PACIFIC RAILWAY GOLD LOAN. Messrs. DABNEY, MORGAN & CO., 58 Exchange Place, and N. E. JESUP & CO., 12 Pine Street, N. Y., offer for sale the Bonds of the Kansas Pacific Railway.

These Bonds pay seven per cent. in Gold; have thirty years to run; are Free from Government Taxation; are secured by a Land Grant of Three Million Acres of the Finest Lands in Kansas and Colorado.

In addition to this special grant the Company also owns Three Millions of Acres in Kansas, which are being rapidly sold to develop the country and improve the road.

They are a first mortgage upon the extension of the road from Sheridan, Kansas, to Denver, Colorado. The road in operation NOW EARNS MORE THAN ENOUGH NET INCOME TO PAY THE INTEREST ON THE NEW LOAN.

There is no better security in the market—this being in some respects better than Government Securities. PRINCIPAL AND INTEREST PAYABLE IN GOLD. Price 96, and accrued interest, in Currency. Pamphlets, Maps and Circulars furnished on application.

FINANCE AND TRADE. OFFICE OF PITTSBURGH GAZETTE, FRIDAY, August 20, 1869.

On bond quotations from London, giving 84 for 50s of 1862, 83 for old 1865 and 82 for 1867s, Gold declined from 133, at which it was firm, to 132 1/2, with a heavy market. Judging from present appearance gold is likely to go down much more, but in the overall condition of the market, this is the cause for a sudden and rapid rise.

Without mentioning the rumors put afloat in Wall street, to frighten the timid bears, there are causes to effect the market unfavorably. If the vaguely reported death of Napoleon can advance the market one per cent., what would the effect of the actual occurrence be under the present agitation in Spain.

The rate of interest at the bank of England is 2 1/2 per cent., and an increase of specie in its vaults certainly shows a very unhealthy state of the business of England, and France and Germany are in no better condition.

A decline in the inflated values of the different stock exchanges in the money centres of Europe, as well as here, would bring ruin to a large number of people, and here, where our circulating medium is based on paper, a scramble for gold would be quite a natural thing for the masses to resort to.

The improved condition of the English crops might precipitate the prices of grain and flour in England to such a point that we could no export profitably, and would derive but little benefit from our rich harvest in a monetary point. This matter must be seriously considered since the fall crops of Northern Europe are a great aid in feeding the masses of the lower classes, especially in England, where people subsist on a less expensive food and do not require wheat flour for bread.

These are all probabilities that would influence a rise in gold, or in other words, would necessitate a large shipment of coin to make our balance of trade and pay back Europe the large capital temporarily invested here.

Government bonds have advanced, being scarce here and in demand for shipment to Europe on improved quotations from there. Lower gold, however, would force down their value as an investment, since there are many good investments in the market that would pay better, offering good security.

Stocks are dull and nothing doing except in Oils, which suddenly advanced about one per cent. Money easy at from 8 to 9 per cent. Quotations as received by P. R.
