANGERAND HERES ENOWN TO BE USEFUL AND CURATIVE IN ALL DETE BIORATED STATES OF THE RUMAN BLOOD, and whilst it adds to its plasms, it at the same time stimulates, gently but effectively, the skin, the kidneys, the liver and the glanular system to sum. cient action to enable the body to take on healthful action and eradicate the disease. The sick and afflicted should bear in mind the virtues of this great medicine, and if those who are sufficiently alive to the importance of health, will resort to it in the beginning of a cough or cold, there would be no falling into declines and rapid consumption, tiopelessly incurable and so most surely fatal.
