

The Pittsburgh Gazette

Agricultural Report for June. The effect of the incessant rain-fall upon the leading crops of the country is disclosed in the Commissioner's Report, as follows:

It will be seen that rain in June of this year has been in excess of the fall of 1868, in all the States except Florida, and on the Atlantic coast between Washington and New York City, and to a slight degree in Rhode Island, New Hampshire and Minnesota. The greatest disparity has existed in the wheat belt between Missouri and the Mississippi, Illinois, Iowa, Nebraska, Kansas and Missouri average a rain-fall of 7.20 inches against 3.54 of June last year. The temperature has also been lower by 3 degrees in the South the temperature has not been reduced, though there was more than the usual quantity of rain.

The effect upon winter grain of so much moisture in the opening season has been to give an almost unprecedented growth of straw and an appearance of vigor quite remarkable; at the same time a general exemption from insects has been observed, and a good development of a silage on the head, which, with the increased average, might be expected to produce a harvest of extraordinary magnitude. To this calculation, however, there are some drawbacks. First, the wheat has been injured by the rains, and has been quite severe in parts of California, and may yet prove disastrous to the Spring-sown grain. There will be complaint of a light yield of grain in the wheat belt, there are already reports of injury, by sprouting in the shock, in Missouri, Tennessee and in Southern Illinois, which should wet weather continue, may greatly reduce the value of the crop. It is scarcely possible, however, that any or all these causes can so reduce the crop as to cause a scarcity; and it may be assumed to be the third full crop, following three seasons of comparative scarcity. An abundance of flour at moderate prices may be expected, with a good surplus for export.

The season has been very unfavorable for the corn crop in almost every State. In the early spring, cold weather and wet soil, threatening to rot the seed as fast as planted, delayed the season of planting. Then large areas were replanted, and the corn was sown in unfavorable conditions, and the stand has therefore been poor and the growth stunted and feeble, in northern latitudes, until late in June, since which time a great improvement has resulted. In many sections there are more weeds than corn, while much is still overgrown, making it impossible to cultivate the crop. Worms have proved destructive in some places. Altogether the yield is quite unfavorable for a good crop of corn, though there is yet time, under favorable circumstances, for great amelioration. The acreage is somewhat less than last year in the States of New York, Michigan, Indiana, Illinois, and in some of the Eastern States. The decrease in Illinois amounts to 150,000 acres. There has been an increase of the Mississippi, and in some of the more Eastern States, sufficient to give a total acreage equal to last year.

The feebleness and stunted condition of the cotton plant in May and early in June are yielding to the bright sun and general showers of the progressing season, which are rapidly repairing all damages, except the lack of a perfect "stand." Fears are expressed in a few localities that there will be more than half a crop. On the other hand, the general report is far more encouraging. Along the Atlantic coast large quantities of fertilizers have been used, great care exercised in the selection of seed, better implements employed, while the laborers are more faithful and reliable. The total acre planted is about fifteen per cent. greater than last year, increasing the average to fully \$1,000,000 worth of cotton. Virginia, Kentucky and Missouri report a slight decline in acreage, while the increase is given as follows: North Carolina, ten per cent.; South Carolina, nine per cent.; Georgia, eighteen per cent.; Florida, twenty-five per cent.; Alabama, eight per cent.; Mississippi, fourteen per cent.; Louisiana, sixteen per cent.; Texas, thirty-two per cent.; Arkansas, twelve per cent.

Hay will be abundant, but of comparatively poor quality, being rank in growth, and to some extent injured in curing. Potatoes have been largely planted, and generally promise well, except where injured by the wet weather, though apprehensions of potato disease are prevalent, and the bug is doing some damage.

Vegetable Preservation for Marsh Fever.

Persons who are condemned to live in the fens of Lincolnshire may be glad to learn that a simple method has been discovered of neutralizing the deleterious influence of marshy exhalations. Monsieur Martin, in a paper presented by him to the Societe Therapeutique de France, affirms that this desirable result may be obtained by the cultivation on a large scale of the sunflower (Helianthus annuus). The experiment has been tried with great success in the fen districts near Rochester, and the Dutch, who by the peculiar nature of their country have every opportunity of studying such phenomena, and must be looked upon as high authorities upon the subject, have a firm faith in this specific. It is asserted that in places where the scourge of the country has totally disappeared from every district in which a fair trial has been given to it. The fact appears to be proved, but the scientific question whether the sunflower acts on the atmosphere merely like any other plant of rapid growth by the production of oxygen, or whether, like the confere, it emits odors, and thus destroys the germs, animal and vegetable, generally supposed to constitute the miasma which produce fever when present in the atmosphere in large quantities.

An Iowa Captain gave the following commands just after leaving Big Shanty: "Boys! I've got to fall back in the rear for a half an hour, and I don't want any of you to forget the strict orders against foraging. So, although there is a big pile of sweet potatoes and a half dozen hives about a half mile ahead, yet I shall expect to see every man in this place when I come back in not less than three quarters of an hour from now." When he came back every man was in his place, hiding his smiles behind a huge potato or a great all he cared to eat. The captain had all he cared to eat. The captain had all he cared to eat. The captain had all he cared to eat.

CLIPPINGS.

The humidity of the atmosphere, it is reported, has been increased on the isthmus of Suez since the introduction of the waters of the Mediterranean Sea into the lakes. Fogs as dense as those of Paris have been observed in districts where heretofore rain has hardly ever fallen.

The Providence Journal says that Alexander Stephens' interminable letters announcing his withdrawal from public affairs, remind one of the record found in the closet of an old toper in Greenwich, whose many excellent resolutions were followed by a corresponding practice and reform. On the door, plainly marked in chalk, was recorded, "February 25, left off drinking," and then, "February 26, left off again."

A GENTLEMAN from the vicinity of York, Pa., informed us that so great has been the scarcity of rain in that locality that the corn is very much back, and presents a dry and shriveled appearance. In York county, and within six or seven miles of Harrisburg, we have another almost rainless district, so great is the drought in that section that springs, which have not failed for a period of fifty years, are dry. While some regions are suffering from too much, others are suffering from its absence.

The ball of Griffin, the engineer of the freight train, to whose carelessness the West Hope railroad disaster is attributed, has been fined at \$10,000. He is still in jail at Millersburg, Pa. The Delaware House are rapidly gaining, and will return home in a few days. There are only three of them remaining, one of whom, Carl Baer, the German lad, has sent for his mother and brother in Prussia to come over to this country. The claim for damages for his father's death has not yet been settled.

It is one of the curiosities of Rhode Island industry says the Providence Journal, that it is now produced in quantities to be manufactured in other States. Two thousand tons of this ore have been sent to a single furnace in Pennsylvania within eighteen months, at a cost to the purchasers of \$1,000,000. The ore is worth half a dollar a ton. The addition of fifteen per cent. of the Cumberland ore to the other ores used by the Pennsylvania company has been found to increase the value of their pig iron two dollars a ton.

The bill for the punishment of seduction, recently before the Canadian Parliament, provides that the seduction under promise of marriage of a chaste unmarried woman shall be punished by imprisonment for two years, but no conviction shall be had, in any case, "on the testimony of the woman seduced, unsupported by other evidence, nor unless the indictment is found within two years after the offence." The object of refusing to receive the woman's testimony as conclusive, is to prevent the innumerable cases of prosecution, by designing women, for sinister and mercenary purposes.

The fine flocks going to the Suez Canal opening take along with them other Parisian luxuries besides the striped silken tents. There is the portable fresh butter churn, made out of cut crystal and mounted on silver feet. It is provided with a silver rod which revolves swiftly in the cream and presents a pat of butter every three minutes. The fruit refrigerator is made of plate glass and mounted on a low in the center of it for raspberries, for instance; all around them rises a wall of artificial ice; the fruit is covered with some chemical preparation which adds flavor and congenial after a rotary turn or two the raspberries are frosted.

A New Orleans jeweler has succeeded in making a very peculiar brooch and ear-rings for one of the Southern belles. In the brooch—and the ear-rings are similar, but smaller—there are five leaves, the two upper ones being of cut crystal and the other three of emerald, while the three lower ones are of frosted gold, delicately veined around the centre with black enamel. In the center is a diamond, and in a raised setting, which presents the appearance of a sparkling dew-drop which a zephyr might kiss away. Each piece is described as a gem in itself, and so nearly resembles the real thing that the counterfeiter pretends that placed in a garden it might deceive the most learned botanist.

There is no foundation for the story that Ex-Minister John Bigelow has been offered a large interest in the Times, and a salary of ten thousand annually. He will accept the editorial management of the paper, and, furthermore, that he is holding the offer under advisement. The other statements that George W. Curtis, or that or that he had accepted a vacant chair, are equally unfounded. Soon after Mr. Raymond's death, Mr. Jones, Wm. Raymond and the other proprietors of the Times, who are few in number, and who are all old men, in consultation, and decided to retain the paper under its present management until Mr. Raymond's oldest son, now about graduating from Yale, has obtained the necessary education to assume the father's position. No outsider is to be admitted to overshadow this son when he comes to take the reins that have dropped from his father's hands. Mr. S. Conant will continue as heretofore editorial manager of the Times.

A correspondent of Blake's Galassien Bulletin writes from De Witt county, Texas: "Again is this and the adjoining counties thrown into a wild state of excitement by the appearance in day time and the sound at night of large bodies of armed men riding to and fro. At last that party beyond which it is said forbearance ceases to be a virtue has been reached, and our oldest and best citizens have drawn the sword and the scabbard away, and say they will not desert until our country is purged of the thieves and desperadoes who have so long been preying upon their stock. The real wealth of our Western country had become common property, regularly organized gangs of horse thieves were quartered upon us, one-half the beaver raised upon our prairie were stolen, it was our citizens appealed to the law, justice was always at hand to prove an alibi or swear them clear. Gradually have things been drawing to a focus. Simultaneously almost have the people risen in the surrounding counties and day by day reckoning has come. Horrible as this state of affairs is, there was no alternative, and the war of extermination has commenced, and from the cool, determined character of the leaders, I imagine will not cease until these pests of society have been rooted out. On the 2d inst., two noted characters, Jim Bell and Bill Morrell, were shot on the Colletto, in the lower part of De Witt county. Many rumors are afloat of others in different directions being killed, but, owing to the dread existing men, say but little."

INSURANCE.

THE MOST SUCCESSFUL

LIFE INSURANCE COMPANY

OF THE WORLD.

THE NATIONAL

LIFE INSURANCE COMPANY.

OF THE

UNITED STATES OF AMERICA.

Chartered by Special Act of Congress.

Cash Capital - - - \$1,000,000.

Branch Office, PHILADELPHIA.

OFFICERS.

CLARENCE CLARK, Philadelphia, President. JAY COOKE, Philadelphia, Chairman Finance and Executive Committee. HENRY D. COOKE, Washington, Vice President. EMBROW W. PEET, Philadelphia, Secretary and Actuary. FRANCIS G. SMITH, M. D., Philadelphia, Medical Director.

This Company issued, in the first TEN MONTHS of its existence,

5,395 POLICIES,

INSURING

\$15,142,800.

This Company offers to its Policy-Holders

PERFECT SECURITY

By its Cash paid up Capital of One Million Dollars, and guarantees to the insured, by its

LOW RATES OF PREMIUM,

LARGE DIVIDENDS IN ADVANCE.

On a Reversionary Dividend of 100 per cent. by its

RETURN PREMIUM PLAN.

GENERAL AGENTS.

E. W. CLARK & CO., Bankers, No. 35 South Third Street, Philadelphia, General Agents for Pennsylvania and Southern New Jersey. E. S. HESSLIFF, Manager.

IRA B. McVAY & Co., Agents for Allegheny, Beaver, Butler, Mercer and Washington counties.

LOCAL AGENTS ARE WANTED in every City and Town, and applications from competent parties for such agencies with suitable references, should be addressed to THE NATIONAL LIFE INSURANCE COMPANY, in their respective districts.

NOTICES.

CITY TAXES, 1869.

In accordance with Section 6th, Page 268 of City Charter.

NOTICE IS HEREBY GIVEN

TO THE

CITIZENS OF PITTSBURGH.

That the assessments for 1869 of City, City Building, Special, Poor, Business, City School and Ward School Taxes and City Water Rent have been returned to me for collection. The above taxes are subject to a DISCOUNT OF FIVE PER CENTUM if paid on or before the

First Day of August,

and TWO PERCENTUM if paid between the

FIRST DAY OF AUGUST

AND THE

FIFTEENTH DAY OF SEPTEMBER.

After no deduction will be allowed on taxes paid between September, fifteenth and October first, and an addition of five per centum will be made to all taxes unpaid on November first, and an additional five per centum will be added to all taxes remaining unpaid on November first.

A. J. COCHRAN,

CITY TREASURER, 4th Avenue, Pittsburgh, July 26, 1869.

WALL PAPERS.

WALL PAPER

AND

WINDOW SHADES,

OF

New and Handsome Designs,

NOW OPENING AT

No. 107 Market Street

(NEAR FIFTH AVENUE.)

Embracing a large and carefully selected stock of the newest designs from the FINEST STAMPS SOLD TO THE CHEAPEST ARTISTS known to the trade. All of which we offer at prices that will buy buyers to examine.

JOS. R. HUGHES & BRO.

MERCHANT TAILOR,

No. 83 Smithfield Street, Pittsburgh.

NEW SPRING GOODS.

A splendid new stock of

CLOTHS, CASSIMERES, &c.,

Just received by HENRY MEYER,

201 Merchant Alley, 78 Smithfield Street.

SPECIAL NOTICES.

BOHENCK'S PULMONIC

MANDRAKE PILLS will cure Consumption, Liver Complaint and Syphilis. It acts according to directions. They are all three to be taken at the same time. The disease first attacks the liver and is not to be taken until the blood is purified. The disease first attacks the blood; the patient begins to grow thin; the disease matter rises into the lungs, and the patient begins to cough and spit up blood. This is the only way to cure consumption.

To these three medicines Dr. A. H. Schenck, of Philadelphia, owes his unrivaled success in the treatment of pulmonary consumption. The Pulmonic Syrup restores the morbid matter in the lungs, causes it to flow by a daily expectoration, for when the phlegm or matter is ripe a slight cough will throw it off, and the patient has rest and the lungs begin to heal.

To do this, the sweetened Tonic and Mandrake Pills must be freely used to cleanse the stomach and liver, so that the Pulmonic Syrup and the Schenck's Mandrake Pills, set upon the liver, removing all obstructions, relax the organs of the gall bladder, the bile starts freely, and the liver fulfills its duty. The stomach will then take the cephalic and tonic when it is given, and the patient will be able to eat with great care. This will give the patient a healthy and vigorous condition of the liver the Schenck's Mandrake Pills.

Liver Complaint is the most prominent cause of Consumption. Schenck's Tonic is a gentle stimulant and alterative, and the alkaline in the Seaweed, Tonic and Syrup, acts upon the stomach to throw out the gastric juice to dissolve and carry off the morbid matter. It is a tonic to good blood without fermentation or souring in the stomach. Schenck's Tonic is a gentle stimulant and alterative, and the alkaline in the Seaweed, Tonic and Syrup, acts upon the stomach to throw out the gastric juice to dissolve and carry off the morbid matter. It is a tonic to good blood without fermentation or souring in the stomach.

The great reason why physicians do not cure Consumption is that they do not give medicine to stop the cough, to stop the spitting, to stop the blood, to stop the fever, to stop the night sweats, to stop the loss of appetite, to stop the whole digestive power of the stomach, and eventually the patient dies. Schenck's Tonic, does not try to stop the cough, it does not try to stop the spitting, it does not try to stop the blood, it does not try to stop the fever, it does not try to stop the night sweats, it does not try to stop the loss of appetite, it does not try to stop the whole digestive power of the stomach, and eventually the patient dies.

Dr. Schenck, who has employed unintermittedly for many years the Tonic and Syrup, and the Schenck's Mandrake Pills, has pronounced his case hopeless. He has tried every medicine, but he has not been able to cure his case. He has tried every medicine, but he has not been able to cure his case. He has tried every medicine, but he has not been able to cure his case.

ORDINANCES.

AN ORDINANCE

To Authorize the Construction of a Lateral Sewer on North Avenue.

SECTION 1. Be it ordained and enacted by the Select and Common Councils of the City of Allegheny, and it is hereby ordered and directed by the authority of the same, that the Sewer Commission be and they are hereby authorized and directed to locate, lay out and construct a lateral sewer, from Middle Alley to Webster Street, from Webster Street to Main Street, and to contract therefor with the lowest and best bidder at public auction.

SECTION 2. That as soon as the cost and expenses of said sewer shall be fully ascertained, the same shall be levied, assessed and collected as provided for by an Act of Assembly of the Commonwealth of Pennsylvania, entitled "An Act to supplement of the fourth section of an Act, entitled 'An Act relating to Allegheny City,' approved March 24, A. D. 1869."

SECTION 3. That as soon as the cost and expenses of said sewer shall be fully ascertained, the same shall be levied, assessed and collected as provided for by an Act of Assembly of the Commonwealth of Pennsylvania, entitled "An Act to supplement of the fourth section of an Act, entitled 'An Act relating to Allegheny City,' approved March 24, A. D. 1869."

SECTION 4. That as soon as the cost and expenses of said sewer shall be fully ascertained, the same shall be levied, assessed and collected as provided for by an Act of Assembly of the Commonwealth of Pennsylvania, entitled "An Act to supplement of the fourth section of an Act, entitled 'An Act relating to Allegheny City,' approved March 24, A. D. 1869."

SECTION 5. That as soon as the cost and expenses of said sewer shall be fully ascertained, the same shall be levied, assessed and collected as provided for by an Act of Assembly of the Commonwealth of Pennsylvania, entitled "An Act to supplement of the fourth section of an Act, entitled 'An Act relating to Allegheny City,' approved March 24, A. D. 1869."

SECTION 6. That as soon as the cost and expenses of said sewer shall be fully ascertained, the same shall be levied, assessed and collected as provided for by an Act of Assembly of the Commonwealth of Pennsylvania, entitled "An Act to supplement of the fourth section of an Act, entitled 'An Act relating to Allegheny City,' approved March 24, A. D. 1869."

SECTION 7. That as soon as the cost and expenses of said sewer shall be fully ascertained, the same shall be levied, assessed and collected as provided for by an Act of Assembly of the Commonwealth of Pennsylvania, entitled "An Act to supplement of the fourth section of an Act, entitled 'An Act relating to Allegheny City,' approved March 24, A. D. 1869."

SECTION 8. That as soon as the cost and expenses of said sewer shall be fully ascertained, the same shall be levied, assessed and collected as provided for by an Act of Assembly of the Commonwealth of Pennsylvania, entitled "An Act to supplement of the fourth section of an Act, entitled 'An Act relating to Allegheny City,' approved March 24, A. D. 1869."

SECTION 9. That as soon as the cost and expenses of said sewer shall be fully ascertained, the same shall be levied, assessed and collected as provided for by an Act of Assembly of the Commonwealth of Pennsylvania, entitled "An Act to supplement of the fourth section of an Act, entitled 'An Act relating to Allegheny City,' approved March 24, A. D. 1869."

SECTION 10. That as soon as the cost and expenses of said sewer shall be fully ascertained, the same shall be levied, assessed and collected as provided for by an Act of Assembly of the Commonwealth of Pennsylvania, entitled "An Act to supplement of the fourth section of an Act, entitled 'An Act relating to Allegheny City,' approved March 24, A. D. 1869."

SECTION 11. That as soon as the cost and expenses of said sewer shall be fully ascertained, the same shall be levied, assessed and collected as provided for by an Act of Assembly of the Commonwealth of Pennsylvania, entitled "An Act to supplement of the fourth section of an Act, entitled 'An Act relating to Allegheny City,' approved March 24, A. D. 1869."

SECTION 12. That as soon as the cost and expenses of said sewer shall be fully ascertained, the same shall be levied, assessed and collected as provided for by an Act of Assembly of the Commonwealth of Pennsylvania, entitled "An Act to supplement of the fourth section of an Act, entitled 'An Act relating to Allegheny City,' approved March 24, A. D. 1869."

SECTION 13. That as soon as the cost and expenses of said sewer shall be fully ascertained, the same shall be levied, assessed and collected as provided for by an Act of Assembly of the Commonwealth of Pennsylvania, entitled "An Act to supplement of the fourth section of an Act, entitled 'An Act relating to Allegheny City,' approved March 24, A. D. 1869."

SECTION 14. That as soon as the cost and expenses of said sewer shall be fully ascertained, the same shall be levied, assessed and collected as provided for by an Act of Assembly of the Commonwealth of Pennsylvania, entitled "An Act to supplement of the fourth section of an Act, entitled 'An Act relating to Allegheny City,' approved March 24, A. D. 1869."

SECTION 15. That as soon as the cost and expenses of said sewer shall be fully ascertained, the same shall be levied, assessed and collected as provided for by an Act of Assembly of the Commonwealth of Pennsylvania, entitled "An Act to supplement of the fourth section of an Act, entitled 'An Act relating to Allegheny City,' approved March 24, A. D. 1869."

SECTION 16. That as soon as the cost and expenses of said sewer shall be fully ascertained, the same shall be levied, assessed and collected as provided for by an Act of Assembly of the Commonwealth of Pennsylvania, entitled "An Act to supplement of the fourth section of an Act, entitled 'An Act relating to Allegheny City,' approved March 24, A. D. 1869."

SECTION 17. That as soon as the cost and expenses of said sewer shall be fully ascertained, the same shall be levied, assessed and collected as provided for by an Act of Assembly of the Commonwealth of Pennsylvania, entitled "An Act to supplement of the fourth section of an Act, entitled 'An Act relating to Allegheny City,' approved March 24, A. D. 1869."

SECTION 18. That as soon as the cost and expenses of said sewer shall be fully ascertained, the same shall be levied, assessed and collected as provided for by an Act of Assembly of the Commonwealth of Pennsylvania, entitled "An Act to supplement of the fourth section of an Act, entitled 'An Act relating to Allegheny City,' approved March 24, A. D. 1869."
