Break in a Sewer and What Came of it—Tenements in Hardacre built and inmates flooded out—Work for the Benevolent.

The rain storm of Friday evening was one of the heaviest we have been visited with for some time, and while leaving its marks in cleaner thoroughfares, cooler atmosphere and rejuvenated nature in the city and suburbs, in one district of our city at least, the noted "Hardacre" was followed by effects which were not of such a pleasant and desirable character.

Our readers must all remember the Try street sewer, a very appropriate name, as it is certainly one of the most trying specimens of workmanship which the city has ever been troubled with.

Well, last Tuesday another break occurred in this sewer, in that part of it which traverses Watson street. The break caused a large part of the ground within a few feet from Shingens hole or basin, about thirty feet depth, in the middle of the street.

The water, however, found its way through a small opening which did not reach the sewer, and the damage was not at once repaired, that work being put off for a more convenient season.

It is said that the water was not at once repaired, that work being put off for a more convenient season.

On the lower side of the street, and standing with their first floors several feet below the grade, are about a dozen frame tenements houses, which are occupied by two families, one above and another below stairs.

The families in most of these houses retired for the night, and were suddenly awakened by the noise of rushing water, which poured into the lower apartments, filling them with a muddy, foaming liquid, and carrying with it beds, tables, chairs and every thing movable in the rooms.

In many instances the inmates barely escaped drowning, so rapidly were their apartments filled. Everything in the rooms was carried off by the rushing water, and was completely destroyed, while that which was saved is almost unrecognizable.

The water, which was saturated with mud, and knocking about, the mud left by the water after it had subsided covered the walls and floors of the rooms several inches, and rendered the rooms wholly untenable.

In about half an hour after the deluge had subsided, the water was pumped out, and the inmates were enabled to return to their homes.

It is said that the water was not at once repaired, that work being put off for a more convenient season.

The first house was occupied by Mrs. Mary Porter and her daughter, who were only saved by being drawn up by a rope from the second floor to the upper room.

The families who suffered by the affair are most of them in indigent circumstances, and are left entirely destitute.

Some of the citizens of the neighborhood are of the opinion that the gutters of the higher side of the street have been filled up and made instead of water conductors regular.

On the Wing.

The famous Allegheny Quartette Club, of whom every lover of melody hereabouts has pleasant recollections, contemplate making a tour of the principal cities and towns of Western Pennsylvania and Eastern Ohio, starting on Monday next, and being absent three or four weeks.

The members of the "Quartette," Prof. W. B. Slack, Harry Horner, W. H. Slack and J. M. Darling, are all masters of the "art melodeum," and each in his special line irrefragable.

By constant and arduous practice, and the most rigid care and cultivation, they have trained their voices to join in perfect harmony and with allover sweetness, while the choice and exquisite selections of which their repertoire consists, compare favorably with the most attractive and delightful character, a fact which has its strongest evidence in the crowded audiences of the most fastidious circles, which have always greeted their performances here.

There is a charm and a beauty, and a force in ballad melody, especially when sung in the "Quartette" style, and with feeling, which renders such entertainments irresistibly attractive, and accounts for the great popularity of the "Quartette" who have made this field in music a special feature. We bespeak for them a hearty reception from every lover of true, soul moving music, wherever they may sojourn, and anticipate their return after an agreeable jaunt, with renewed and brighter laurels.

A Desirable Location.

Hoboken, a new station on the line of the Western Pennsylvania Railroad, within a few minutes' ride of Allegheny, presents superior attractions to persons desiring a suburban home, and is certainly one of the most desirable locations for this purpose to be found anywhere among our surroundings.

It is but eight miles from the city, and within easy communication by the accommodation trains, which pass to and fro at short intervals during the day and evening.

The land, rising gradually backward by a gentle slope from the river and railroad, and commanding a broad and unobstructed view of the winding stream in front, and the lovely country on either side for several miles, is admirably suited and possesses all the requisites of handsome building sites.

A side from this, owing to its location, while removed from the turmoil and heat and dust of the city, it yet combines the business, educational and other health-giving atmosphere and quiet pleasures of a country life.

These facts which seem to have been appreciated by some persons, as is evinced by the rapidity with which the ground is being disposed of and the number of dwellings which have been erected since the opening of the station, have a portion of the most desirable of the land unsold, and if there are any other who wish to secure a suburban and comfortable home, they should avail themselves of this opportunity.

Capt. Robinson, No. 75 Federal street, Allegheny, the gentlemanly agent of the Hoboken Land Company, will be pleased to give any information relative to the location, that they may judge by personal inspection of its merits.
