He didn't, however, and the result was disastrous. He arrived in the city from Brady's Bend, Armstrong county, yesterday morning, with nine hundred and thirty dollars in his pocket, en route to Nash doilars in his pocket, en route to Nash-ville, Tennessee, where he expected to invest it in land. The Clearfield Bank Robbery. The Raftsmen's Journal gives the following particulars of the robbery of the County National Bank at Clearfield, on the 18th inst, some account of which we have already published: "First they pulled the Lilley safe about two-thirds of its length outside of the other door, knocked off the combination knob, and then attempted to drive in and cut, to pieces the conical-shaped chilled fron center block in which the combination operates. Evidently having found this a fruitless effort, they then plied the heavy sledge-hammer with great force and vigor to the various portions of the front edges of the safe and door, but succeeded only in knocking off some small scales. Finally, however, it seems, they found a weak spot—a flaw, more than an inch in width and acout five inches in length, in the iron of the door, to the left of the combination. The iron covering this defect in the door was only about a quarter of an inch in thick-ness, and the inside about half an inch. The outside portion over the flaw having been broken in with the aledge hammer, they next drove a heavy steel punch through the inner part and into the com-bination, breaking the lock into pieces. From appearances, the burglars evident-ly had a hard job on hand, and one which iy nao a nard job on nand, and one which must have taken them perhaps more than an hour to accomplish, as the fron through which they forced their way is literally covered with dents and marks; and the great wonder is that they did not alarm the whole town by the great numtheir end.
