The Pittsburgh Gazette.

FOR YOU.

A thought! a thought! for the rosy morn,
That comes through the gates of dew!
But I'll keep a kinder, happier thought
For twilight and for you.

A word! a word! for the humming bird,
Atilt on the jessamine new.
Will my lips let slip, but my heart will keep,
Its softest words for you.

A song! a song! for the mocking bird,
In answer to his so true:
But you know right well I always keep
My sweetest songs for you.

A kiss! a kiss! for the sweet red rose,
And one for the violet blue!
But standing here at the garden gate
I'll keep one back for you.

A sigh! a sigh! for my pale white rose
That the chilling night wind slew!
But I answer you when the lilies say,
I am sighing most for you!

PENNSYLVANIA.

GREENSBURG has a velocipede school.

THE old gaol at Mercer was sold last week for $3,000.

29,800,000 feet of timber have been cut and put into Beech creek, Centre county, this season.

THE only fire in Altoona last week seems to have been the burning of a lot of brooms in a garret.

THE Baptist church at Milton, Northumberland county, is about to be perverted into a soap factory.

THE Hubbard Reaper and Mower Company is about to erect an extensive manufactory at Bellefonte, Centre county.

A COMPANY has been formed at Wilkesbarre for the manufacture of gunpowder, under Oliver's patent, with a capital of $50,000.

THE hotel keepers of Indiana seem to have no conscience. They have actually had the cheek to raise the price of board to $5 per week.

THE list of accidents by base ball has again been started. A young man named George Keller, had his collar bone broken while playing at the game in Carlisle, last week.

IN Beaver county there are ten offices to fill the coming fall, for which there are already announced forty-two candidates. Seven candidates are announced for Sheriff and thirteen for Assembly.

CRESSON is just 2,000 feet above high tide mark at Philadelphia. Galitzen is 100 feet higher, and the top of the hill through which the great tunnel of the Pennsylvania railroad is bored is 2,200 feet high.

SIGNOR BLITZ is at his old tricks in the eastern part of the State. He made a poor market woman at Chambersburg break all her eggs looking for greenbacks, which he so easily pulled out of those he broke.

MR. J. M. KELLEY, of West Mahoning township, Indiana county, had his son-in-law, Abraham Wilson, arrested on Saturday, charged with stealing $250 from him. The unfortunate thief confessed, and delivered up $195 of the spoils.

SHAD are scarcer than ever in the Delaware river this spring, and the fishermen fear that their occupation will be gone entirely before many years. The refuse from the Philadelphia gas works is said to drive the fish out of the river.

THE laying of the track of the Hazleton Railroad, which has been commenced at the Sunbury end, is progressing gradually. A locomotive has been placed on the road, being used for hauling the rails and ties needed for the laying of the track. —*Sunbury Gazette.*

A LADY in Crawford county recently killed a rooster two years old and found a gold dollar in the fowl's crop. The coin had been lost twelve years before. We wouldn't advise our readers to kill all their chickens in expectation of finding gold dollars in their crops.

HEZEKIAH S. JOHNSON, a brother of Hon. H. C. Johnson, of Meadville, has received from the President the appointment of Associate Judge of New Mexico. He was, a couple of years since, editor of the Meadville *Journal*, and is now editor of the Albuquerque *Review*, Crawford county.

EARLY last Saturday morning the residence of Capt. Thomas McDonald, in Freedom, Beaver county, was totally destroyed by fire. The fire was fortunately discovered in time to save the greater portion of the valuable furniture. The loss was about $2,500, and the insurance near $2,000.

ISAAC N. SEYMOUR has filled one position forty-four years. This was the Treasureship of the Delaware and Hudson Canal Company. He is now advanced in years, and has retired from sheer old age. The Company has voted him an annuity of $2,000 per year.—*Port Jervis Gazette.*

LAST week a shed, with $2,500 worth of straw, belonging to Sutton & Allison's straw-board factory, in West Indiana, was destroyed by fire. The fire was the work of an incendiary, and the *Messenger* says that Father Wolff, pastor of the Catholic congregation, distinguished himself in his efforts to subdue the flames.

THE Montour *American* says: We know a little girl in this town who, two weeks ago, was run over by a carriage. Recovering from that, she fell into the creek and was just floating under Mill street when she was rescued and brought to consciousness after much effort. The next day the fell between the wheels of a butcher wagon, and yesterday was nearly killed by a hand car.

CAPT. JAMES WHALEY, a soldier of 1812, and well-known to the citizens of Fayette county, died at his residence in this place on Monday morning, aged eighty-four years. He led a company from this county in the war of 1812, and conducted himself with much gallantry. He was well-known, highly respected, and leaves behind him a large circle of relatives and a host of friends.—*Uniontown Genius.*

THE Uniontown *Standard* says: "We have heard of no injury being done the fruit. If nothing occurs to injure the buds, there will be a greater abundance of fruit this year than has been raised in this vicinity for a long time. We never saw better prospects than the present. Grass is rather slow coming forward, but the late rain and the present warm sun will soon bring it forward. On the other hand wheat and oats are doing well."

THE Crawford *Journal* says: On last Friday the way freight train ran off the bank near Salamanca, the engine was thrown down an embankment into the river, bottom side up, and on top of the engineer, Mr. Earl, who was instantly killed. The fireman was badly burned about the head and face, and at present is in a critical condition. Another man, whose name we have learned, was also killed. The accident was caused by the negligence of the switch tender.

AN EXCHANGE says: The plan on which the new black oil territory on Holden run, near Pithole, is to be leased to operators, is about the most sensible that has yet been adopted in leasing this kind of territory. It is to limit the number of wells to one on every five acres, and to leave it to the discretion of the lessee whether he shall put down more than one well on every ten acres. If a plan like this had been carried out in the Pleasantville district, a million dollars would have been saved to the working interests, and the same amount that has been produced, would eventually be obtained. The system of leasing and selling one and two acre lots, and putting down wells on them, has been a costly one to operators.

THE STATE NORMAL SCHOOL.—The Millersville State Normal School, Prof. Edward Brooks, Principal, affords a remarkable instance of steady growth and well sustained popularity. The rolls during the past year show an attendance of 770 pupils, 116 of whom were in the Model School. During the session recently closed, the attendance was larger than at any previous winter term, and it is thought that during this summer it will run a hundred or more beyond "high water mark" of former sessions. The additional building erected which will afford a home for the principal, a suite of rooms for each of three lady teachers, and boarding accommodations for nearly one hundred more students—will cost, including furniture, etc., upwards of $25,000. It is ninety feet wide and four stories high. —*School Journal.*

Teaching Girls the Art of Telegraphing —Apt Students.

The school for the instruction of women in telegraphing, at our Cooper Institute, flourishes so promisingly, that it seems quite unlikely that male operators can hold out much longer against their smiling rivals in that branch of industry. The school is under the control of the Western Union Telegraph Company, and twelve ladies at a time are taught the art and mystery of manipulating the wires by Miss Snow, a preceptress highly accomplished, and apparently an enthusiast in her profession. I dropped into this school a few days ago, and speak from personal observation when I say that I think it opens for the sex a new field of enterprise that cannot but prove a profitable, as well as an extensive one. There are certain positions in the world of business and trade for which women are eminently qualified, and there is no valid reason why they should not occupy them. As clerks in stores, as book-keepers, as telegraph operators, as compositors, or type setters, and so on, they can earn a remunerative sum, and can accomplish as much as their masculine rivals, who are fit for more robust employments. At this school of telegraphy no girl under seventeen, and no woman over twenty-four years of age, is received as a pupil. They are all taught gratuitously, and all have to pledge themselves in advance to accept situations away from the city when offered to them. As situations are bestowed on the capable ones which return from $15 to $30 or more a week, the pupils have a cheerful prospect before them, and hence the number of applications for seats in each far exceeds the capacity of the school at present. The girls are as a body, remarkably apt in the acquisition of this art, and will ultimately make a mass of sober, steady, quiet, practical and expeditious operators for the rural stations, whence they can gradually be drawn, as they become perfect to fill situations in the city now occupied by men who devote too much time to smoking, drinking, and frolicking generally, to be considered reliable employes. I should not be surprised to find ordinary places of trust all filled by women before long. They are safer cash keepers than men. Even when dishonest, they cannot steal as much and as successfully as men. They cannot so readily waste money in cigars and wine, on horses and dogs, and in debauchery. They cannot so easily invest stolen funds without detection; and, at any rate, they have more fidelity, more patience, more tractability. Their capriciousness and volatility can be cured by business discipline, and hence they can, in time, be made valuable assistants in many a light position. Let the women rejoice therefore. They have a brilliant era approaching.—*San Francisco Chron.*

AFTER BRIGHAM YOUNG WHAT?—I can discover no successor to Brigham Young. He has men of ability,—men of fanaticism and courage,—around him; able instruments for his will; but I see no "coming man" for his place; no one who can stand alone in his shoes, who can command such obedience among followers, such fear among outsiders, such serene victory over himself. Most of his wisest and ablest associates, men inspired with the traditions of the church, and inspiring the faith of its members, are all old like himself. They and he must soon die; and, if not before, then will enter in the elements of doubt and difference and disintegration, in response to the elements of change and revolution and recreation that follow the banners of civilization and of democracy everywhere. No Mormon will admit this, perhaps; but it is truth by a diviner sight than any that he possesses. Devout as a Mussulman, devoted as a Romanist, zealous as a Methodist, there is a higher truth than he has mastered,—the truth of revolution in the interests of equality, of individuality, and of women's independence. These are against him; these will conquer him, pray he ever so sacredly, fight he ever so valiantly. Brigham Young, Louis Napoleon, the Sultan and the Pope are all doomed by the same law. Slavery went down under it, polygamy will follow.—"*Our New West,*" *by Samuel Bowles.*

THE Ladago (Indiana) *Herald* says: "There lives near Billville, Hendricks county, a peculiar family—three boys and three girls. The oldest girl is about twenty-four years, weighs about two hundred pounds, is a very intelligent lady, but we noticed one peculiar feature not common among the fair sex—she had a heavy beard (minus the moustache), which is about two inches long and of auburn color. The beard on the chin of this lady is the heaviest. We did not perceive anything on her throat, nothing but regular side and chin whiskers. We were informed that her beard grew more rapidly during the past year. The next girl is seventeen years old, born blind, and is an idiot; the next is a girl of fourteen, born blind. The three boys are all intelligent young men. The parent of this family is one of the wealthiest men in Hendricks county."

CLIPPINGS.

THE May-day prices of New York truckmen were: One-horse trucks, one mile, $8; two miles, $10; three miles, $12; two-horse trucks, from $10 to $20, according to distance. Fortunately May-day comes but once a year.

PARDEE COLLEGE, Pike county, Mo., confers the degree of M. A. (maid of arts) upon young ladies. Among the practices prohibited at this institution is "gallanting or association of ladies and gentlemen."

A MRS. ARBUCKLE, of Ind., draws a pension for herself and sixteen children. Pensions are not allowed children after they have become sixteen years old. How many children exceeding that age Mrs. A. has, is not stated.

IT IS rumored that Mr. Fisk has made an engagement with Adelina Patti for the year 1872, at the rate of a thousand dollars a night. This looks as if he had no intention of speedily abandoning theatrical management, and no idea of "going up in a balloon," as his enemies are fond of pretending.

A BED of iron ore has been discovered in Warren county, Iowa, eleven feet thick. It is of the kind known as the kidney ore. Near to this, a five foot vein of coal has been found, that is pronounced by iron workers as fit to be used for smelting the ore.

A PROVIDENCE (R. I.) paper asserts that 10 per cent. of the 5,475,000 quarts of milk used in that city during the past year was merely water, for which the citizens paid $43,800. The people of Maracaibo, South America, are better off than those of Providence. As it has not rained there in three years, the milk must be pretty pure.

A RUINED RAILROAD MONARCH.—The result of the final appeal in the English Courts on the long litigation between the Northeastern Railway Company and Mr. George Hudson was to reduce Mr. Hudson to a state of penury. He is now in France, and said to be utterly destitute. Mr. Hudson's fate is full of warning to some of our American Railroad Kings.

AN English officer, Lieutenant Warren, conducting explorations at Jerusalem, reports that the old city has long since been buried hundreds of feet below the surface of the earth. The funds for carrying on his researches being exhausted, he has discontinued them; after discovering all the localities in the existing city which have been associated with events recorded in the Scriptures.

THE Boston *Journal of Chemistry* states that "No variety of wine is more dangerous that which is called claret. It is usually a vile mixture, Thousands of gallons are made by allowing water to soak through shavings, and adding thereto a certain proportion of logwood and tartaric acid, and a little alcohol. Good judges can hardly discriminate between this fictitious mixture and the genuine article."

THAT IDENTICAL HATCHET—The Alexandria (Va.) *Gazette* says: "Mr. James Fossett has presented Mr. Harrie Bell, the keeper of the Alexandria Museum, with a hatchet, which at one time belonged to General Washington, and the one with which he cut his father's cherry tree, and which, since the General's death, has been preserved in the tiler's room of Washington Lodge of Masons, in the Old Market House building. This is a valuable addition to the collection of Washington mementoes now in the museum, and is the more valuable in consequence of Mr. Fossett's voucher."

FEMALE DETECTIVES.—I am aware that female detectives were employed on some of the stage and car routes to "spot" conductors and drivers who "knock down" fares, but I was not aware, until yesterday, that females are employed in the Custom House to examine and inspect ladies' baggage. Such, I am told, is the case, and it is a capital idea, too. The amount of goods smuggled into the country, under the guise of woman's apparel, is simply enormous. Eleven hundred dollars worth of point lace was recently overhauled in the stuffing of a single dress. Of course ladies can detect and divulge these contraband acts much better than men.—*New York Letter.*

THE Cleveland Board of Education recently, after a sharp discussion, adopted, by a vote of nine yeas to four nays, a measure to provide for consolidating the public schools of that city under four supervising principals, changing them, in fact, from principals of grammar schools to division superintendents, under Mr. Rickoff, as General Superintendent, and giving each school building into the immediate charge of a lady. The *Herald* says "the plan had a partial trial last year, and is reported to have worked so well as to warrant its extension to the entire city." The cost of the public schools of that city for the current year will be about $150,000.

AN electro-magnetic engine for driving sewing machines has been introduced in France with entire success. It is compact, portable and cheap, easily managed and free from all danger. Those having large numbers of sewing-machines in use have already adopted this motor power, and its general introduction is only a point of time. This discovery came at a most opportune moment, for physicians are already testifying to the bad effect of a constant use of the feet of females upon the pedals of sewing-machines. Certain classes of dangerous diseases are induced by application to this kind of labor, which are rendering American girls unfit for other duties, and hence the importance of the French invention. If the machine in question accomplishes the desired end it will prove of incredible value.

A WRITER in a medical journal says when persons are feverish and thirsty beyond what is natural, indicated in some cases by a metalic taste in the mouth, especially after drinking water, or by a whitish appearance of the greater part of the surface of the tongue, one of the best "coolers," internal or external, is to take a lemon, cut off the top, sprinkle over it some loaf sugar, working it downward into the lemon with a spoon, and then suck it slowly, squeezing the lemon and adding more sugar as the acidity increases from being brought up from a lower point. Invalids with feverishness may take two or three lemons a day in this manner with the most marked benefit manifested, by a sense of coolness, comfort and invigoration. A lemon or two thus taken at "tea time." an entire substitute for the ordinary "supper" of summer, would give many a comfortable night's sleep, and an awakening after rest and invigoration, with an appetite for breakfast, to which they are strangers who will have their cup of tea or supper of "relish" and "cake" and berries, or peaches and cream.

DR. WHITTIER
CONTINUES TO TREAT ALL private diseases. Syphilis in all its forms. Gonorrhœa, Gleet, Stricture, Orchitis, and all urinary diseases, and the effects of mercury are completely eradicated; Spermatorrhœa or Seminal Weakness and Impotency, resulting from self-abuse or other causes, and which produces some of the following effects, as blotches, bodily weakness, indigestion, consumption, aversion to society, unmanliness, dread of future events, loss of memory, indolence, nocturnal emissions, and finally a prostrating the sexual system as to render marriage unsatisfactory, and therefore imprudent, are permanently cured. Persons afflicted with these or any other delicate, intricate or long standing constitutional complaint should give the Doctor a trial; he never fails.
A particular attention given to all Female complaints, Leucorrhœa or Whites, Falling, Inflammation or Ulceration of the Womb, Ovarits, pruritis, Amenorrhœa, Menorrhagia, Dysmenorrhœa, and sterility or Barrenness, are treated with the greatest success.
It is self-evident that a physician who confines himself exclusively to the study of a certain class of diseases and treats thousands of cases every year must acquire greater skill in that specialty than one in general practice.
The Doctor publishes a medical pamphlet of fifty pages that gives a full exposition of venereal and private diseases, that can be had free at office or by mail for two stamps, in sealed envelopes. Every sentence contains instruction to the afflicted, and enabling them to determine the precise nature of their complaints.
The establishment, comprising ten ample rooms, is central. When it is not convenient to visit the city, the Doctor's opinion can be obtained by giving a written statement of the case, and medicines can be forwarded by mail or express. In some instances, however, a personal examination is absolutely necessary, while in others daily personal attention is required, and for the accommodation of such patients there are apartments connected with the office that are provided with every requisite that is calculated to promote recovery, including medicated vapor baths. All prescriptions are prepared in the Doctor's own laboratory, under his personal supervision. Medical pamphlets at office free, or by mail for two stamps. No matter who have failed, read what he says. Hours 9 A.M. to 8 P.M. Sundays 12 M. to 2 P.M. Office, No. 0 WYLIE STREET, (near Court House,) Pittsburgh, Pa.
