FINANCE AND TRADE

OFFICE OF PITTSBURGH GAZETTE, THURSDAY, July 15, 1869. When the cable dispatches brought nformation this morning from London that the Bank of England had reduced its rates of interest, the firmer feeling in gold subsided, and gold showed symptoms of weakness, opening at 136% firm at \$1.25. to 137, and closing this evening at 1361/4. This policy of the Bank of England will draw large amounts of money to New York, and exports of specie are thereby checked, and a new impetus to bond speculation is thereby given. Although t is not likely that gold will decline very much during the present and next month, the bull element is less confident for the present. With an easier market, however, and during the month of August higher rates are likely to prevail. The powerful cliques in stocks. together with the foreign bankers, have common interest in forcing up gold before the shipments of this years crops and cotton begin. The foreign bankers, in particular, hold some gold at 144, which they will make a desperate effort to sell again with a profit. Bonds are firm, but scarcely as high as yesterday. More sellers make their ap-

pearance, and with lower gold a reaction is likely to take place. Stocks are artificially bid up, but rices are barely sustained whenever ny seilers appear.
