Safety Fire Jacket, Car Heater and

MODERATOR.

For Smoke and Hot Air Flues, dispensing with the use of stoves and fires in or about the Passenger or Baggage Cars, with the attacument to graduate the heat to any temperature that may be desired without the possibility of firing the car or cars to which the Jacket may be attached. Having obtained of the United States Letters Patent for a Safety Jacket, which is warranted to resist the most intense heat that may be applied to it in the position and purpose for which it is intended.

It is a sure protection from accidents by fire, originating from defective flues or where iron pipes are used as conductors for smoke or heat. It is applicable to all piping that may become overheated, and is warranted to give perfect satisfaction where wood or other combustible material may be placed in close proximity thereto. I am now ready to apply my invention to stores, dwellings, factories, ships, steamboats, railroad cars, &c. Wherever pipes as conductors are made dangerous by being overheated and security desired, I will send on application right to manufacture or use the above invention. Also Territorial rights to such as may wish to engage in selling privileges either by State or county.
