Thursday, ... August 2..... Monday, Wednesday,

1,853 The market since the date of our last report has been very dull, the sales in the aggregate having been compara-tively, light, and compared with last week, prices are from a quarter to a half cent lower. The great proportion of the cattle offering thus far this week, have been of the lower grades, the supply of prime shipping steers being unusually light and there are but your far light, and there are but very few buyers here for the former grade of stock. While it is true, that all kinds of stock are lower, yet it is also true that the better grades of stock are bringing relabetter prices than common and inferior. Last week, prime shipping steers sold at 73/@8, with some extra at a fraction more; this week, this same class of stock caunot be quoted above 71/2071, and some of the Philadelphia buyers averred that if they could not buy good fat cattle at about seven cents, that they would buy none at all. We are cogni-zant of a New York buyer, however, who paid 7½, and this, we pre-sume, may be regarded as the top of the market. For the commoner grades, however, there seemed to be no demand, and with the pens almost full of this kind of trash, it is difficult to conjecture what the owners will do, unless they ship further east, and we are informed, that the Eastern markets are formed, that the Eastern markets are fully as hard for this kind of stock as
