ask the attention of all interested in the reducion of the extravagant cost of Butter, to their practical and economical system of making pure rime Butter by the aid of the

EXTRACT OF BUTTER PLANT.

A brief allurion to the origin of this important discovery may not prove uninteresting. Among the authent'cated records of the renowned Captain Cook's voyage around the world, is found the statement, that while sojourning for a rhort ime on the Brazilian Coast of South America, he observed the natives using, in the preparation of their food, a peculiar oil, which, upon examination, he found to possess the appearance, taste and flavor of Butter; upon further inquiry, however, he ascertained that it was simply a substance that the natives distilled in a crude and Imperfect manner, from a rich and luxuriant plant that grew spontaneously and abandantly in hat warm tropical country. A few years ago, an eminent French chemist, while on a professional visit to the tropics, made numerous experiments with this remarkable production of nature, and succeeded in extracting a concentrated essence of the plant. The formula for its preparation, and the Sole Right for its sale in this country are the exclasive property of this Com-

nal discoverer. We claim for this remarkable, yet simple and perfectly harmless preparation
