

OFFICE OF PITTSBURGH GAZETTE, FRIDAY, July 16, 1869. Speculators continue to keep Ficur and Grain up in Chicago and New York, in face of the fine harvest weather for several days, past and the almost certainty that all the small grains will be secured in good condition, and that the yield will be considerably above an average. The reports from nearly every

quarter are very fayorable-in many sections the Wheat crop has already been safely housed, and the only complaint noticeable is that here and there

A miller from an adjoining county, who was in the city the other day, says that her expects to buy Wheat at his mill at \$1,00 per bushel; another miller from the Eastern part of the State, reports that he expects to buy in his neighborhood at from 90 cts to \$1,00, and we are cognizant of one of our city millers who declined to offer above \$1,25 for new Wheat, for future delivery. It is rue, millers are usually bearish, as they like to buy Wheat as low as possible, but the above figures show that they have no idea that the prices which are now prevailing can long be sustained. APPLES-Sales of new crop at \$3@4

mand is only moderate, and prices are unchanged. We continue to quote Western Flours at \$6,50@7 for Spring Wheat brands, and \$7@725 for Winter

Wheat. -GRAIN—Wheat is very scarce, and prime to choice Red on spot, would still bring \$1,35@1,40, but these igures could not be realized for future delivery. Oats held firmly in expectation of an the demand will have light; sales on track at 66, and in store uotation as it did at 68@70. Rye is in steady domand at \$1,25, and but little coming in. Corn start selling red to 1201/@1201/. otation as it did ed to 120%@120%. HAY-Baled is being sold to the trade at \$25@28, for good to strictly prime tions, however, are
