One of the most offensive and inexcus able nuisances is that of "night soilers" commercing their operations in many portions of the city before persons have retired. After taking the laudanum she laid down to rest, and soon her breathing alarmed her friends, when efforts were made to arouse her, but without avail. Dr. Garwood was called in, and after working with her for some three nours, succeeded in restoring consciousness, and she has now entirely recovered from the effects of the drug.

The patient is immersed in a warm bath in the early stage of the disease, and this is repeated frequently, or as often as the strength of the patient will allow. The first effect is to produce a soothing and refreshing feeling in the patient, to be followed soon by such an eruption on the surface, of so vivid a color, and in such amount as would as tonish those who have never witnessed it. Thus one of the greatest dangers of generally returns after the first or second bath, and the strength of the patient is kept up by autritious food. The bath prevents the dissemination of the disease, by removing the excreta from the skin as soon as it is deposited. This treatment promotes circular desquamation. The body should be gently dried by soft linen cloths after the bath. By this procedure the various secretions are deprived of their noxious properties, and generally returns after the first or deprived of their noxious properties, and the irritation of internal organs is quickrelieved, thus dissipating info Another benefit is that a very serious case is soon reduced to a mild one, and the patient recovers in less than half the usual time. Since Dr. Thompson has pursued this practice—during the last fifteen years—he has never lost a patient from scarlet fever.

Mrs. B. was shortly afterward called out of the house by the gardener, where she had been but a few moments when she heard her husband calling har and provided their rash action. How innumerable this. Half an hour, spent in examining the magistrate's docket, or listening to the complaints which are poured into his official ear, would sufficiently afterward called out of the house by the gardener, where she had been but a few moments when she heard her ciently attest. Sometimes it is a difficul-ty between neighbors. In an unguarded moment one has made use of language which none but the aggrieved could congun in his hands, his chin resting on the muzzle. After gaining her attention he said "Good bye now," and placing his mouth over the muzzle of the gun pulled the trigger with his toe, discharging the contents of the weapon in his mouth and fell to the floor. His wife, on hearing the report, ran to him as quickly as possible, but life was extinct when she reactised him. The gun was charged with shot and sings, and the entire charge entering the mouth passed through the head, shattering it almost to atoms and carrying away a large portion of the skull from the back part of the bead.
