The Nittsburgh Gazette.

The Rallway Subsidy Policy. The present phase of the policy of the Congressional lobby is shown in the folowing reports from Washington:

An omnibus railroad bill will be submitted at an early day, and strong efforts made to carry the same. It is very ably drawn, and includes the guaranteeing of bonds for \$40,000 per mile to the Northern Pacific, running from Humboldt river, by Klamath Lakes and the Cascade Moun-tains, to Portland, Oregon, to which ten alternate sections of land on either side are also to be given for a southern route. The bill includes the Atlantic and Pacific Railroad, starting at Springfield, Mo., going to Van Buren, Ark., where it is to be joined by the Texas Pacific road, starting at Marshall, Texas, and both proceed westwardly by the Canadian river to New Mexico, where the Union Pacific, Eastern Division, is to be met, and the three corporations form one, under the title of the Southern Continental Railroad, and are to proceed to the Rio Colorado and form junction with the Southern Pacific Celifornia. The four routes named are all asked to aid, by the guaranteeing of bonds, the Union Pacific, Eastern Division, from its present stopping place and others from their starting points. The bill is well drawn, and the interest of the Government and owners of mortgages seems well guarded. The point of junction for the proposed Southern Continental road must be somewhere between the 34th and

Another dispatch says: The Senate Pacific Railroad Committee have had several meetings, at which a subsidy and land policy was agreed upon containing these features: First, the Government to guarantee interest on first mortgage bonds at six per cent. in gold for \$30,000 per mile; second, to hold back all moneys due from the Government for mails, and to pay said interest, and to require, after a certain, time, that two per cent. net earnings of roads thus aided be reserved for a sinking fund from which to pay bonds; third, to open all Government lands for settlement along the line of roads from the first; fourth, this subsidy to be extended to the Northern Pacific, and to such a combination as can be agreed upon from competing interests for a Southern road. It is understood that the committee divided on the question of immediate legislation, six voting for immediate action and five for postponement until next winter. The same division was also had on the proposition for Goyernment to hold all the lands granted, sell the same as opportunity offers, and retain the proceeds as a sinking fund for the payment of mortgages.

The Great Excursion. The most extraordinary railroad, event of this railroad age is in preparation—the magnificent trans-continental excursion which, in the coming month of July, is to open the Pacific Railway route from one ocean to the other. It will be the world's great representative gathering, world's great representative gathering, that will meet in the heart of the continent to see the last rail spiked home.

From this side the party will consist of one thousand guests, in a superb train of forty-five cars, finished expressly for this go home with them. Then comes the occasion. Dr. Durant will, we learn, commence the excursion proper at Omaha, leaving it to guests from all over the country to reach that point by their own choice of routes. At the head of the list of invited guests will be President Grant and his Cabinet. There will also be delegations of our foreign cousins from over the water. We learn that the Pullman company are building several splendid sleeping and commissary cars for the call nade on these facilities. Altogether it will be an affair in American railroad annals unlikely ever to be surpassed, since no possible achievement of equal magnitude waits to be performed.—Chicago Republican.

Captains William H. Brown, Reltzhoover, Gray, and others, of Pittsburgh, arrived here to-day to consult with the committee having in charge the bill for bridges over the Ohio river. They are strongly opposed to the short spans pro-posed by the railroad men, as destructive to the great coal interests, as well as of steamboat interests. They design preseing the passage of the amendment, passed by the Senate, appointing a corps of engineers to report on this subject before any bridges are erected.

The proposed Congressional excursion of last Fall is renewed to take place next Spring.: The object is to show the vast country watered by the Ohio and Mississippi, and the necessity for levees and other improvements.

A "WONDER ON FOUR LEGS" has arrived in Louisville from the Cumberland Mountains. It is about two feet in height and might be mistaken for a fawn at a distance. Its colors are dark gray and pure white, its legs and face being more or less spotted. It is a female, has the nose of a sheep, is knock kneed, has crooked hind legs, flat shoulders, large heavy ears, and a tolerably long, bushy Its feet resemble those of a sheep. When standing naturally there is a hump on its back, and it would be a success as a camel were it only tall enough. It subsists on food similar to that provided for sheep. Its nature seems very docile, though it will sometimes jump at strangers. When captured it was swimming the Kentucky river, and swam very rap-

A. HORRIBLE case of poisoning has just come to light, near, Unionport, Jefferson county, Ohio. Two old ladies, sisters, holding a dower on a piece of land, were, last month, taken suddenly ill, resulting in the death of one, and the other at the present moment is lying in a critical con-

Last Saturday the body of the deceased was exhumed, and a coroner's jury summoned, who rendered a verdict of death by poison. The manager of the farm is strongly suspected—as the property would fall into his hands at their death. Some of the flour and bread have been sent to Cintinnati for analysis.

-Henry Walters, an old citizen of Ke-Henry Walters, an old citizen of Keckuk, Iowa, was murdered on Sunday afternoon by four men who shot him as he was mounting his horse, a few miles west of the city. After shooting him, his murderers brutally beat him with clubs and stones. Two men have been arrested on suspicion. Postal Facilities in England.

The Post Office has won the confidence of the people of Great Britain. The Chamber of Commerce of Edinburgh, and the associated Boards of Trade, and many leading merchants of England, have petitioued Parliament to empower it to assume all the telegraph lines of the kingdom; and after several elaborate reports and estimates from commissioners and officials, a bill has been carried through the principal stages in the House of Commons providing for the purchase of all the lines in the kingdom and the reduction of the charge for all telegrams to a uniform rate of twenty-four cents for each message of twenty words, beside the address, with an addition of ten cents for ten words or less

added to the message. It is proposed also to connect the wires with the Postoffices in all towns and villages whose population exceeds two thousand, and that each Postoffice and each pillar-box should be made a depository for telegrams to be written on paper bearing a twenty-four cent stamp, and addressed to the nearest telegraph office, to be transmitted free from any further charge for transmission or delivery within Postoffice limits. It is also proposed as a further facility, that a book shall be published yearly, and sold for sixpence, containing a list of all post and telegram offices; and that, when a telegram by the dressed to a town not reached by the wires; the telegram, on its arrival at the end of the wire, shall be sent free of postage by the first mail, or, if stamped Hay scales express, shall be sent on by a special mes-

Thus the state is bringing telegraphy home to the people, giving facilities for the most rapid interchange of thoughts and desires, providing new safe-guards for life, promoting human happiness, advancing commerce and public improvement. It is the ambition of England to be foremost among nations in placing on a proper footing the department of the electric telegraph, as she has already pre-sented to mankind a perfect system of pos-

tal communication Shall the United States, which invented the steamship, which first made electricity useful, which established between Balti more and Washington the first line adapted for the transmission of messages, resign to England the supremacy in both teamships and telegraphy?-Atlantic

Monthly for February. Going Home with the Girls.

The entrance to society may be said to take place after boyhood has passed away, yet a multitude take the in-tiative before their hearts are presentable. It is a great trial to tender or tough age. For any overgrown boy to go to a door, knowing there are a dozen girls within and knock or ring with absolute certainty that in two minutes all their eyes will be upon him, is a severe test of courage. To go before these girls and make a satisfactory tour of the room without stepping on their toes, and then sit down and dispose of one's pockets is ing are over. Tere comes at last the breaking up. The dear girls don their pluch, and the boy having the most pluck makes up to the prettiest girl, his heart in his throat, and his tongue cling-ing to the roof of his mouth, and crooking his elbow, stammers out the words:
"Shall I see you home?" She touches
her finger to his arm, and thus they walk walk home about a foot apart, feeling as awkward as goslings. As soon as she is safe inside her own doors, he struts

home and really thinks he has been and done it.—Eric Dispatch. Lower California Advices.

SAN FRANCISCO, February 2.—Mazat-lan, January 20: An outbreak of the people, which occurred on the 11th inst., was quickly suppressed by the civil and military authorities. Serious difficulties are liable to be inaugurated at any mo-ment. There is a rumored pronunciamento at Duraugo, and a military force has been sent there from Mazatian. Gutierrez, General of the fourth division, and said to be the chief of a band of robbers, has fled and was pursued by

the military with orders to shoot him on sight. He has gone to Guadalajara. The new Federal officers of Mazatlan, Collector, Comptroller of Customs and Commander of the Coast Guard Service, have arrived and assumed their duties dissolute habits, gives universal dissatisfaction, and will receive little sympathy in case of overthrow. The Collector called a meeting of the

merchants of Mazatlan and requested them to pay over four thousand dollars, deficit of last year's customs. They com olied with the reques Several earthquake shocks were felt at Mazatlan January 9th and 10th, which rightened the people, but caused no dam-

age to property.

Three German Captains of Enropean merchant vessels in the harbor of Mazatlan were grossly outraged by the Cus-toms authorities by insults similar to those offered to the Captain of the Eng-lish gunber Chaptain of the English gunboat Chanticleer.
