FARM, GARDEN AND HOUSEHOLD.

recipe is worth one thousand dollars to lime and put them in a gallon of water, besides allowing a supply for the table, boil twenty minutes, let it stand till cool, Whenever the leaf began to look rust then drain off and put in a small jug or jar; soak your dirty clothes over night, or until they are wet through, then wring them, and rub on plenty of soap water, add one teacupful of the rinse, and your clothes will look better receipt and every poor tired woman

Blackberry Cordial is made by adding one pound of white sugar to three pounds of ripe blackberries, allowing them to stand twelve hours; then pressing out in the treatment of weakness of stomach and bowels. and are especially valuable in the summer complaints of children.

ing or not salting butter is now being agitated. It is claimed that salt is a foreign element in butter and materially detracts from the richness and delicacy of its flavor. The French do not salt their butter, and those who get accustomed to its use are said to find the taste of salted butter very offensive on returning to it again. Sugar may be worked into butter with

Making Yeast .- The Hearth and Home gives the following receipt for making yeast: Two handfuls of hops, two quarts of water. Boil well, and strain on to three large potatoes grated, three large spoonsful of molasses, and two of salt. Stir well together, and when cool add a pint of yeast. When light, bottle and keep in the spring or ice house.

How to Make Tomato Figs. -- Pour boiling water over the tomatoes in order to vate well, sow early, and the chances for emove the skins; then weigh them and place them in a stope jar, with as much sugar as you have tomatoes, and let them stand two days; then pour off the syrup, and boil and skim it until no scum rises. Then pour it over the tomatoes, and let them stand two days as before; then boil and skim again. After the third time they are fit to dry, if the weather is good; if not, let them stand in syrup until dry-ing weather. Then place on large earthen

45.56 of a bushel.

ready for autumn work. Oxen ought to said, when he was applying the ashes, have good long "noon spells." Horses was not worth, ashes and all, after it was stand great heat better; a good driver will give his team drink as often as he drinks himself. Working horses will be greatly refreshed by being turned into the pasture as soon as they are cooled off and let out over might.

Horses mixed, what the ashes cost. Now there are a great many inquiries about how to raise clover. This man never failed; he never thought of it, and never dreamed of it, and never knew any failure. He had a system in his head and fed, and let out over night.

Blackberries should be kept pinched back. The leading shoot should have been stopped at five feet. Now, keep all side shoots back to eighteen inches, and the reward will be seen in next year's crop. Remove the old canes as soon as the fruit is off, and hoe off all undesired suckers. So with raspberries, which have the same general way of growth.

If you plow down your weeds before they go to seed they will prove a benefit to your land instead of a curse. If they are allowed to go to seed they will be a source of endless trouble. Plowed under, they are worth as much as a dressing of manure. Besides enriching the soil they tend to keep it loose. If you add from the soil they tend to keep it loose the soil they tend to keep it loose. If you add from the soil they tend to keep it loose the soil they the soil they tend to keep it loose the soil they tend to keep it loose the soil they tend to keep the soil the soil

der thisteness this

for making fence is approaching, I would crous day's hospital work in the orlike to tell how any man may dig from chard, bandaged the trees with cloth one hundred and forty to one hundred atrips dipped in great heated ketand sixty post holes in eight hours. The tles of wax. A second lesser raid best tool for this purpose is a spade. The of the rascally unknown spoilers

hole, repeating the process on each side. You will find that the dirt will adhere to the spade, provided it is not raked off by contact with the opposite side. The left hand need not be used, except to give direction to the blows of the spade. The

half feet wide, on the edge of a paved the sap has caused fruit to grow instead yard, enclosed by a high fence. I planted of wood this season, the real trial of the three cucumber hills in the border, and trees will come next year. As to that, laid some brush (such as is used for peatime can only show; meanwhile, the vine,) between them and the fence. As trees are giving a magnificent yield if it soon as they crept up to the top of the is to be their final one. brush, I pinched off the ends of the vine

Dwers. To the cucumbers to grow all been taken into custody.

but watched them, and such as 1 wished to reserve for the table I picked as soon as they became of proper size; all the rest as the proper size; all the r were gathered every day for pickles; every day pinching off the bud at the end of each shoot. In this way the hill con-THE Ohio Cultivator says the following tinued fresh and productive until they ecipe is worth one thousand dollars to were touched by the frost. Some judgment can be formed or the value of this every housekeeper: Take one pound of practice when I add that more than a barof sal soda and halfa pound of unslacked rel of pickles were made from three hills,

Whenever the leaf began to look rusty or yellowish, it was removed, and every cucumber and the leaf was cut off with large scissors, so as not to disturb or wound the vine. There is an advantage in having them run up on brush instead washing fluid; boil half an hour or more of trailing over the ground; because they are much injured by being trodden on, than by the old way of washing twice and by being kept low on the bushes before bolling. This is an invaluable receipt and every poor tired woman ined every day.—Cor. Horticultarist.

Late Sowing .- Wheat that is sowen late generally results in total or partial failure. It may be safely said that four out of five crops sown in October, in this section, fail to produce paying results. the juice, straining it, adding one third spirit, and putting a teaspoonful of finely powdered allspice in every quart of corward with fertilizers and manures has dial, it is at once fit for use. This wine resulted only in producing a luxuriant and cordial are very valuable medicines growth, but failed to hasten the ripening process. The best effect of manure on late crops was obtained when the manure n the summer complaints of children.

Salting Butter.—The question of salt.—wheat was sown. This, with well drained land, a rolling surface and a Southern exposure, will ripen wheat six or eight lays earlier than when sown on a level soil without drainage and favorable ex-

> posure. Our experience is general that when wheat is sown in season, even when the soil is not rich and the cultivation indifferent, the crop is fair if the season be favorable. A few years ago, when the fly attacked the wheat in the fall, late sowing was adopted. The result was a greater loss than when damaged by the fly. The wheat ripened late and was attacked both by rust and the wheat weevil. Wheat should be sown in September, and never later than the 10th of October. Otherwise the wheat midge, and the rust which comes with hot, sultry weather, will be sure to destroy it. Select healthy, early varieties of seed, drain and culti-

a good crop are greatly increased. Improvement of Worn-Out Lands with Grass and Clover .- A correspondent of the New York Times writes to that paper as follows:

I will tell my experience on a poor farm in Rhode Island, of 150 acres, one too poor to keep a yuke of oxen, one cow and one horse in good condition. This farm was worth at that time about \$4,000 or \$5,000.

product divided by 56, gives the number the acre, harrowed it in, again sowed milof bushels. Because one solid foot is just let and clover, harrowed and gave it a 5 56 of a bushel.

Example.—How many bushels in a good rolling. In six weeks he had a growth of millet, say two tons per acre, box four feet wide, two feet deep and ten and another good stand of clover. The feet long? 4, 2 and 10, multiplied together, give 80 solid feet, which, multiplied by 45.56 gives 64½ bushels. If it is ears of corn, deduct what you wish for space occupied by cobs.

Working animals need good feed if they are put to hard labor. If possible, turn them out to grass for a few weeks, to be called barren, and land that the neighbors them out to grass for a few weeks, to be called barren, and land that the neighbors

> failure. He had a system in his head (for he did not get it from books), which he carried out like "clock work," and his farm was beautiful to look at. He said the land was not fit for manure, so he took four years to get it ready.

He thought ashes would produce millet and clover, and the millet would protect the young clover from the scorching sun until it would need no protection. The harrowing and rolling were indis-

pensable.

An Orchard Marvel. The St. Louis Republican says: All

twenty five to fifty bushels of time per acre to the ground, and harrow it in, it will convert your weeds into plant food.

How to Dig Post Holes.—As the time for making fence is approaching. I would best tool for this purpose is a spade. The holes should be two and a half feet deep, and the square of the spade in size. They are very much easier dug of this size, and very few need be dug larger.

After removing the soil, strike the spade into, say, the north side of the hole; pull the spade gently northward and upward, without permitting the earth to touch the south side of the hole; walk around the hole, repeating the process on each side.

You will find that the dirt will adhere to

round about is filled with the marvel, and an orchardist has promulgated a new theory of fruiting trees by girdling them. Whether or not it will be deemed necesdirection to the blows of the spade. The dirt is easily removed from the spade by striking it on the ground.

Don't be discouraged if you do not succeed in getting "the hang" of this method the first day. Give it a fair trial. succeed in getting "the hang" of this method the first day. Give it a fair trial, and you will never use any other.—Cor. lowa Hemestead.

Pinching Cucumber Vines.— had a over night, and to have the village turn out and repair damages the next day, here stands the story and the sequel, and Martin Green is getting ready to send shiploads of fruit to your market.

SPECIAL NOTICES.

SPECIAL NOTICES.

SCHENCK'S PULMONIC

SYRUP, SEAWEED TONIC AND

MANDRAKE PILLS will cure Consumption,
Liver. Complaint and Dyspepsia, if taken according to directions. They are all three to be taken
at the same time. They cleanse the stomach, relax the livor and put it to work; then the appetite
becomes good; the food digest and makes good
blood; the patient begins to grow in desh; the
diseased matter ripens into the lungs, and the
patient outgrows the disease and gets well. This
is the only way to cure consumption.

To these three medicines Dr. J. H. Schenck, of
Philadelphia, owes his unrivaled success in the
treatment of pulmonary Consumption. The Pulmonite Syrup ripens the morbid matter in the
lungs, nature throws it off by an easy expectoration, for when the pheam or matter is ripe a
slight cough will throw it off, and the patient has
rea and the lungs begin to heal.

To do this, the Seaweed Jonic and Mandrake
Thouse the stomach
and well make Seaweed Jonic and Mandrake
And well make stomach columnonic Syrup and the
Oschenck's Mandrake Pills act upon the liver,
removing all distructions, relax the duers of the
gall bladder, the bile starts freely, and the liver
is soon relieved; the starts freely, and the liver
fast of the liver like Schench's Mendrake Pills
and do; nothing has even been wented except calome! (a deadly poever been when the
Pills can do; nothing has even been wented except calome! (a deadly poever been wented except calome! (a deadly poever been wented except calome! (a deadly poever been wented except calome! Seawed Tonic is a gentle stimulant
and alterative, and the alkal in the Seaweed,
which this preparation is made of, assists the
stomach to turnow out the gastric jude to dissolve
the food with the Prumonic Syrup, and it is made
into good bood without fermentation or souring
in the stomach.

The great reason why physicians do not cure
Consumption is, they try to do too much; they
give medicine to act on the control they

stomach to throw out the gastric place to dissolve the food with the Pumonic Byrpp, and it is made into good biood withent fermentation or souring in the stomach.

The great reason why physicians do not cure Consumption is, they try to do too much; they give medicine to stop the cough, to stop chills, to stop philis tweats, hectic fever, and by so doing they derange the whole digestive powers, locking up the becretions, and eventually the patient sinks and dies.

Dr. Schenck, in his treatment, does not try to stop a cough, night sweats, chills or fever. Remove the cause, and taey will all stop of their own accord. No one can be cured of Consumption, Liver Complaint, Dyspepsia, Catarrh, Canker, Ulcerated Throat, unless the liver and stomach are made healthy.

If a person has consumption, of conracthe rugs in some way are diseased, either tobercles, abcesses, bronchial irritation, pleura adhesion, or the lungs are a mass of inflammation and fast decaying. In such cases what must be done? It is not only the lungs that are wasting, but it is the whole body. The stomach and liver have lost their power to make blood out of fo. A. Now the only chance is to take Dr. Schenck's three medicines, which will bring up a tone to the stomach, the patient will begin to want food, it will digest easily and make good blood; then the patient begins to grow, the lungs commence to heal up, and the patient sets fie hy and well. This is the only way to cure Consumption.

When there is no lung disease and only Liver Complaint and Dyspepsia, schenck's Exewed Tonic and Mandrake Pills freely in sil billions complaints, as they are perfectly barmless.

Dr. Schenck, who has enjoyed uninterrupted health for many years past, and now weight \$485 pounds, was wasted away to a mere skeleion, in the very last stage of Pulmonary Consumption, his physicians having pronounced his case hopeless and abandoned him to his fate. He wascured by the aforesaid me: icnes, and since his recovery many thousands similarly afficied have used Dr. Schenck, who has

in not, let them stand in syrup until drying large weather. Then place on large earthen plates or dishes, and put them in the sun to dry, which will take about a week, after which pack them down in small wooden boxes, with fine sugar between each layer. Tomatoes prepared in this manner will keep for years.

To Destroy Colorado Potato Bugs.—

Take one pound of Paris Green (cost 60 cents) and mix with two pouds of flour. Sift the mixture through a coarse muslin cloth, upon the potato tope, early in the morning, when the dew is on the tops. The bugs will drop to the ground by thousands never to rise again. The above quantity of ingredients will answer for an acre of potatoes.

Short and Useful Rule to find how many bushels in a box:—Multiply its length, breadth and depth, in feet, together, and you have the number of solid feet, which being multiplied by 45, and the product divided by 56, gives the number of solid feet, which being multiplied by 45, and the product divided by 56, gives the number of solid feet, which being multiplied by 45, and the product divided by 56, gives the number of solid feet, which being multiplied by 45, and the product divided by 56, gives the number of solid feet, which being multiplied by 45, and the product divided by 56, gives the number of solid feet, which being multiplied by 45, and the product divided by 56, gives the number of solid feet, which being multiplied by 45, and the product divided by 56, gives the number of solid feet, which being multiplied by 45, and the product divided by 56, gives the number of solid feet, which being multiplied by 45, and the product divided by 56, gives the number of solid feet, which being multiplied by 45, and the product divided by 56, gives the number of solid feet, which being multiplied by 45, and the product divided by 56, gives the number of solid feet, which being multiplied by 45, and the product divided by 56, gives the number of solid feet, which being multiplied by 45, and the product divided by 56, gives the number of solid feet.
