ABROKEN TIE. Low down the hill the sunbeams slide, Of the broad river along the side...

PENNSYLVANIA.

RUMOR says the State Guard will start up again this week. THE M. E. Church of Warren voted 41 for representation and 18 against.

From Chester county we hear that the hay crop is very light and the corn very backward.

MORGANTOWN is raising funds with which to procure a soldiers' monument. We understand the citizens of that county have wisely decided upon a location for it before raising the money.

On Wednesday last Mr. Geo. Earhart, of Hempfield township, while assisting his two sons-in-law to load a saw-log, was accidentally run over by the log and instantly killed.

The Clearfield Journal says: Copious rains have fallen in this region, within the past week, and no doubt the growing grain and grass crops have sustained some damage in consequence.

In York county the other day, a horse, hitched to a mowing machine, took fright and undertook to run away, but the machine proved too much for him and mowed off both of his legs directly before the eyes of the driver.

On Tuesday morning about nine o'clock a sad accident occurred at Thomas & Peacock's furniture store in this city. While repairing the cupola the scaffolding gave way, precipitating to the ground three men at work upon it.

On the 14th inst. Mr. Henry Stocks, of York county, while shingling a house in Dallstown, fell from the roof to the ground, a distance of about twenty feet, and was instantly killed.

Mr. MARCUS BEEM, of Reading, brought to the Eagle office on Saturday, a white robin, which was caught by Mr. Schild, in Alsace township, east of Mount Penn, and not more than a mile from the city line.

On Saturday last, Mr. Wm. Lytle, of Conemaugh township, Indiana county, was riding along on horseback, near Porter's salt works, near the West Pa. Railroad, and while the 11 a. m. freight train east, with 34 cars and two engines, was passing, his horse took fright and ran off, Mr. Lytle losing his balance, but still remained on the horse, which was running at full speed, when his head struck the abutment of the Porter Canal bridge, causing almost instant death.

The Lancaster Examiner says: Miss Annie Keller, daughter of Mrs. Daniel Keller, of Ephrata township, met with a sad accident on Tuesday, 22d inst., which terminated fatally on Friday. In the afternoon of Tuesday she was picking cherries from the top of a tree, when the limb upon which she was sitting gave way, and she fell to the ground, a distance of about thirty feet. She struck upon her head and left side of the face, and was taken up insensible. She lingered until Friday, when she died of congestion of the brain.

The body of Ben Slater, a man who was lost in the woods in Forks, in this county, last spring, was found by John Boughton a few days since, in a deep forest, where he probably died from starvation and exposure. The deceased was an illiterate, feeble-minded man, who several months since, became violent, broke away from his keepers, and ran into the woods. A storm coming on shortly after, all traces of his course were lost. His fall has been a matter of conjecture, until Mr. Boughton, on going to look after single bolts or blocks, cut by him in the early part of the winter, found the body lying near by. — Wyoming Democrat.

Mount Union and College—Canton and Manufacturers' Washington—Female Seminary—Union School—Town Hall—Railroad—Harvest, &c.

WASHINGTON, Pa., June 28, 1869. Your correspondent spent last week and the week before in Ohio. Some observations made while there may not be altogether without interest to your readers.

At Mt. Union, Stark county, we attended the commencement of the College located there. Nineteen-four of them young ladies graduated. Their orations were excellent. The two Literary Societies gave a conjoint entertainment. Not less than one thousand persons were present. Proceeds, five hundred dollars.

This College is doing a noble work, and during the past year. The college building is new, large, well finished and furnished. The faculty are faithful and efficient.

Mount Union and Alliance are a mile and a half apart, and will together shortly be a city. The latter place now has a population of six thousand. It is a marvelous growth—all the result of a few years.

Canton was visited. There is progress too—very rapid indeed. Houses are going up by the score. Some very fine ones. Mr. C. Antman, who is at the head of the establishment in which are manufactured the "Buckeye" mowing and reaping machines, is building a family residence at a cost of one hundred thousand dollars.

The establishment just named, and that of E. Ball & Co., where the "World" machine is manufactured, employ, between them, about 500,000 are paid monthly. Canton is destined to be a large and wealthy city.

Now an item or two of home news. Our Female Seminary had its closing exercises on last Thursday. It was an occasion of more than usual interest. The young ladies who graduated acquitted themselves nobly. Their performances were of a high order, elicited much praise, and the music was excellent.

In the evening Mrs. Hanna, the worthy Principal, gave a brilliant entertainment to a very large number of invited guests. It was a very enjoyable affair, indeed. We are proud of our Seminary. Long may it live!

Some men were loading baled hay upon a Lake Superior steamer, at Detroit, a few days ago, when they were started by a terrible hissing which came from a bale partially burst open, and a badly pressed black snake, four feet long, wriggled out.

A Mosquitoe was recently caught in the Federal department. The Reporter seems to lean toward the belief that this is the identical fish that swallowed Jonah, and that he forgot to take his razor with him when he left.

A New Haven colored man was trundling a wheel-barrow upon the sidewalk the other day, when a policeman ordered him into the street, on penalty of the law, whereupon the colored man, who was in the act of passing a razor in the curbside of the law and of the sidewalk, remarking, "Guess dat's all hunkey, ain't it?"

A WEEK or two ago a young lady of Iowa, while on the way to her wedding, was offered by another young man if she would marry him, and consented. The disappointed lover was not to be wholly cheated out of his matrimony, and therefore proposed a wager.

The French Journal Official records the successful voyage round the world of the French iron-clad corvette Bellouise, bearing the flag of Rear Admiral Jenhot.

"Having left Toulon on the 22d of December, 1867," says the Journal, "she returns to France after a cruise of twenty-nine months. The first iron-clad vessel that ever accomplished the voyage."

MARRIAGE OF WIDOWS.—The frequent marriage of widows seems to have been common more or less discouraged, men being allowed in this respect much greater liberty; but St. Jerome mentioned a widow who married her twenty-second husband, and in his turn having been married to twenty successive wives.

UNROMANTIC TERMINATION OF A FOREIGNER'S CAREER.—Henry Rossie, a distinguished American statesman in Albany, and through the Northwest and Canada, on which occasion he forged his father's name on several checks, and with a brazen female on his arm, was introduced as his wife, traveled on board the steamer vessel Yantic, lying at Aspinwall, and left port for the West Indies, Japan, China, or some other foreign clime.

In an article upon the true Republican policy for West Virginia, the Wheeling Intelligencer expresses, in the paragraphs annexed hereto, sentiments worthy of consideration by the people of other States: Thus: We can afford almost anything better than a resort to mere tricks.

The true course for the leaders of our party, as we humbly conceive, does not lie through the tortuous way of party devices. It will not succeed by half-way or equivocal measures. The bold policy, which rises above the ruts of party mediocrity, is the one that will win. It requires some thing in principle and some more than ought to be possessed by any man who assumes to be a director of public opinion or a political guide.

Washington Items. Secretary Robeson has intimated that Borie's recent order changing the names of vessels will be rescinded.

During June one million of the three per cent certificates, which Congress allowed the Reconstruction Finance Commission to issue, have matured and been redeemed.

The President has positively declined to interfere in the case of the assassin of Weaver, who was tried by a Military Commission for murder in Texas, and sentenced to be hung. The point in this case is that it is the first where a sentence of death resulted from the enforcement in that section of the reconstruction laws providing for the trial by a Military Commission of citizens of the unreconstructed States.

PERSONAL.—We learn that the Hon. E. A. Rollins, late Commissioner of Internal Revenue, is now acting as President of the National Life Insurance Company of the United States of America, in Philadelphia, during the temporary absence in Europe of the President, O. H. Clark, Esq. Mr. Rollins has been an active member of the Board of Directors of this Company since its organization, and in giving to it his interest and the benefit of his personal co-operation, and the advantages of his enlarged experience and extensive acquaintance, we confidently look for a renewed impetus to be given to the already unprecedented progress of this great National Institution.

A Mr. Hyman, of Holland, Wisconsin found two dogs belonging to some of his, which had taken refuge on an uprooted tree. Unnoticed by the dogs, who were intensely barking at the sheep, he crept up suddenly, seized both the hind legs, one in each hand, and, bringing them with a sweep over his shoulders, dashed their brains out against the tree.

GAS FIXTURES.

DR. WHITTIER CONTINUES TO TREAT ALL private diseases, Syphilis in all its forms, all venereal diseases, and the effects of mercury are completely eradicated.

It is self-evident that a physician who continues his studies to the study of a certain class of diseases and treats thousands of cases every year, must acquire greater skill in the case than one in general practice.

The Doctor publishes a medical pamphlet of fifty pages that gives a full exposition of venereal and private diseases, that can be had free of charge by mail for two stamps, in sealed envelopes. Every sentence contains instruction to the afflicted, and enabling them to determine the precise nature of their complaint.

The pamphlet, comprising ten simple questions, is so arranged that the patient can visit the city, the Doctor's opinion can be obtained, and the medicine sent by mail or express. In no case is a patient's name given, unless he or she is desirous of it. Persons who are afflicted with venereal diseases, or who are desirous of preventing their children from being afflicted, should be particularly attentive to this pamphlet, as it contains a full and complete description of the disease, its symptoms, its progress, and its treatment, and is so arranged that the patient can determine the precise nature of their complaint.

It is self-evident that a physician who continues his studies to the study of a certain class of diseases and treats thousands of cases every year, must acquire greater skill in the case than one in general practice.

The Doctor publishes a medical pamphlet of fifty pages that gives a full exposition of venereal and private diseases, that can be had free of charge by mail for two stamps, in sealed envelopes.
