## Che Nittsburgh Gazette.

## KANSAS AND THE PLAINS.

JEFFERSON Co., KANSAS, June 17. was arrayed in all the glories of early

Contrary to my expectation, the further we progressed westward to the extreme verge of agricultural settlement, the crops of every kind were more and more advanced in growth, and the tallest corn I saw was in Ellsworth county, within sight of Fort Harker. Beyond that there are no fields; no plow furrow has yet disturbed the soil, except on two small experimental farms on the north branch of the Smoky Hill near Sheridan, which are said to be to a good degree successful; ibut I had not time to visit. Fort Harker ibut I had not time to visit. Fort Harker | c s 218 miles west of the Missouri or the State line; Sheridan is 405 miles west of the same point; conse. quently there is an area of 186 miles on which no serienitment at area quently there is an area of 186 miles on which no agricultural experi-lime in extent and beautiful in the long, yery little else than buffalo grass grows. grove of splendid trees, on the dense, dark foliage of which

the way; and where it has been disturbed by the excavations on the railroad, and ditches, the growth of weeds, intermin. But those plains cannot be brought un-der cultivation until the railroad shall be the eastern slopes of the Rocky Moun-tains; and when they are, the work will probably commence on the mountain slopes and work eastward. The lack of water will be supplied by artificial reser-toris. Excellent water is obtained in abundance from wells dug to depths vary. voirs. Excellent water is obtained in sbundance from wells dug to depths vary. not believe that artesian wells would be successful, owing to the absence of the vicinity of mountains or higher levels. The first use to which these extensive regions will be applied, will be as pas-The first use to which these extensive regions will be applied, will be as pas-tures for cattle and sheep, but even this phainess cannot be successfully entered minated or compelled to behave them-selves, and the road completed to the coal successfully entered and they are quite tame-they scampered to the whey tank and drank greedily for a few seconds, and then walked off. It minated or compelled to behave them-selves; and the road completed to the coal and timber of the mountains. The latter, thanks to the energy of the Kansas Pa-accomplished fact; but when will that country be made secure from savage dep.

If ouffalo grass could be grown free II DUHAIO grass could be grown tree from admixture with other and stronger grasses, I know of none that would be so well adapted to lawns. But were I to attempt to introduce it; I should send up to the wister for a quantity of and a rather JEFFERSON CO., KANSAS, June 17. Last week I made an excursion to Sheridan, the present terminus of the Sheridan backs Dation Decise Dec Sheridan, the present terminus of the Kansas Pacific Railway, more for obser-vation than anything else. Early in Oc-tober last I was over the same road, when everything was clad in the sere and sober High winds career over these plains LIFE INSURANCE COMPANY. almost continually. Sometimes, and most commonly in the warm season, it is a pleasant, refreshing breeze; but at times a pleasant, refreshing breeze; but at times something very like a hurricane prevails. The winters are severe, owing rather to the sharp winds than to a low tempera-ture. But the plains are considerably elevated—Sheridan, which is nearly two hundred miles this side of the mountain UNITED STATES OF AMERICA. hundred miles this side of the mountaing, Chartered by Special Act of Congress is shown by the railroad profile to be 2997 feet above tide, which is quite as high as the summit of the Allegheny mountains. The evening before I left Sheridan Cash Capital - - - \$1,000,000. The evening before I left Sheridan there was a light shower, accompanied by some grand electrical displays, and suc-ceeded by a vivid rainbow; forming a complete semi-circle, the base of which was at least ten degrees above the visible and true horizon. This showed that the sun had sunk an many degrees balow the Branch Office, PHILADELPHIA. OLABENCE H. CLARK, Philadelphis, President, JAY COOKE, Philadelphia, Onairman Finance and Excentive Committee. be dotted with dwellings, urban and ru-ral, and wave with rich harvests; The soil is there, and the water is there, prosoli is there, and the water is there, pro-vided means are taken, as they can be, to keep it there. The plow will open the soll and let in the rain to fill the wells

and cause fountains of water to break out that region frosts do not soften the ground. as in the eastern States; the result is that there is probably no soil in the world of equal depth and fertility so hard and impervious to water, as that. broken up, and I observed along the rail-road it is extremely loose and friable. The top soll of the Plains is of a dark chocotate color, and from one to two feet sometimes more-underlaid with a subsoll composed of good retentive clay, in the composition of which lime enters largely. In some places it is precisely the same to all appearance as that found in the walley of the Missouri, and which Young ladies who coquette with every Professor Haydon pronounces marl. Re. mains of numerous and some immense aquatie animals are found embedded in this vast deposit; and in many places ridges of drift of great extent, made up of

ridges of dritt of great extent, made up of water worn gravel, principally quartz and kindred rock, are found. The channel of most one continual sand bar made up of such materials, mingled with every coarse sand. buffalo grass, with which hundreds of with their feelings, and to satisfy their thousands of same with the there are the satisfy their their satisfy their satisfy their their satisfy their satisfy their their satisfy their their satisfy their sat thousands grass, with which hundreds of with their teelings, and to satisfy their she overed, is a very peculiar variety. It is fine and delicate in the blade, and rarely rises above three inches in height. Its color is a light green, and it is while rarely fises above three inches in height, Its color is a light green, and it is, while growing, soft and pleasant to the tread. The seed stem is generally not more than on one side only, a very siender, and bears tooks something like the feather of an ar-rises and stands as erect as ever the in-mal has passed it. Indeed it is the only grass that could bear the trampling of the mal has passed it. Indeed it is the only grass that could bear the trampling of the buffalo. Providence seems to have pre-and it is well named when called buffalo grass; for it is a fact, that as these ani-mals are driven back before the advancing tide. of nonulation, the other taller and come in and smother it. In the region

around Fort Harker we see this process going on. This probably is the most nutrigoing on. This probably is the most nutri-tious of all grasses, and has the singular property of retaining in a dry state throughout the winter all the nutriment it had in its highest maturity and vitality. Domestic animals that feed upon it alone the aheared a sheep in ten minutes.

Thence? So far as my observation gces Labould say, at Fort Harker, or about that meridian — say half way from the consection to he western, border of Kansas. The between the arable and pastural por-transport the arable and pastural portidns of the State; and the day will come when what, we now call the plains will same. C. Making Coffee.

Making coffee is an art yet in its rudiments among out people. The stuff com-monly drank as coffee-bitter, opaque and inll of minute particles of the calspiceause jountains of water to break out cined berry-is no more like the neutral where at present all is dry. All that re- that really deserves the name than chalk that really deserves the name than chalk between the birth of where at present all is dry. All that re-gion is now as hard as a highway, for it has been trampled for ages by millions upon millions of buffalces, perhaps the most restless of herbiverous animals, and where tread while plunging along is most resultess of nerol verous animals, and whose tread while plunging along is equal to the action of as many battering drumess of the suffurness and winters in completely across; the ground berry is put in, falling to the bottom of the bag, and the boiling water now poured upon it, filtering slowly through the coffee and bag, and falling thence to the bottom, perfectly clear and pure. It is impossi-ble that it should now, contain aught of the here but it approach to the berger but it is a source of the berger but its and the berger but it the berry but its essence. If water is poured in a second time, a very different fluid is drawn off, acrid or bitter und unwholesome-much like the vile decoction usually swallowed as coffee.

Coquettes,

young man they meet, who look wonder-fully sweet, and kind and sentimental on

every stranger who comes to town; who fish for the praise and compliments of the men wherever they go; who grow out rageously offended if politeness is paid to any but themselves, and who are always

hord deliver the male sex both day and night, for such will make them waste their time, squander their dollars and do irretrievable mischief to their morality.
