purely executive, and without the least participation in the legislative authority. Inaugurated by the Cortes, he may be again deposed by the same sovereign power. And herein lies the danger,—that the new Regent will be more or less than man, if he abstains from intrigues for the enlargement or perpetuation of his functions, seeking to mould the majority of the Cortes to his ambitious purpose. The intrigues which are to be expected in that body against him will supply to him a motive, if not a justification, for corresponding efforts to maintain and increase the Regent's authority.

PRODUCTION OF PETROLEUM. The Titusville Herald, of yesterday contained its regular monthly report of the production and development in the Pennsylvania Oil regions, for the month ending May 31st. It asserts that under a large falling off in the product of the wells in the older districts, and but a moderate degree of success in the development of new territory, there was an overall decrease during the period under review, and the daily average, as shown by the difference between the stocks at the beginning and the close of the month and the shipments meantime, was 10,153 barrels, or about 800 barrels less than the daily average during April, and an increase of about 375 barrels over the average for May. During May, last year, the daily average was about 9,450 barrels.
