she had become incorrigible.

Precarious.-The man Hadfield, who was so seriously burned at the Fort Pitt Works, Thursday evening, was lying at his residence in Allegheny last evening in a critical condition. He was very flighty and seemed to be suffering intense pain. The physicians in attendance have no hope of his recovery.

A Novel Idea.—A very remarkable document is about being issued in pamphlet form, the idea of which is that a day shall be set apart by Christians when prayer shall be offered that a certain of the control of the certain control of the control of the certain control of the certain control of the certain ce tain day and hour the Lord will set a sign in the heavens whereby infidels may know the Bible is the Word of God.

Workmen's Quarrel .- "Assault and battery" was the charge made before Alderman Bolster, on Saturday, by Lambert Schugart against Henry Fisher. The parties are engaged in a shop in the Third Ward, Allegheny, and had some difficulty in regard to a piece of workmanship, resulting as stated. The pugilistic Henry was arrested and will have a hearing to-day.

Narrow Escape.—Saturday morning a young woman residing on Center ave-nue, while engaged about the oven, accidentally set fire to her clothing, and narrowly escaped being burned to death. She was saved through the presence of mind of a member of the family who happened to be present, and succeeded in smothering the flames by wrapping a piece of carpet about her.

Fight in a Saloon,-Saturday afternoon, shortly after the race, a row occurred in Schaffer's beer saloon, corner of Washington and Denman streets, East Rirmingham. One of the parties engaged in the melee was badly beaten, and had to be taken away in a care affair created considerable excitement in the vicinity, which rendered it impossible to ascertain the name of the unfortunate man or the origin of

the fight. Terrible.—Anthony O'Donnell, a coal miner, was killed in a terrible manner in the Cambria Iron Company mines last week. While coming out of the mines from work he was caught between one of the oar cars and the side of the drift. At the time of the accident he had several picks on his shoulders, the points of which were driven into his back until stopped by the handles. He lingered in great agony for about five hours, when he died.

The Penn Street Burglary .- The burglary at Mr. W. R. Brown's residence, No. 103 Penn street, on Friday night, it now seems was committed by boys. The young rogues entered the cellar of an adjoining house and purloined a bottle of wine, after which they climbed over the fence into Mr. Brown's yard. They gained entrance into the house by prying open a window shutter with a chisel. It is not known whether anything of value was taken. The boys first tramped through a pile of lime and then climbed over the fence leaving footprints upon the top of the boards, from which the police judged the size and character of the depredators. There is no clue further

The Commencement Exercises of Washington and Jefferson College were concluded on Friday last, and in every view were of an exceedingly interesting character. The occasion drew a large number of visitors from all parts of the country, and at the palatial residence of Washington's most enterprising of citizens, Mr. William Smith, a grand social union of these and others was held on Kriday night, at which no less than three hundred couple were in attendance. The assemblage was exceedinglyly brilliant and fashionwas exteening by straint and lasmost able, and conspicuous for learning and refinement. After a promenade and socia converse the entire party were seated at a sumptuous supper where the boards grouned beneath the weight of the touthsome things set upon them. AQUATIC.

The Latest Flasco-Another Foul of Large Dimensions_Bets Declared Off

-A New Race Proposed. From five to ten thousand men, women and children found conveyance in a multitude of ways to the point on the Monongahela river designated for the aquatic race between Jimmy Hamill and Harry Coulter on Saturday afternoon. The banks of the river, from which as good view of the race might have been obtained, were lined with people of all ages, sexes, colors and classes, while the bosom of the stream was almost completely hidden in the shadows of the steamboats, tug boats, ferry boats, skiffs, vawls, sculls, barges and mud boats, which sat gracefully on the water and weighed down with anxious human beings. Never before in Pittsburgh had there been such universal interest centered in a similar sporting occasion, and the generous outpouring of the people strengthened the hope that an aquatic revival had set in, and that the spirit which contributed so much in days spirit which contributed so much it days of yore to the enjoyment of boat races had been resurrected. Never before was there such bright opportunity afforded the contestants to elevate the sport with a fair and dignified exhibition of their a fair and dignified exhibition of their rowing capacities, and never before was a golden chance permitted to not only escape unimproved, but to sink rowing and rowers into deeper odium and contempt. It is useless here to sermonize. The many thousands of people who hap pened to have a little business to trans-

subject, and inwardly resolved to turn a cold shoulder on boating in the future. THE DAY AND THE MEN. The day was all that could be desired. A bright sky overhead and a smooth, seautiful water, undisturbed by a single ripple. It was just such a day as rower would desire for a fair race, and admira-bly filled the bill of requirements in the

act up the Monongahela river just at the time of the race—for, like the old fly-ing man affair, none can be found will-ing to admit going from home to be sold —have formed their own opinions on the

articles of agreement.

The men were both in excellent condition. They had been trained thoroughly and their appearances betokened that both were in splendid trim for the contest, neither one appearing to have any advantage, in this respect, over the oth-er. Had they rowed over the course, we lare say the race would have been the osest and prettiest ever witnessed on the Monongahela.

MAKING READY. At precisely four o'clock the men both put in an appearance in their frail little hoats, and rowed around among the various barges and boats receiving the con-gratulations, well wishes and cheers of heir friends. In a few moments later the judges and referee appeared at the starting place in their boat and all things

THE START. The men were got abreast of each other in their boats and pioneers were sent forward to clear the course, after which the signal was given and both darted out, Coulter shooting ahead, having dipped his oars a moment prematurely. The Referee called them back for a fresh

start. After a moment's delay, the word "go" was again given and both boats started, Coulter getting the lead. When they had progressed about one hundred and twenty yards Coulter, whether purposely or not, is only known to himself, brought his boat directly athwart of Hamill's, and a tangling of oars took place. Hamill's boat rocked violently, and before he had it righted Coulter was ten yards in the ad-vance. Hamilt then threw up his oar and cisimed a foul, and leisurely rowed to his boat house. Coulter went over the course, being cheered by some of his friends, but jeered, hooted and hissed at by a large majority of the disappointed

THE BETS, Much sympathy was manifested for Hamill, who nearly everybody re-garded as blameless in the matter, and many claimed for him the stakes, charging Coulter with having deliberately fouled him. Considerable excited ment was experienced by those having money up on the race, not knowing how the referee, Mr. John M. King, might have viewed thei matter. That gentleman announced that he would deliver his decision at seven o'clock in the evening, at the counting room of the Dispatch. At the appointed hour a large crowd assembled on Fifth avenue to await the announcement of the decision of the re-Most of those in waiting were of the betters, and of course anxious to learn how their chances stood. There were few persons outside of those thus pecu-niarily interested who bothered themselves about the matter after supper, on account of the disgust felt at the fizzle. Mr. King, the referee, arrived at the Dispatch office about half past seven o'clock and found the judges and others interested awaiting him. He seemed to be a man of few words, for he at once announced that he decided the race a draw and all bets were therefore to be con-sidered "off."

NEW RACE PROPOSED. Mr. Elliott, for Hamill, said that if that was the decision it was not worth while to discuss the matter.

Mr. King answered that that was his final decision. Mr. Musgrave for Coulter-We now of-

fer to double the stakes and to row on

Monday or next Saturday.

Mr. Elliott—I want to have a test of the merits and skill of these men, and as they have had several unsatisfactory trials. I now propose that the stakes be doubled and that they each pull the five miles on time, Mr. King to be timekeepmiles on time, Mr. King to be timesceper. Mr. Elliott also proposed to make the stakes \$5,000 and pull this way, and suggested that the referee's boat be pulled between them through the race.

Mr. Musgrave stated that a race was desired and he would speak for Coulter's between their throught double the stakes.

backers, that they will double the stakes and row the race on Monday.

So the matter rests: It will be a very hard matter on the part of the city Press to again work up such a great interest in another race, as the people have swallowed too much of a dose in Saturdays' flasco to again be caught by a future occasion.

Resolved, That we most emphatically disapprove of the manner in which the claims of the soldier have been ignored by those who control the national appointment in Pennsylvania. Resolved, That empty pledges and promises unfulfilled, are but mockery in answer to the wounded man's appeal, and cannot fail to act on those responsible: and that we call upon those in power t redeem the solemn and off-repeated pledges made to soldiers and sailors dur

ing the dark and terrible days of the re-bellion.

Resolved, That in view of the fact that artificial limbs under ordinary circumstances do not last longer than three years, this Convention heartily endorses the proposed action of Congress making an appropriation for an additional artificial limb for those honorably discharged soldiers and sailors who may make application for the same, and that the Congressional Committee to whom the matter was referred be requested to fur-

ther the project.

Mr. Maken's Eccentricities. James Maken resides in Manchester, or the Sixth ward. Alleghenv. James was at the boat race Saturday and returned home, in common with everybody, disgusted with the fizzle. On the way home so great was his chagrin that he felt compelled to stop at a salcon and take something to calm his nerves. His nerves were very much out of order and he had to stop several times before he reached his residence. As a consequence reached his residence. As a consequence he was full of the boat race and the nerve calmers. White sitting by his fireside a brilliant idea struck him. He would have a race of his own. Acting on this happy thought he gleefully caught up the fire shovel, and in a facetious manner suggested to his wife, "a-(hic)-"wast-bally" of the servatione custower happy he at the same time causing the shovel intellight at the same interest and in close proximity to her head. She understood his meaning and "awasted," and his race began. Playfully he followed her from room to room of the house, up stairs, down stairs, out into the yard, and finally into the street, when he was prevented from following her further. Returning to the house, he brooded over his wife's unthoughtfulness in thus depriving him of his entertainment, and wratnfully concluded to close the doors upon her forever—a decision which he announced to the object of his wrath from an up stairs window. She lingered around for several hours, but finding him still obdurate, sought shelter at the num still obdurate, sought shelter at the house of a friend. Local Inspectors' Report. In the United States District Court, on Saturday morning, Judge McCandlesson the bench, the Quarterly Report of the Board of Local Inspectors of this port

was presented as follows: Hon. Wilson McCandless, Judge of the United States District Court, Sir: We have the honor to present our official report for the quarter ending June 30th, 1869. During the quarter we have inspected eleven passenger steamers, sixteen towing boats, three freight boats, two ferry boats, and one United States survey boat, making a total of thirty-three, having a total tonnage of 8,034 tons. We have issued licences to sixty-eight engineers, and seventy-five pilots. We have examined the condition of a number of steamers and steam bollers. We have ruled out of passenger service the "Grey Eagle" on account of her condition and unfitness as a passenger steamer. Repairs were ordered on sevral steam-ers and on a large number of boilers We are pleased to say they were attended to promptly. The boating business in the aggregate has been large, and the quantity of coal shipped, our great staple, has been unusually large. The number of new steamers built and being construct, ed for the Missouri, Mississippi, Ohio and Southern waters has kept our builders the quarter, which fact can be attributed to the efficiency and carefulness of the officers and owners of steamers. All of which is respectfully submitted.

GGORGE H. ATKINSON, SAMUEL WALKER, United States Local Inspectors. Mayor's Morning Court.

The Mayor's Morning Court yesterday presented an array of forty visitors, thirty-nine men and one "lone woman," most of whom had looked "upon the wine" or some other fluid the evening before. It was their misfortune to be misrepresented. Not one of them had been arrested for cause. According to their statements, they were the victimes of official interference and should at once be released. They were released in an official way, that is those who pro-vided funds sufficient to liquidate the fines imposed were set at liberty, and the others failing in this respect were granted tickets of admission to the mansion on the hill.

Milton Bandell, a resident of McKees port, visited the city on Saturday to see the boat race. For this purpose he took up a commanding position on the south bank of the Monongahela, near Haberman's coal tipple. The monotony of the preparations, which commenced long before the rowmen made their appearance on the water, had a drowsy influance upon him, and with the green grass the blue sky as a covering, and the great eclipse doing its level best to change day into night, he calmly settled himself to rest and soon was in the land of dreams. Morpheus favored his repose. He dream-ed sweetly, snored subduedly and awoke to realize the absence from his garments of a silver watch valued at \$50, a gold chain, a pocket knife and his purse containing a small sum of money. He sought in vain among the crowd for the kind-hearted friend who had so thought fully taken charge of his property, but the friend could not be found. He gave the friend could not be tound. He gave it up with a changed feeling in regard to boat racing, eclipses, or dozes on the sunny banks of meandering streams, and profanely pronounces them, one and all, a swindle.

Open Air Exercise. Everybody should have some open air exercise. Nothing will make up for a loss in this respect. The managers of the Work House understand this principle of health, and have therefore considerately made arrangements for the visitors who called upon them Saturday with the intention of rusticating for a fortnight or so. As most of the visitors are of the male order, shovels, picks, spades, and similar implements have been provided as the most suitable, and to-day they Youth. Supposed Incendiarism. Yesterday morning about ten o'clock some of the neighbors discovered smoke issuing from the windows of a large three story brick building on Vine street, off Pennsylvania avenue. The house has been unoccupied since the 1st of April last, and the circumstance ere ated some surprise. The doors were quickly broken open, when a fire was discovered in one of the lower rooms built in the centre of the apparently with the intention of des troying the building. A small hole had been burned through the floor, and the flames were spreading when they were so opportunely discovered and put out with a few buckets of water. The engines of the district were called out by an alarm from box 53, but their services were not required. The fire was evidently the work of an incendiary, but the guilty party is has not been secertained.

GREAT LAND SLIDE.

Five Acres of Earth Carried Six Hundred Feet.

By Telegraph to the Pittsburgh Gazette.1 Hudson, N. Y., August 7.-The town of Stockport, in this county, has been the scene of considerable excitement this week on account of a gigantic land slide, and thousands have visited the spot. The place where the phenomenon occurred is located on a post road near the confluence of Kinderhook and Clavernack, about five miles north of the city. It comprises nearly five acres and was on an elevation above a dry rayine. A hill intervenes between this ravi creek on the east and north, of a little less than the altitude of that which caved A stranger, we are glad to say he is a in. The movement was gradual and the surface of the earth undulated like the waves of the ocean. No noise was heard until the moving mass struck the

base of the intervening hill, when there was a dull, rumbling sound, resembling distant thunder, and a quivering sensa-tion like the slight shock of an earth-quake. The earth caved in to the disduage. In each taster in the surface, as indicated by trees and fences, moved a distance of over six hundred feet. So gradual was the movement that it occupied about half an hour, and the sight is described by those who witnessed it as sublime in the extreme. Among the most marked incidents of the phenomenon is the fact that an oak tree, which stood by the roadside, was moved with a section of the fence to the bottom of the ravine, a distance of six hundred feet, and the tree and fence now stand as firm and upright as ever. The weaker trees, such as pine and hemlock, were snapped as pipe stems and some trees of this nature, two feet or more in diameter, were doubled and twisted like a wisp of straw. Gen. Rosecrans Declines the Demo-cratic Nomination for Governor of Ohio.

By Telegraph to the Pittsburgh Gazette. 1 SAN FRANCISCO, August 7.—General Rosecrans has declined the nomination or Governor of Ohio. He telegraphed Hon. A. G. Thurman, for the Democratic Committee, as follows: "After the war I resigned a very desirable position in the army, and left my State to secure at least the possibility of fulfilling duties deemed sacred to my creditors and fam-ily. These duties forbid me the honor of leading the Democracy of Ohio in the pending canvass for Governor."

COLUMBUS, O., August 8.—Judge Thurman has just received a dispatch from General Rosecrans.
