The Pittsburgh Gazette.

SUNDOWN.

I stood by the margin of the summer sea,
As the day was quietly dying,
When the waves were lulled in a dreamless sleep,
And the seamews plaintively crying.

The broad red disc of the setting sun
Was poised on the mighty ocean,
And the wavelets were breaking one by one
On the shore, with a dreamy motion.

But a gorgeous curtain of blue and gold
Now fell on the sleeping billow,
And the sun, like a monarch infirm and old,
Reclined on a glowing pillow.

But again a change, as he sank to rest,
On his couch of surpassing glory,
For the hues that trembled on ocean's breast
Mocked the wonders of Eastern story.

Slowly these beauties all passed away,
As I saw Night's shadows descending,
And I deemed it well such a perfect day
Should have such a perfect ending.

PENNSYLVANIA.

FRANKLIN wants gas works.

THE police of Titusville are uniformed.

READING has had the Drummer Boy of Shiloh.

LANCASTER is infested just now with burglars.

THE country in the neighborhood of Scranton is infested with horse thieves.

A HORSE FAIR is to be held at Stoneboro, Mercer county, on the 3d of July.

MRS. MARY AMICK, aged 107 years, died in Monroe township, Bedford county, on Saturday.

THE residence of Charles McCabe in Honesdale, Wayne county, was destroyed by fire on the 27th ult.

A CASE of sunstroke occurred at the cemetery in Pottsville, during the ceremonies on Decoration Day.

RIENCKES ropewalk at Easton was burned down on Sunday week. Value $30,000, insurance $17,000.

COL. WM. H. LAMBERTON, a prominent member of the Venango county bar, died in Franklin on the 21st ult.

POTTER COUNTY is gaol-less. The Commissioners have sold the old one for $2,000. A new one is about to be built.

THE lawyers of Scranton, have followed the lead of those of St. Louis, and appear in court now with swallow tail coats.

MRS. ALMIRA RENIFF, one of the oldest inhabitants of Conneaut township, Crawford county, died on the 21st ult., in the 100th year of her age.

SHARON is a thriving place. One hundred and five houses have been built there since the first of January, and about as many more are under contract now.

THE Venango *Citizen* says: A lad named John Mullen, aged about ten years, was killed near the Allegheny Valley R. R. Depot, on Friday last.

THE Scranton *Republican* has adopted our heading of *Ephemeris* for its column of short items. We are glad to see such evidence of good taste in the editors of that excellent paper.

MISS AUGUSTA L. DARGON has been reading in Beaver, and the *Local* of that place is high in her praise, but we fear her audience was not as large as a lady of her undoubted ability should command.

A YOUNG MAN named Wm. Mutzabaugh was drowned in the Susquehanna, at Duncannon, on Thursday. He was swimming after a skiff that had broken from its mooring and was seized with cramp.

Two young men from Philadelphia, made the trip from that city to Doylestown, one day last week, on velocipedes. the distance by the turnpike is twenty-five miles, and it was traversed by them in about six hours.

THE State Medical Society, which meets on the 9th inst. in Erie, is to be amused while there. Among other pleasures down on the programme is a race between a steam yacht and a picked crew of the Undine Boat Club of that City.

THE Bear Creek and Shenango Valley Railroad will be in operation early in the the summer. The iron for the track is now all on the ground, and a considerable amount of the rolling stock is ready for use. Of this stock the Erie Car Works supply fifty coal cars.

We understand that he and some other boys were on a hand car, playing, that he turned the crank of the car starting it in motion and falling upon or near it was struck on the back by the handle in its revolution, injuring him so much that he died within a half hour.

THE planing mill of Shenk and Co., in Erie, was set on fire and burned to the ground on Friday. The loss to the proprietors was seventeen thousand dollars, and sixteen workmen lost a chest of tools each, the aggregate valde of which was about one thousand dollars. There was no insurance.

THE Bedford Springs will open on the 10th inst. Several improvements have been made looking to the comfort of visitors. One hotel has had a double row of porches built all around it, and another, a private boarding house, we believe, has had a new ten pin alley and a croquet ground added to it.

THE Easton *Press* says: We learn a company from Philadelphia has purchased property near Allentown, and will erect a furnace thereon. If it be true, it will make the seventh furnace started in the Valley within the past year. The iron manufacturing business will be run into the ground.

THE Ebensburg *Alleghenian* says: On Saturday last an appalling accident occurred near Pine Flat, Indiana county. A man named McCulloch was engaged at some sort of work at a steam saw mill. By some mischance he fell against a circular saw in full motion, and was cut in pieces. He died almost instantly.

THE steam saw mill belonging to Lyman Perkins, in Rockdale township, Crawford county, was blown up by the explosion of the boiler on Saturday of last week. Although there were fourteen men in and about the mill at the time, only one was killed. One piece of the boiler, weighing five hundred pounds, was found at a distance of twenty rods from the mill.

ON Sunday morning a man named Coppersmith was drowned in the Lehigh by the upsetting of a batteau. He was in company with several others, going across the river. As they pushed off from the shore two or three men jumped in, and gave the boat such a violent shock that it was capsized throwing all into the water, but everyone was saved except Coppersmith.—*Easton Free Press.*

A SEVERE thunder storm visited the eastern part of the State on the 26th ult. The damage done in the neighborhood of Carbondale was considerable, a pair of horses belonging to James Haley, and drawing a wagon containg six men, were killed by a stroke of lightning, which stunned, and, more or less burned all of the men, tearing the boots off of the feet of three of them. An out-house containing a man was lifted up bodily and set down on the other side of the road, and several houses were more or less damaged by the wind and lightning.

THE Pottsville *Journal* says Mr. Jacob Heitz, who has been riddling coal from a bank at Brockville, has been furnishing coal since the strike for several operators to keep their colliery engines going. On Thursday night a party went to the place where he was working, and destroyed his building, machinery, screens, etc. They started two four-wheel and an eight-wheel coal car from the works, and ran them on the main track. The cars upset and ran into the creek. They also tore up part of the track. This conduct is indefensible, and should be frowned upon by all law-abiding miners.

ON Thursday last a man was found dead in Rockland township, in the woods a few rods from the road, about one mile east of Sandy station. Hair, apparently from his whiskers, was found on his overcoat. He was a man about five feet eight inches in height, weighing about 150 lbs. He had been apparently dead several month and was so decomposed that it was impossible to recognize his features. It is supposed that the body is that of Michael Tawney who was in that region last fall and suddenly was missing. The indications would seem to point to violence as the cause of his death.—*Venango Citizen.*

THE Monongahela Valley *Republican* says: On Wednesday night last, a man named Jones, about fifty years of age, who has been working at his trade as a marble-cutter, was seen on the road going towards Pittsburgh as late as twelve o'clock in the night. He wandered about, and was last seen by Henry Frye, near his residence. On Thursday morning his body was discovered just above the dam, at Leyda's Mill, about one mile from Bentleysville, by Mr. Emery Leyda, who also found his coat neatly folded, placed upon a fence near by, and his hat upon the coat. The water was about three feet deep where the body was found. He had one son, who resides in Pittsburgh.

THE *Miners Journal* says: On Tuesday evening last a funeral party, Irish, came from Hazleton to a point near Tamaqua. After the interment, while the party was returning home, three carriages containing a woman, she rest men, stopped at the Hometown Hotel, about two miles above Tamaqua, kept by a man named Shickerum. They obtained something to drink, and in paying for it, disputed about the change being correct. Mrs. Shickerum stated that she had given the correct change, when one of the party drew a revolver, and threatening to shoot her, she ran. Some men in the bar-room then put the party out. One of the funeral party fired a shot from the outside through a window, the ball lodging in a man's breast. Another shot was fired through the door, taking effect in the wrist of another man. The party then drove off for Hazleton.

WEST VIRGINIA.

PARKERSBURG has a velocipede school which does not pay.

THE Supervisors of Kanawha county have refused to grant licenses to retail liquor dealers.

A COMPANY has been formed at Charleston to put a bridge over the Kanawha at that place. A charter will be applied for at the next meeting of the Legislature.

THE Turkish Minister and Staff and the Secretary of the British Legation, is reported to have engaged quarters for the season at Greenbrier White Sulphur Springs.

THE Point Pleasant *Register* says: From all parts of the country we receive most cheering accounts of the crops. There is a very promising prospect for an abundant wheat harvest.

C. H. YOUNGER, convicted of murder over a year ago at Point Pleasant, and who had his sentence commuted to imprisonment in the penitentiary for life, has become a raving maniac.

THE Morgantown *Post* is five years old and has just been enlarged by the addition of eight columns, and has a new and very handsome dress. Judging only by the contents and character of the paper itself, we think the aim of its editors must have been to make a real *news* paper, for we know no country journal which has more varied or better selected news.

Artificial Ice.

One of the wonders of the age is the manufacture of ice in large quantities by artificial means. It was first begun in this country during the war. In New Orleans it is carried on extensively now, and at so low a rate that they expect to be able to do away with importation entirely. Being made from the water of the Mississippi, it is said to be more healthy for use there than Northern ice. It is manufactured under French patents, and is said to be of an excellent quality. It is claimed by some to be even superior to Northern ice. The *Picayune* relates the following circumstance: "As Mr. Pochelu, the indefatigable Secretary of the ice manufactory in this city, was passing along Madison street, New Orleans, he accidentally encountered the representative of the houses that sell ice imported from Boston. A discussion ensued, which ended in a wager by Mr. Pochelu that our home-made ice was cooler, and that it would last longer than the imported article. The bet was accepted, experts summoned and the parties adjourned to test the matter. Two equal cakes of ice, one made here and one imported, were subjected to an equal exposure, and we are happy to report that Mr. Pochelu carried off the wager."

THE *Court Journal* says that the London *Times* is now printed by new machinery so perfect and so simple that it takes but one engineer and three laborers to print off the whole edition of the *Times*. The principal of the machine is that the paper is not cut into sheets before it is printed, but is brought to the machine in a long roll. It passes through the machine, is printed on both sides, and is divided as it passes out, the whole process being automatic. The idea has long been worked at by engineers, but has only lately been practically carried out, under the superintendence of Mr. Macdonald, the engineer who has charge of the whole *Times* machinery. The new machine is called the Walter Press, in honor of the chief proprietor of the *Times*.

CLIPPINGS.

THE present Chinese population of San Francisco is estimated at from ten to twelve thousand.

IT is reported that Boston is to have a new free trade daily, entitled the *Guardian*, with a capital of $200,000.

THE *Hub* is a new paper published in Boston, which describes itself as "a journal for the carriage and car shop."

THE *Advance* is a new organ of mechanics and workingmen, published in New York, and sold at five cents a copy.

A GENTLEMAN named Mitchell arrived in Bangor, Maine, last Monday evening, who left Hong Kong on the second day of May, having made the passage in twenty-nine days! He made the trip from San Francisco to New York in six days.

LEONARD CHOATE, the Newburyport "fire bug," is under $5,000 bonds on each of the indictments which charge him with offences punishable by life imprisonment, and under $3,000 bonds on each other offence, making a total of $62,000.

WORK has begun on the hotel and station of the Mount Washington Railway in the White Mountains. Work on the road will begin this month. Only five hundred feet of the road remains to be build, and by July cars will run from the foot to the summit.

MRS. THOMPSON, of Jolliet, Ill., whose grandson was killed on Tuesday last, has had a large share of bereavements. Some years ago, one of her sons was accidentally killed; another was blown to pieces in the late war; not long since, a daughter who had just graduated from school was drowned while on an excursion on Lake Erie, near Cleveland, and now a grandson is instantly killed by the cars.

FAYETTE Co., O., has built, and contracted for to be built, 153 miles of turn pikes, at a cost of $444,640. "These," says the Zanesville *Courier*, "are large expenditures for a county so comparatively small as Fayette. But they are based on the highest financial policy, as any one trying to purchase a farm in Fayette would be certain to ascertain." Farms without good roads to get to them, are becoming less sought after every year.

DR. MOORE, of Plattsburg, recently died. He was very much respected by all who knew him, as was evidenced by a a singular fact in connection with his funeral. While the usual Presbyterian services were being held at the residence of the deceased, mass was being recited in both the Catholic churches of the village for the repose of the soul of the deceased, who was held in such high estimation that the Catholics, both French and Irish, desired the funeral services of Calholic church to be held. A character so pure and blameless as to reconcile all differences in religious creeds is indeed something unusual.

GENERAL A. L. S., of Kentucky, perhaps one of the best card players in that State, would never play a hand or risk a dollar if there was a black cat in the room. Ex-Governor B., from one of the Western States, an inveterate gamester, would never sit down to a table in a room where there was a looking glass. Some gamblers refuse to play if on entering the room, the left foot crosses the threshold first, and no pursuasion can induce them to do so, until they leave and return with the right foot foremost. To put your foot on the chair of a player is a sure premonition of bad luck. Some men will never play on Friday.

THE Fort Atkinson (Wis.) *Herald* has the following: "A dreadful report was current in this village, yesterday, that a mad dog had bitten two children—a boy of seven years and a girl of four—in the town of Milford, in this county, and that the parents—whose names we did not learn—were informed by attending physicians that the only possible way for the children to escape the agonies of *rabies* would be to take their lives. Incredible as it may seem, they administered an opiate to the boy and bled him to death, and the girl was smothered in a feather bed. There seems to be no doubt of this, as it is well attested."

The Franco-American Cable.

The French cable, as it is familiarly called, has been made, and will be laid from English ships, by Englishmen, the Telegraph Construction and Maintenance Company having undertaken the job. Indeed, substituting Brest for Valentia, and St. Pierre for Heart's Content, the entire process recalls the laying of the lines now worked by the Anglo American Company. The present cable is some twelve hundred miles longer than either of its predecessors; it is divided into several sections, and has been manufactured at the rate of 150 miles a week ever since the contract was accepted. Up to yesterday it was within a hundred miles of completion, and was nearly all shipped on board the vessels appointed to carry it. Thus the Great Eastern carries 2,752 miles, or about 400 more than when it left with the Anglo-American cable, its vast receptacles being made still vaster, and its main tank considerably enlarged.

"With this cargo the great ship will leave her present resting place in the Medway about the 10th of June, and will proceed to Portland. Here a few days will be spent in taking in coal, after which she will go to an appointed spot about some five and a half miles from Brest. One of the vessels of the expedition (the Chiltern) will in the meantime have laid the heavy shore end, and this will be buoyed out to sea at the distance named. The Great Eastern will, somewhere about the 20th of June, pick it up, and after splicing and testing, will set about her regular work of cable laying. She will be accompanied by the Sanderia and the Chiltern, both ships being fitted up with grappling irons, buoys, and picking-up machinery, which are identical in every respect with those on board the Great Eastern herself.

Some eighteen days will be occupied by the Great Eastern in the voyage from Brest to St. Pierre, and immediately on the line being laid between these two places, the other cable-laying vessels will carry on the remainder of the work, carry the cable direct into Boston, and the line will be thus made complete between the latter place and the French port. The frequent splicings, the change of ships and the varieties of cable, of which, though the great length is identical with the Anglo-American, there are six sections—A, B, C, D, E and F—on the whole line, may seem to complicate the programme; but it should be understood that after St. Pierre the real work is over. The rest is shallow water, the whole of which has been sounded, and the greatest depth of which is ascertained to be 360 fathoms. Between Brest and St. Pierre the depth of the line in which the cable is to lay is less accurately known, and there are variations between the soundings taken at various times."

GAS FIXTURES.

DR. WHITTIER
CONTINUES TO TREAT ALL
private diseases. Syphilis in all its forms, all urinary diseases, and the effects of mercury are completely eradicated; Spermatorrhœa or Seminal Weakness and Impotency, resulting from self-abuse or other causes, and which produces some of the following effects, as blotches; bodily weakness, indigestion, consumption, aversion to society, unmanliness, dread of future events, loss of memory, indolence, nocturnal emissions, and finally so prostrating the sexual system as to render marriage unsatisfactory, and therefore imprudent, are permanently cured. Persons afflicted with these or any other delicate, intricate or long standing constitutional complaint should give the Doctor a trial; he never fails.
A particular attention given to all Female complaints, Leucorrhœa or Whites, Falling, Inflammation or Ulceration of the Womb, Ovarilis, pruritis, Amenorrhœa, Menorrhagia, Dysmenorrhœa, and sterility or Barrenness, are treated with the greatest success.
It is self-evident that a physician who confines himself exclusively to the study of a certain class of diseases and treats thousands of cases every year must acquire greater skill in that specialty than one in general practice.
The Doctor publishes a medical pamphlet of fifty pages that gives a full exposition of venereal and private diseases, that can be had free at office or by mail for two stamps, in sealed envelopes. Every sentence contains instruction to the afflicted, and enabling them to determine the precise nature of their complaints.
The establishment, comprising ten ample rooms, is central. When it is not convenient to visit the city, the Doctor's opinion can be obtained by giving a written statement of the case, and medicines can be forwarded by mail or express. In some instances, however, a personal examination is absolutely necessary, while in others daily personal attention is required, and for the accommodation of such patients there are a few rooms connected with the office that are provided with every requisite that is calculated to promote recovery, including medicated Vapor Baths. All prescriptions are prepared in the Doctor's own laboratory, under his personal supervision. Medical pamphlets at office free, or by mail for two stamps. No matter who have failed, read what he says. Hours 9 A. M. to 8 P. M. Sundays 12 M. to 2 P. M. Office, No. 9 WYLIE STREET, (near Court House.) Pittsburgh, Pa.
