

The Pittsburgh Gazette.

THE SPINNING WHEEL.

As I sat at my spinning wheel, A bonny I did weave me, I thrummed and I tread and I weaved, I spun and I wove me.

EPHEMERIS.

The four-legged child is at Nashville. The Pope has two brothers older than himself.

Blandin, the tight rope walker, has been divorced. The western crop of tobacco is estimated at 150,000 hogheads.

Fischer, the German, English Hamlet, is to play in New York in August. A carnival is to be held in Missouri.

St. Thiers, who is more than eighty years old, has begun the study of Botany. The horse of which General Sheridan made his famous ride is in Dubuque.

50,000 wild pigeons were shipped east one day last week, from Oakfield, Wis. When Lee went through Fredericksburg fifty little girls strewed flowers in his path.

There are seven counties in Kentucky in which no person pays an income tax. The first sleeping car ever seen in California arrived at Sacramento, from the east, on Friday.

The Crown Prince of Denmark is to marry the Crown Princess of Sweden on the 27th of July. More than 600 ladies of Rockford, Ill., have petitioned the city authorities not to grant liquor licenses.

The address to the graduating class at West Point is to be delivered this year by Rev. H. W. Beecher. Cincinnati theatres are all closed save one, in which Emerson and Manning's minstrels are playing.

A mineral spring has been discovered at Manchester, Conn., and a hotel is being erected on the head of it. A Scandinavian Academy is to be established in Dane county, Wisconsin; the buildings to cost \$20,000.

George Crane, of Washington, Ill., died on Saturday week, in consequence of being kicked by a man named McDonald. Directors gave notice that the Society would resume business on Monday.

Quips and Cranks. PASTING the time—going by a clock. "Light dues"—Photographers' charges.

A THOROUGH BREAD baker is as rare as a thorough bred horse. "HOMER" QUINN is addressed to L'Homme qui pleure.

Is whist best played by candle-light, gas-light or Hoyle-light?—Judy. QUILL intimates that he believes in the woman's movement—on washing day.

EXPLANATION of one who had seen Niagara: "Oh, water falling off was there!"—Judy. Never wait for a thing to turn up. Go and turn it up yourself. It takes less time and is sure to be done.

THE HARVARD boys for the International Regatta are vigorously temperate, but they go on a train daily. THE ANVIL Chorus of the one hundred Boston firemen at the Jubilee is sure to be a very striking performance.

FUN says the abolition of the Irish Church is "an established fact," and that the Orangemen are "a disestablished faction." A FRENCH mother-in-law says: "What affords me pleasure in the death of my grandson is the grief it will cause to my son-in-law."

THE signboard of a tavern, near Strasbourg, France, bears the following inscription: "Strong beer and wine of the first quality. Customers drinking more than twelve glasses will be sent home in a cab, free of charge, in case they are unable to walk." WOMEN talk—men act. Women dream—men think. Women sit around hesitatingly—men go and do promptly. Women guess—men decide. Women are going to see about it by and by—men face the thing on the instant. Women passively accept—men boldly (and often to their sorrow) propose.

EVEN Frenchwomen are disagreeable to one another sometimes. The other day two "dearest friends" were in conversation. "My dear," said the elder, "do you know that your husband told me last night that my cheeks were like roses?" "Yes, love, I know he did. He spoke of it afterwards, and said it was a pity they were yellow roses."

TANKERS' bark is becoming dear, and a better means of utilizing it are being discovered. "The first great improvement is to reduce it to powder, instead of the coarse grinding that is usual. Twenty per cent more of tannin is thus obtained by leaching it in cold water, driven into the mass by powerful hydraulic machinery, than by the old methods. Hot water gives a still greater yield, but it also extracts some new element injurious to leather."

A CONSPIRACY to flood the country with counterfeit money, with headquarters in Canada, has just been discovered. The plan was to scatter men in all the principal cities of the North and West, and have the money put into circulation simultaneously. The fourth of July was the day fixed for the operation, and the legislation was to distribute as many spurious notes as possible between sunrise and midnight.

CLIPPINGS.

RAIN water caught during May or the first week in June, will keep a long time perfectly pure and sweet. Some caught in 1829 was pronounced as sweet as spring water in 1850.

THE receipts to the Ticket Agent of the Pacific Railroad at Omaha have averaged \$4,000 per day since the opening of the road. One day this week the evening train for Sacramento took seven passenger cars full, the majority of which were through passengers.

At Duchaux, recently, a brigand of herculean strength was about to be hung for murder. He burst the straps which bound his left leg, seized the executioner, and banged him before assistance could arrive. He was thereupon appointed to his victim's office.

A CONVICTION which the true merit of the Indian in every latitude, uninfluenced by local causes, and prevent or obviate the variation of the compass, has been devised at Griff Point, South Africa. The inventor will go to England to secure the patent.

THE other night, Military Hall, in Paterson, New Jersey, was struck by lightning, which invaded a ball room in which there was a dance going on. The lightning struck the roof, and returned the whole lot, upsetting the girls, face downward, into the middle of the floor, and stunning them for a minute. A man had all the hair burned off his head.

THE Illustrations of Paris publishes an engraving of a great spreading tree near Cairo, under which, according to tradition, Joseph and Mary and the infant Jesus took shelter during their flight into Egypt. The tree, which stands on ground belonging to the Isthmus of Suez Canal Company, was marked to be cut down, but the Empress Eugenie, who is standing and now pays a keeper to watch it.

THEY are running a railroad through the old dueling ground at Weehawken, New Jersey, and the granite block which marked the spot upon which Burr stood at the time of his duel with Hamilton, has been taken up, and used as a covering stone for a culvert. The intelligent "boss" of the job says that Burr's standing and now pays a keeper to watch it.

AN inexorable fact of statistical probabilities, perpetuates the following atrociously hard facts concerning the ages of our most beautiful and attractive of our female theatrical stars: Laura Keane is fifty-six; Mrs. Johnson is nearly seventy; Mrs. Bowers is nearly seventy; Maggie Mitchell is forty-one; Charlotte Thompson is thirty-four; Edie Germon forty; Kate Reynolds is forty-three; Lolla is twenty-six; Charlotte is nearly twenty-seven; Lydia Thompson will never see thirty; and Miss Martiniot had arrived at "years of discretion."

A SEMINARY which has been opened in Berlin in connection with the Evangelical Johannessenstift, for the purpose of educating young men—of whom there are already seven in the establishment—into the offices of clergymen, and teachers of the German immigrants in the United States. The constant stream of immigration from Germany to America has made the want of such a seminary and school necessary every day more and more felt. The North American seminary, though united to the Johannessenstift, is an independent addition, but they are entirely dependent on voluntary contributions for their support.

DURING the late meeting at Berlin of the Society for Giving Aid to Sick and Wounded in Time of War, the Prussian army had a grand manoeuvre. In this they imitated exactly an actual field of battle. Men were supposed to be killed of wounded, and were borne off the field. The ambulances were all equipped as for war, and the army surgeons were on duty and waiting for the carriages of wounded men. To test the medical arrangements, the number of men supposed to be wounded was made greater than would actually be the case, and wounds of all kinds were supposed to be inflicted. Every wounded man was attended to on the spot.

TWO students of St. Vincent's College at Wheeling, while swimming in Wheeling creek on Thursday afternoon, attempted to carry two smaller boys across the creek on their backs. One of them, William Johnson, had a small boy named Baxter on his shoulders, and when in the middle of the stream was heard to cry out, "Baxter you are choking me." A brother of Johnson's, who stood on the shore, seeing his distress, plunged in and succeeded in relieving him of his load, thinking he would have no further difficulty. The latter, however, immediately went to the surface and sank to the bottom. The boys immediately commenced diving for him, and in a few minutes found and brought to shore his body, but it was too late.

THE effect of anything of this kind touches the heart is multiplied by the intensity of the heart's own chords. Hence it is that it is so sensitive to fine and quick work. It is that it is so sensitive to fine and quick work. It is that it is so sensitive to fine and quick work.

THE effect of anything of this kind touches the heart is multiplied by the intensity of the heart's own chords. Hence it is that it is so sensitive to fine and quick work. It is that it is so sensitive to fine and quick work.
