Getting Dull,

Business at the Mayor's office, at the morning Court yesterday, was exceedingly dull. The fact that the Sunday liquor law had been pretty generally observed, was quite apparent. He was committed to jail in default of ten dollars and costs.

LETTERS FROM THE PEOPLE.

The Soldiers' Monument. EDITORS GAZETTE: I am very glad to ee in your editorial remarks on the subect, a request that the Monumental Asociation reconsider their action in regard to locating the proposed structure n the Cemetery. I speak as one who erved during the war, from April, 1861. until after the surrender of the rebel armies, and as one who patronized the Monumental Fair almost every day and evening it was held, giving in my mite, ill I could afford, to make it successful. have never taken part as one of the As ociation, but I have felt and still feel sociation, but I have left and shiftee a deep interest in the proceedings of those self-sacrificing ladies who have done so much to rear this testimonial of gratefulness to the dead soldiers. The best of mortals sometimes err, and I feel that I are warrented by the sentiment of the am warranted by the sentiment of the communty in saying that these ladies have committed a grave error, and one that, if not undone whilst it is yet pos-

sible, they will regret as long as they live. Of all the sites proposed they have un-doubtedly chosen the one least appropriate, and the one most obnoxious to the public. Perhaps they have been hampered in their action, by persons having selfish interests at stake; and perhaps, without their knowing it, some-thing of this kind was the weight that thing of this kind was the weight that finally made the decision.

It is useless to go over all the arguments against having it at the Cemetery—there are too many of them; but if the

Cemetery was open to the public, it is not the proper place for such a structure. The object in having a public monu-ment, as I understand it, is to have it in a position at once accessible and conspicuous; where it will be a gratifying object for our own citizens to look upon, and one that will remind our visitors that our patriotic people have not forgotten those who sacrificed their lives that the life of the nation might be saved.

How many of our citizens visit the Cemetery for gratification, pleasure or sight-seeing? How many visitors to the city are taken there to be shown the greatness or the beauty of the place? he answer to both of these queries must be comparatively few. If the monu-ment were to be placed outside the gate the same arguments still hold, and, therefore, Lawrenceville section should not be gratified at the expense of the alance of the community.

As a Pittsburgher, I would like, above

all things, to have it located somewhere in the city; but there has not been an eligible site offered in the city. Alleghely, in her commons, has the most eligi ble, conspicuous and pleasing site that has been offered. I have a small opinion of Alleghenians, because in the interest of a few ward politicians they prevented our two cities being one grand city, ranking, as it should do, in the cities of the world; but, because the village has some open space that is being improved into a Park, gratify Allechenians by doing a sensible thing, and put the Monument where it will be seen, even by Pittsburghers, on the Commons.

In a few years every poor man wanting to enjoy cooling shade and a grass plat without going a long distance will ride to Allegheny on the street cars, and take a stroll through the Park, as will then be called. Persons taking a drive, or showing strangers our rural pleasure-places, will take the well-kept Park in Allegheny "en route," where one of the beauties ought to be the Soldiers' Monument.

But do, please do, get the ladies to re-consider. If they won't locate in Alle-gheny, get them to put it on Cliff street, Scotch Hill Market square, the Grain Elevator, the Court House, at the Point, or at Point Breeze near the stock yards, anywhere is preferable to the grave yard.

-Yours, truly.

EDITORS GAZETTE: At the close of the late conflict an effort was made by a few benevolent and patriotic ladies, who so of September, 1869. lately had distinguished themselves in the cause of humanity, to raise funds for the purpose of erecting a monument to

Their efforts were pecuniarily successwho, by special favor, are fortunate to obtain permission by card, and then only in certain hours in the day.

This is surely a misconstruction of the object of this testimonial. Had the ladies consulted the wishes of ninetenths of the contributors to that fund, or nad they themselves the advantages of a more extended observation, they would not have failed to notice that such monuments are not to be considered in the light of a tomb stone, but, like the shaft of Bunker Hill, or the statues of Washington, Lafayette, or others, are to be admired as commemorative of noble leeds of noble men, and to perpetuate

noble principles.

We deprecate any action regardless of onblic sentiment, and would insist upon a free and unrestrained exhibition of this testimonial of public gratitude, and advise; that the eight ladies in question desist from pursuing for the second or third time a course of action which mus ond or eventually bring upon themselves discredit, and mar, if not obliterate, all the good that was originally intended SOLDIER.

I am sure they cannot find another spot that presents to many attractions, and will be of so easy access and stimulate the subof so easy access and stimulate the subscription of so much money in addition to the liberal offer already made by the Allegheny authorities. Now that it is certain we are to have a monuterprise so far towards completion. Now that it is certain we are to have a monument somewhere, the object of which is familiar to every one, the only question is. Where shall it be located in order to be seen by the largest number of our citizens and strangers without incurring any expense or the loss of any time from the room crowded with men and women, and taking in money as fast as she could incurred the room crowded with men and women, and taking in money as fast as she could incurred the room crowded with men and women, and taking in money as fast as she could incurred the room crowded with men and women, and taking in money as fast as she could incormation was made and a summons business?

MESSES. EDITORS GAZETTE: In this age of velocipedes any man may have vin vs. Bleakley. This was an action re- his "hobby," and, so far as applies to school government, possibly every several years ago. The plaintiff entered teacher has a hobby. A good hobby into a written contract with the defendant differs from a bad hobby just so far as to pay a stipulated sum for a certain good or bad mechanical contrivance differs. A good method of government differs

from a bad method so far as good or bad principles are involved in it. And any method is good only so far as it develops good and true principles in the ilfe and onduct of the child; humanizes instead of brutalizes; elevates and refines instead for degrades and debases. It requires but little perception to discover the superiority of a good rule over a bad one, when they are both brought to a practical test. And as applied to teaching, the success of a rule is generally measured by the amount of "book learning" a child acquires within a given time. But as teachers have no rule for measuring health and morals, no account is taken of the physical injury or demoralized condition of the child as an offset.

The moral training of a child is of the first importance, and every method that and there is plenty of proof to show that tery on oath of John Latterly, was found guilty, and sentenced to pay a fine of one tably leads to lying, deceit, hatred, revenge, tardiness, truancy, absenteeism, indifference and disgust, and the fear of severe punishment frequently so con fuses and agitates the thoughts that the mind loses its equilibrium, and is lost in vacancy, entirely unfitting the child for study. I was a school-boy once myself, and I retain some vivid recollections of the use of the rod, and these recolled tions lead me to make war on the infer

nal practice.
In those days there was no such thing known among farmers as a "threshing machine," except, indeed, in the country school houses. It was the fashion in school flouses. It was the lashion in those days to "thresh" out the grain with a hickory flath, and it was also the fashion to "thresh" in the mental grain iasion to "thresh" in the mental grain with a hickory rod, and was done by the "posterior" method of threshing. The only wonder is, that while the farmer keeps up with the age of improvement, and does all his threshing at once by machinery, that the teacher has not in vented some instrument by which he

could give a general threshing and make one job of it. But this is only a proof of how hard it is for teachers to get out of old practices and adopt new.
