OFFICE OF THE PITTSBURGH GAZETTE. TUESDAY, January 12, 1868. The gold market remained steady today at 135%@135%, and closing at 135%, dull. The increased demand for sight exchange on Europe has led parties to larger shipments of specie, and a consequent increase in the demand for cash gold. Shipments are now continued at the rate of seven hundred thousand dollars per week, which would soon relieve the market of all the surplus gold, and reduce the balance in the banks to about seventeen millions before the Treasury will pay out any further interest. Speculation in gold is very tame, and, although few will believe in lower prices for some time to come, the probabilities is that not much

Money will command a better interest elsewhere than in government bonds at high prices bought at near par, they are cheap, but at 9 per cent. above par will scarcely yield more than 7 per

Stocks are dull, lower and on the eye of a heavy decline for want of bonifide investors; nearly all the stocks now carried in Wall street, are held by speculators, and the nearer we approach the usual Febuary money stringency, the more these speculators get frightened at any heavy decline. Express abares are better.

Money is not plentiful in this market yet, but there is every indication that it will become so within the next ten or twelve days. Regular customers of banks find but little difficulty now in getting what they ask for. The street rates—for shaving paper of parties who have not these banking facilities that entitle them to accommodation—are yet on the high tariff established several weeks ago, and 2 and 2½ per ed several weeks ago, and 2 and 2½; per cent per month is asked in most instances, though much less has been done at these rates during the past week than during the week previous. And it may not be out of place to state that it is the "short sellers" who have been buying the great proportion of the oil that has been sold for some weeks past, and, consequently, they contributed much toward swelling prices, and bringing about the excitement, which has provailed for some time. This being the case, those who are "long" feel very comfortable, and,

they feel that by holding off they will be able to realize still higher prices.

The Crude market continues firm and excited, and prices are still tending upward. Sale 500 bbls spot at 15; and 3200 was paid for the privilege of placing 1,000 bbls between January and June at 15½. There was a sale yesterday for a future delivery at 15½, but which for some cause or other was not reported. Quotations may be freely given at 15 to 15½, according to gravity and time of delivery. The Refined market was also comparatively quiet to-day, though the market is firm and excited, and prices are still advicing. Sale of 1,000 bbls each April to June at 35, two "lines" of 500 each January and Febuary at 33; and a third for same months at 33½... We are cognizant of an offer to buy April to December at 36, and, in the absence of sales, January to December may be quoted at 34½ to 35.
