The Second story of Wilkins Hall has been secured as an armory for the Duquesne Greys.

Yesterday morning Mayor Brush committed thirteen vagrants and drunks to jail. Business is looking up.

Gas Lamps have been erected in the Allegheny Park, along the main walks, and are lighted every evening.

Mayor Drum had two drunks and one vagrant before him, yesterday morning, which he disposed of in the usual way-sending to jail.

Yesterday the Adjutant General of the State forwarded fifty commissions for officers of Pennsylvania militia in vari-Ous sections of the Commonwealth

A libel was also filed against eighteen barrels of whisky and other property owned by Daniel Mingis, of Muncy Dun, Lycoming county, for alleged violations of the revenue laws.

Patent Microscope,-James H. Logan Esq. of Allegheny city, has just secured letters patent on 's microscope which is said to rival the very best now in use and yet is so simple as to be within the reach of all; costing a more trifle. We congratulate our friend on the success of his invention. his invention.

"The Daily Times" is the tille of a new venture in journalism, which has just made its appearance in Allegheny. The little abeet, according to the publishers' announcement, will be issued just as long as they are contented with the ent, and they promise no continuance.

Abusive Language.-Ellen Lammon. entered the residence of Catharine Kneeland, yesterday, and considerably dis-turbed the equanimity of that lady by vile and abusive language, for which Alderman MoMaster arrested and com-mitted her to jail for trial on an informa-for surety of the peace.

Gave Bail .-- A hearing was had before Mayor Brush, yesterday morning, in the case of John Henry, charged with forgering Gen- Rowley's name to a check, which resulted in the accused be-ing required to first beild for the secure being required to give bail for trial. He gave the required security, and was re-

College Elections.—The Board of Trus-tees, of Washington and Jefferson College, held a meeting Wednesday evening sud elected the Rev. Dr. Bittin-ger, of Sewickley, President of the College. Another meeting was held yea-terday morning, when Gen. Geo W. Cock, of Steubenville, Wm. Lyons, Esq. of for trial. of Fittaburgh, and D. S. Wilson, Esq., of Washington, were elected Trustees.

the boat race will come off on the course as originally selected, according to the as originally selected, according to the articles of agreement. The efforts to have it changed to the Logan's eddy course have been unsuccessful, and the specu'ators are defeated in their nicely laid plans. "The best laid plans o' mice and men aft gang sgies." It seems the principals neither favored the change at any time, and the movement was wholly an outside one.

to press the hours pleasantly by correct-ing his wife Mary. Mary could see no good reason for allowing Peter to amuse himself in this manner, and failing to convince him of the impropriety of his course, she appealed to Alderman Bol-ster. The official settled Peter by ar-resting and requiring him to give ball to keep the peace hereafter toward Mary.

What it Cost Him .-- Wm. Moore was

before Mayor Brush, yesterday morn-ing, charged with resisting and abusing an officer. The officer had attempted to arrest William who was druck and disorderly on Penn street. William didn't orderly on Penn street. William didn't want to be arrested and endeavored to ascape by fighting the officer. He was compelied to go, however, and when sobered was brought before His Honor. The dittle episode cost William \$25. Rowdies and roughs will learn, after while, that it don't pay to abuse an offi-cor. cer.

Taken Home.—Yesterday an officer ar-rived from Altoona, having in charge Beales and Duke, the incendiaries, sen-tenced to the Western Penitentiary, Beales for ten years and Duke for five years and six months. The prisoners were accommodated with lodgings in the institution. Beale was convicted on a charge of setting fire to the lumber yard charge of setting fire to the lumber yard of D. & C. Moore, and also convic ed of setting fire, in connection with Duke, to the stable of Mr, D. Lowther, They were tried in the Criminal Court of Blair county last week, but the fire oc-

curred several months ago.

Dangerous Amusements .-- The boys of Dangerous Amusements.—The boys of Haffield and the upper part of Lawrence-ville, for a number of days past, have amused themselves by "stone fights," much to the inconvenience and annoy-ance of persons passing in the vicinity. Several persons have already been in-jured by flying missiles, but the boys, notwithstanding every expostulation, continue the practice. Yesterday several of them were brought before the Mayor, who imposed upon each a fine, and repwho imposed upon each a fine, and rep-rimanded them for their reprehensible conduct. If again arrested the punishment will be much more severe

Pashed Off a Car.-Conrad Roberns appeared before Alderman Thomas, yes-terday, and made information for aggra-vated assault and battery against Ed-ward Osbern. Osborn is a conductor on the Citizans Bessence. Mailman Self. the Citizens Passenger Railway. Ro erns alleges he was returning from a pic-nic at fron City Park, on Monday, and was riding on the car when Osborn, and was rating on the car when Osborn, without cause, quarreled with and pushed him off the car. He fell across the track and was so seriously injured as to be compelled to keep his bed for two days. The accused was arrested and committed

THE GREAT ECLIPSE. Its Extent and Scientific Value-Pho-

a large extent of territory, the total

phase extending over a belt of about one hundred and fifty-six miles in breadth, and stretching very nearly half way around the globe, or about 12,100 miles The area of the belt of total eclipse will, therefore, be in the neighborhood of 2,000,000 Equare miles.

So important an eclipse is very rare. There has been no total eclipse visible in the United States since the year 1834, and none will be visible during the present century after this year. The event will, therefore, be witnessed with great interest by astronomers, and extensive preparations are made for observing it under the most favorable circumstances. Most of our professional astronomers will take position at different points slong the path of the umbra (the total elipse), and many thousands of smateurs will witness the interesting phenomena with more or less of intelligence, but with an absorbing interest in every case. PHENOMENA OF ECLIPSES.

Thestrangeness of the appearance of

The strangeness of the appearance of things on the earth's surface during the eclipse will vary widely with the place of observation. In places where the atmos-phere is overcast there will be no percep-tible difference, except an undefinable rawness, or chilliness, in the air, and nothing to note the time whon the sun is shut out from the sight of more privi. Where clouds obscure the vision they are generally rain clouds, and the rain is usually of a drizzly char-acter; it seldom falls in large drops. In places where the sky is clear, the air may be expected to cool off somewhat

may be expected to cool off somewhat previous to the observed time of contact, and the animals show their premoni-tion of the unusual event by various strange motions. During the totality of the eclipse fowls have been observed to go to roost, and birds of the air to fall to the earth as if struck by a stone, donbt-less from fright at the sudden change; while bases have been be prefectly panwhile beasts have become perfectly pan-ic stricken, and manifested the most ab-

io stricken, and manifested the most ab-ject terror. In places where the eclipse is total (and visible) the sky will grow gradual-ly dark, and surrounding objects become invested with a weird black or copper color, and the moon's edge will be marked by a pale circlet, which was formerly thought to be due to the pas-sess of the solar rays through her at

HOPES OF THE ASTRONOMERS. Astronomers will look with much anxiety for other worlds, as yet unseen by mortal vision. It was announced some ten years ago that certain observed chanten years ago that certain observed chau-ges in the position of the orbit of Merca-ry were probably due to the attraction of a number of smaller bodies revolving in an orbit between him and the sun. A Wanderer.

Yesterday afternoon one of the Mayor's police brought to the lock-up a woman about forty five years of age, who gave her name as Mrs. Frank Anderson. She said Cincinnati was her home, which she had left ten days ago. She had no

friends or acquaintances in this city, and could not explain the object of her visit ere. Upon further conversation It besme evident that the woman was demented, and she was accordingly locked ip for future disposition. It is probable she will be sent back to Cincinnati.

Malicious Boy.

Thomas Ferry was before Mayor Brush yesterday, for malicious conduct. The boy was employed as a "paster and folder" in the *Dispatch* office, and every evening was furnished with wrappers in which it was his duty to enclose the papers to be sent away. Instead of dopapers to be sent away. Instead of do-ing this, however it seems he has been accestomed to shirk his labor by tearing up the wrappers, and throwing them away. It was several days before the away. It was several days before the fact became known, which only came to light through the complants of subscri-bers at not receiving their papers. The boy was locked up for several hours, and then dismissed with a severe reprimand from the Mayor.

driving along a crowded thoroughfare at a Dexter like rate of speed, without in-juring pedestrians. A couple of festive youths tried this yesterday afternoon, but failed hamentably. They succeeded, however, in getting themselvos in the lock up, from which they were only re-leased by the payment of a fine of ten iollars each. That entertainment was decidedly expensive.
