Amicable Settlement.-A few days since Caroline Cornelius made information before Justice Barker, charging Geo. Mueller with seduction. The accused was arrested and entered bail for a hearing which was to have taken place yesterday, when the parties appeared and were married by the Justice, which, as a matter of course, ended the proceedings.

Runaway Accident .- Yesterday afternoon, a horse attached to a wagon, ran away in the Fifth ward, Allegheny. The wagon came in contact with a lamp post, wagon came in contact with a lamp post, and was shattered to pieces. A fragment glanced off and struck a bystander, Mr. John Good, on the leg, with such force as to fracture it below the knee. He reeived medical attention at his home in the vicinity. The animal was not hurt.

Temperance Fountain.—The temperance men are talking of erecting a small drinking fountain in the Allegheny Park. The Park Commission have decided to conduct the water from a couple of springs on the hills above Allegheny in iron pipes to the Park grounds. On these streams the temperance folks design to use for a supply in their fountain. water, if it can be brought so far, will be of the purest and coolest quality, and such a fountain would unquestion

He is still at the lock-up where he will be detaine until his friends can be heard from.

Severely Injured .- Adam McKinney, severely injured.—Adam Mckinney, a man about sixty years of age, met with a serious accident yesterday, by which he was severely injured. It appears that he was riding with the driver in a brewer's wagon, coming down Penn street, and when near the Ninth ward market house, as the wagon was turning out of the track to pass a car, Mr. McKinney fell from the seat, striking his head or the cobble stone payement, inflicting a severe wound. He was carried into Dr. Durcan's office, where his injuries were

Another Seizure .- We learn that a gentleman connected with the revenue department, a few days since, while vis-iting the house of a friend in the upper portion of the city, saw four barrels of ale rolled into the cellar from a brewer's wagon, not one of which had the requir- adjourned. ed revenue stamp. The Collector was in-formed of the fact, and further investigation, we learn, led to the discovery of other frauds of a like character by the same brewer. The brewery, we learn, will be seized, and if the fraud is proven, it will be confiscated.

The Great Match betweeen the Atlan-tic Base Ball Club of this city, and the Baltic Club of Wheeling, is to take place Baltic Club of Wheeling, is to take place at half past two this afternoon, at Union Park, Allegheny. The Baltics will arrive on the eleven o'clock train from Wheeling, and will doubtless be received and welcomed by their Pittsburgh rivals. The names suggest a victory for our boys, for the Baltic is but a puny season pared with the Atlantic ocean, and compared with the Atlantic ocean, and the Atlantic Club must be very strong if their pitcher is a fair specimen of the rest of the Club, for Brosey, late of the famous Athletic Club of Philadelphia, and probably the swiftest pitcher in the world, now fills that position in the Atlantic. We suppose there will be a great crowd to witness the match, as it will undoubtedly be a good one, and besides the price of admittance for gentlemen is small and for ladirs nothing at all, facts which are generally popular ones.

Trespassing.—John Miller was in the Alleghant Park yeaterday, and wishing election of a Secretary, whose name we did not ascertain.

The Chairman stated the object of the

meeting, and after considerable discussion it was resolved to unite and co-operate with the tavern keepers, or "M. P's," as the only means of protecting themagainst the onerous liquor law

selves against the onerous induor law now in existence.

The meeting then adjourned, and the "M. P's," assembled and were called to order by the Chairman, who stated for what purpose they had been called togather, and asked if any one had anything to propose for the benefit of the society. society.

A number of propositions followed: but as they were made in the "teutonic tongue," with which our reporter is not particularly familiar, consequently we are able only to present one or two. One member proposed to proceed against street railways alone, as it was scertained that they were strictly liable under the law. Another suggested the idea of "going

for" all classes of persons not members of the Society who were known to be guilty of any infraction of the law. Another more enthusiastic than his brother who seemed to think that the Society had already accomplished its purpose, proposed that all tavern keepers throw open their bars on next Sunday and sell liquor, indiscriminately to all who asked for and had the money to

A number of other similar suggestions ere made but no action taken upon any

The Chairman then called upon Mr Moore, one of the counsel of the Society, for instructions as to how they should proceed. Mr. M., in a quite lengthy speech, delivered the required instruc-tions, advising the Society to endeavor to unite the entire whisky and beer influence, so that they might have concert of action. No information should be made against any individual without first consulting one of the Attorneys for the Society. He thought that there should be a committee appointed, whose duty it should be, when they contemplated pro-ceeding against any railroad or street the name of Gotlieb Suitman, was found by one of the Allegheny police, wandering the streets and giving every indication of insanity. He was locked up, and yesterday morning a ticket for Chicago was found upon him. He stated he had were brought without their advice and consent. The half of the magistrates in he city did not know how to draw upan information in a case of summary con-viction, he said, and whenever there was a flaw in the information or any of the proceedings the court would dismiss the age at the cost of the prosecutor. There had been some talk about prosecuting members of the Society for conspiracy, but he would take it upon himself to say that no such action could be sustained. It was then resolved to appoint a Com-

A member suggested that the entire Society form itself into a Committee, such as had been recommended. The proposition did not seem to meet with general favor, and was not brought before

the regular customers were served, and a noticable feature was that the customers were all supplied with tickets. Tester-day evening, John Tiernan, who resides in the vicinity of Hardscrabble, was disrested him. Upon searching him, one hundred tickets were found in his pockets; He was locked up, and will probably have a hearing this morning. It is alledged that the tickets were diven to Tlarnan by a little boy and that given to Tiernan by a little boy and that he intended to return them to the owner. He was a little too slow about th matter however, and will now be under the necesity of showing how he came in possession of the stolen property.

They consulted with the Committee having in charge the erection of the Work House and the result was a visit to the institution terday by the Prison Board and the Committee for this purpose. The party spent several hours in an examination of the opinion that with a little extra work the convicts might be accommodated, without any inconvenience, in a style much better than they are now enjoying. None of the cells of the building, although completed are yet ready for occupancy, on account of the dampness of the mortar, but there is however a large the mortar, but there is nowever a large room, about fifty feet square, in the east-ern end of the building connected with the female department, which will be completed and ready for occupancy in a few days. It was decided to have this room provided with bunks and fitted up temporarily as a sleeping apartment, which, owing to its size, ven-tilation, &c., seems admirably adapted for the purpose. It can be secured so as to the purpose. It can be secured so as to prevent the escape of any of the inmates, or their communication with any other part of the building, except when working under the supervision of the Superintendent. For the cooking arangements a temporary frame building I be constructed, large enough for a kitchen and dining hall, which can be ompleted and properly fitted up in a lew days. The food will be brought

from the city as required.

It is designed to make the men useful in excavating and grading off the ground around the house, a large portian of which has to be put in order and levelled previous to the building of the wall. This work would require a number of laborers, and occupy a considerable time and expense which it is thought can all be saved by the plan proposed. Their removal from the jail will also be a saving of several thousand dollars to the county, as the materials of their cells can be used as stated, while if not consumed in this manner it would prove a total loss. Every care will be taken in their treatment, and they will undoubt-edly find the nature of the care far better than they could in the house on the hill. The contractors were notified to make the arrangements immediately and have everything ready for the reception of the prisoners on the lat of August, when

they will be removed.

Wanted a Ring. Yesterday morning John Lincoln, a jeweler on Wylie street, came to the Mayor's office and made information quite a respectable looking young man, came to his store and asked to see some ood rings. The rings were shown him, nd he selected one valued at twelve dollars, and requested the jeweler to allow him to take it home to show it to his mother, and if it suited he would bring him the money, if not, he would return the ring. Lincoln demurred for a time, the ring. Lincoin denutred for a time, but being anxious to make a sale and presuming on the honest appearance of the young man, inally consented, and Barry left with the ring. After waiting patiently for over an hour, the jeweller became unsured and started out in search of his ring. say and started out in search of his ring, which he failed to find. He, however, succeeded in finding Barry, who, on being reminded of his promise to restore the ring or the money, stated that he had lost it in a cellar, and agreed to accompany Mr. Lincoln to the cellar to search for it. The cellar was visited but the ring was not found, whereupon the jeweller repaired to the Mayor's office and made the information as stated. Barry was arrested and taken to the lock-up, where he remains awaiting a hearing.

Disappointed His Landlady. Disappointment is the lot of all, but coming in the manner it did to Mrs. Mary Parrot yesterday it is especially grievous. Mrs. Parrot is proprietress of a boarding house in the Third ward, and for several weeks has entertained a youthful boarder, John Irwin, until his bill amounted to transfer documents. Sometime during Thursday night, or Friday merning, the Country Milk Depot, at the corner of Fourth avenue and Ross streets, was entered by burglars, and milk tickets representing over \$.00 stolen. The demand for milk yesterday was unusally large, so that the supply was exhausted before one half terday was unusally large, so that the aupply was exhausted before one half the regular customers were served, and a revealed the fact that he still existed in another part of town, but was rapidly preparing for an exit from the municiin the vicinity of Hardsorabble, was discovered with a number of milk tickets in his posession, and officer Dressler arrested him. The applier of trusses in a community as densely populated as that of Pittsburgh, is as much entitled to adequate encouragement as in one out of every six of the male population are confident of the male population are confide out of every SEX OF the male popula-tion are so afflicted, no words of warning can be too forcibly, urged nor too fre-quently reiterated. People do not al-ways suffer from rupture of the bowels through open neglect, but often from want of knowledge, where, and from whom, to seek the proper remedy. There are hundreds of persons who from infancy to boyhood and even manhood, defer attention in this respect for want of a proper appreciation of the se-riousness of the malady of which we riousness of the malady of which we write. Dr. Kryser, at his great medicine store and office, No. 167 Liberty street, has qualified himself in a notable and praiseworthy degree, to meet every and praiseworthy degree, to meet every indication of hernia, besides any kind of business with which we are acquainted, especially when the immunity from danger, and the accurity to personal eafety is afforded at a comparatively trifling cost. No branch of business is entitled, at our hands, to a higher regard than that which affects human life and health; and when we look around us, and note the fact that vast number of other abnormal conditions which appear to be, and perhaps are, strictly mechanical as in regard to the means to be used for their alleviation or cure. Rupture is one of these conditions, and one which entitles him to more than an ordinary share of public patronage as well because of his extraordinary ability as because of the extra advertising

which insures their publicity.

Car Brake and Starter. Irvings Car Brake and Starter is designed to work a great change in the handling of street cars, where ever introduced. The invention consists of a simple arrangement of two drams, a strong spring, and a chain connected with the all underneath the car and conaxles, all underneath the car and controlled by a brake on the platform which can be operated by a child.

When the car is to be stopped, the brake is applied, when the momenten, acquired in moving forward immediately winds the chain upon one of the drums containing the spring, and the vehicle is stopped within the length o

tself. Upon starting, the brake is loosed, when the spring recoils with sufficent force to start the car foaward without the aid of the horses, even though it be filled to overflowing with passengers. Thus all strain upon the horses in starting a heavy load is obviated which is the desideratum among managers of Street Railways. It is well known that the greatest wear of the animals consist just in this point, and an invention that does away with the difficulty, com mends itself to every company on the score of humanity as well as economy.

The invention was tried a few days ago, in the presence of a number of par-ties interested, and found to work like a charm. The car was loaded to its ut most capacity, but was moved forward by the spring with greater smoothness and ease than by the horses, and con-vinced every speciator of its great utility and success. It should be and will doubtless soon become general upon our

street railways. His Deserts at Last. About three months ago John Allison was arrested in a house of ill-fame, in Allegheny, and committed to jail by charging John Barry with obtaining Mayor Drum. While on the way to that goods under false pretences. He alleges that during the morning Barry, who is liceman and made his escape. Since then he managed to keep out of the way until yesterday afternoon, when officer Jerry Smith, of the Allegheny police, saw him entering the circus in the Dia mond, in company with two females. The policeman immediately cut short Allison's amusement and transported him to a different scene before the Mayor He was about to be sent over when the emales made their appearance and interceded for a short respite until they could secure the amount of the fine, in default of which he had been sent to jail. Their entreaties were favorably considered and they departed on their mission. The had not returned last evening, but Alli son may consider his release certain. Might as well use the old tramway of scooped wooden rails as our steel tracks; the old hand press for the swift gliding four cylinder; the water course for the great motive power of steam, as to now employ in fam ilies the simple sewing machine which can perform no work outside of that embraced in ordinary plain stitching or basting together. We must go forward with the times. It is from this reasoning that the great American Button-Hole, Overseaming and Family Sewing Machine is so popular with the people. It not only accomplishes all the ordinary work of the family sewing machine but does ten fold more. It hems, tucks, binds, braids, sews on and over, work button holes, over seams and in short does as much and in as good and durable manner as though it were possessed with brains, and were guided by human men prains, and were guided by human impulse. It is the grand machine of the hour, and if its merits were fully known to the public, few other machines would have any sale whatever. Wherever tried it has afforded satisfaction and in this community alone although by the this community alone, although but new ly introduced, it has attained a popularity econd to no other machine in the mar ket.
