> OR; MINES AND MINERS By L. SIMONIN.

UNDERGROUND LIFE;

Translated by H. W. Bristow, F. R. S. Illustrated with 160 engravings on wood, 20 maps, geologically colored, and 10 plates of metals and minerals in chromo lithography. vol., 8vo. Price, \$18.

(FROM THE LONDON FORTNIGHTLY REVIEW.) "A translation of the well-known and very valuable 'Vie Souterraine' of M. L. Simonin, by Mr. Bristow, of the Geological Survey, presenting the original work to the English public in a form more splendid than is given to most home products. The book contains three parts, of which the first is given to coal, the second to etalliferou; metals, and the third to mines of precious stones. There are fourteen geological maps, some scores of illustrations of the various ircumstances and processes of underground ife, including the most homely, and the most ragic, and a number of colored illustrations of metals and their various compounds, that are superb in the richness and exactitude of their coloring. Nothing can surpass the sumptuousness of the volume, and the matter is as good and as interesting as the book is splendid. It should be said, perhaps, that its value as a speclai treatise does not all lessen the interest for the general reader."
