NEW YORK, Aug. 24, 1869. Wall street to-day has been the scene of more activity and animation than for some time, and there has been lively speculative movements in the Stock Exchange and Gold Room. The "bears" of Stock. Exchange opened the ball with a grand raid chiefly on Vandertilt stocks, and the result was a general decline of 2 to 4 per cent., and a considerable amount of stocks were thrown overboard. The "buils" finally came to the rescue, which, in connection with covering of the "bears," turned the tide of specusecurity in the market—this being in some respects better than Government Securities. OFFICE OF PITTSBURGH GAZETTI. TUESDAY, August, 24 1869. Business generally is quiet, thoug. ittle better than it was last month, and fully as good as it usually is at this season of the year. There would be more activity in grain if it was not for the uncertainty in regard to prices, and this retards business and restricts operators, as operators generally are timid and seem disposed to hold off until the markets become more settled and prices more fully established. At the present time, the impression prevails that prices will rule lower, sooner or later, and the movement in most of the leading mar kets during the past few days are calcuated to strengthen this feeling. Another drawback to the grain trade in this place, is the fact that producers in this section of country are demanding, in many cases, prices at home that can scarcely be realized here, so that the shipper has no margin, and it is not to be expected that he will invest his money and run the risk of the markets, with no prospect of even the smallest

with no prospect of even the smallest margin at the outset. The flour market is so very quiet that it does not exerve a passing notice.

WOOL MARKET.

OFFICE OF PITTSBURGH GAZETTE, ? Tuesday, August 24, 1869. The market remains quiet at about previous quotations. Considerable purchases have been made in the surrounding counties the past week, of fine wools at 45 cents, and for choice clips in extra condition, a little higher has, in some cases, been paid. The fault with many buyers is a want of proper dis-crimination in not making the just are correct abatment on heavy wools. Wo correct abatment on heavy wools. Work growers demand of buyers that the shall discriminate, but when the buy wishes to do this and pay for clean what it is worth, they also claim right to buy the heavy and badly walled wools at the proper discount, and rule ought to work both was With many wool growers we find fault, they wash and carefully har their wool; but with many the wish object is to grow bir fleeces, and object is to grow big fleeces, and half wash them, so they are no t

than unwashed—put the best on the pile and tell you they know all clean and well handled. all clean and well handled, when know entirely different, and at the time have the unblushing effrontrask the highest market price. The way to correct all this, is to pass soliton and it any hours is
