TARM, GARDEN AND HOUSEHOLD.

BONING PASTURES.

Every boy that has driven cows to old pastures has noticed in them a singular taste for chewing old bones. Let a piece of the size of a big potato lie in the grass at the roadside, and a cow will see it and turn aside for it as quick as though it were an ear of corn. Is this a mere whim or fancy in the dumb brute, like the fondness of boys for chewing cherry gum, or the taste seed at all. Cows and oxen chew bones as medicine. Nature tells them that they need it, and they cannot get it in the grassing which old pastures afford. Nobody sees such a taste in horses and sheep.

Let us consider the subject in the light of one or two well (settled facts. The milk of a cow for all the subject in the light of one or two well (settled facts. The milk of a cow for all the subject in the light of one or two well (settled facts. The milk of a cow for all the subject in the light of one or two well (settled facts. The milk of a cow for all the subject in the light of one or two well (settled facts. The milk of a cow for all the subject in the light of one or two well (settled facts. The milk of a cow for all the season contains on an average twelve pounds of phosphate of lime. That milk is consumed in or near the house or it is carried, hundred on the contract of the subject in the form of cheese. Nobody thinks of carrying the connectrated manures of the hog pen to the cow pasture; hence, no part of the cow pinks of the cow pinks and the connectrated manures of the hog pen to the cow pasture; hence, no part of the cow point and the cow pasture; hence, no part of the cow pinks and the complete of the cow pasture; hence, no part of the cow pinks and the cow pinks and the complete of the cow pasture; hence, no part of the cow pinks and the cow pinks and the cow pasture; hence, no part of the cow pasture; hence, no part of the cow pasture; hence

to the cow pasture; hence, no part or constituents of the milk ever gets back to inference is easy. All old pastures require a manure that contains phosphate of lime. Suppose milch cows have been twenty-four pounds of phosphate of lime. no discussion. He is requiring of his cows to produce milk from grass that is wanting in one of the most valuable constituents of milk. He is as unjust as old Pharaoh when he made the Hebrews make brick, but gave them no straw. Ground bones contain more of the sub-stances that his cows and his pastures re-quire than any available manure. It should be sown on the pastures at the rate indicated above. That is, if a pasture has received no bone for sixty years, and bankrupt as a range for cows, it will require one hundred and fifty pounds of duire one hundred and fifty pounds of bosphate per acre. Two hundred pounds of raw bone meal would be no more than of raw bone meal would be no more than give 80 solid feet, which multiplied by a proper dressing, and this dose should be repeated every few years. - Exchange.

in hurses may, in many cases, be traced to the wretched custom of confining ani-mals in dark stables. Any one who has been for some time in a dark room, knows what the effect is, of coming suddenly out into the bright sunlight. The horse is no less sensitive. Bring him suddenly out and you notice that he stumbles against almost everything that is in his way, and steps with the utmost uncertainty. This blundering is not the fault of the poor beast, but of his owner. The eye must gradually become accustomed to the change. The effect of the common mode of treatment cannot fail eventually to be disastrous to the eyesight. The detention in dark stables must have a deletention in fluorest the common of the order of the common of the poor beast, but of his owner. The eye must gradually become accustomed to the change. The effect of the common mode of treatment cannot fail eventually to be disastrous to the eyesight. The detention in dark stables must have a deletention in fluorest production of the poor beast, but of his owner. The eye must gradually become accustomed to be disastrous to the eyesight. The detention in darks tables must have a deletention in fluorest production of the poor in the poor the optic nerve, by weakening it. The return feels it also. Objects are reflected upon a dull surface and they are not clearly discerned. The master wonders what is the matter. His horse used to be sure of foot, but now he stumbles entirely too frequently for his credit in the market. He used to be very gentle and could be warranted as alto-gentles entirely too frequently for his credit in the market. He used to be very gentle and could be warranted as alto-gentles and the production of the poor in the poo been for some time in a dark room, knows upset the carriage, and the ladies of the house are afraid of him. He is losing character, and rapidly getting a bad name, when the poer brute is as deserving of confidence as ever. The animal would in fact be safer with absolute blindness than with imperfect vision, for it is constantly alarmed by objects which are seen indistinctly, whereas, in the former case, it trusts entirely to the bridle. Farmers

Stable Windows .- Diseases of the eye

will do well to make a note and let their horses have light. Harresting Buckwheat. - Buckwheat is another will be fully matured. The point is to cut it in that stage which will save is harvesting might be delayed longer, same provisions. but when stricken by frost the growth is to an early decay, preventing any farther maturing of the grain. But cut when a portion is in the milk and set up in bunches in the field, the juice of the straw, in which it is peculiarly rich, will ture upon his property. He was held to be in the field of the straw, in which it is peculiarly rich, will ture upon his property. He was held to be in the field of the straw of the stra vesting this grain, as it leaves the straw in a condition to be easily gathered in bunches for setting up for drying.

the house with bin

Chow-Chow.—To one peck of tomatoes add three good sized onions, six peppers with the seed taken out,-chop together and boil three minutes in three quarts of straining; then to three quarts of new vinegar, scalding hot, add two cups of table spoonful of cloves, one of alspice, two of cinnamon, three of salt; then pour over the tomatoes, etc., hot.

Pickled Tomatoes .- Slice a peck of tomatoes; —take 1 gallon of vinegar, 2 table spoonsful of cloves, and 2 of alspice; mix the vinegar and spice together; then throw in the tomatoes, and let them come to a boil, and they are fit for use.

Apple Jam .- Core and pare a good quality of apples, chop them well, allow equal quantity of weight, apples, make a syrup of your sugar by adding a little water, boiling and skimming well, then throw in some grated lemon, peel, a little white ginger, with the apples, boil until the fruit looks clear.

Putting up Pickles .- Wash the cucumbers, put them in a jar, sprinkle on a little salt, and pour on boiling water enough to cover them. Let them stand until cold, drain off the water, add more salt and water and repeat, until they have been scalded five times. Then scald them in a brass kettle, in good cider vinegar, (not too sharp,) alum, in the proportion of a small tablespoonful to a gallon of vinegar, a handful of allspice and a few pepper corns, and you will have pickles that will keep the year round as crisp as when

Apple Jelly.—Fall pippin apples are decidedly the best for jelly! To one peck of apples, after they are pared and quartered, first put up. take three pints of water and the juice of MR. CHAS. E. WISE, an experienced one lemon, with a very little lemon peel; Bronaut, is about to make a balloon asstew until soft, then pour into a jelly bag cension from Lancaster.

of cheese. Nobody thinks of carrying is pared. To each pound of fruit allow a pound of loaf sugar. Put a layer of sugar at the bottom of the preserving kettle, constituents of the milk-ever gets back to the pasture where the grass grew, from which the milk was made. The proper which the milk was made. The proper until the sugar is all dissolved; then boil them until they are clear; take them out piece by piece, and spread them on a dish free from syrup. Boil the syrup in on a range of pasture for sixty years at the pan until it jellies; when the peaches the rate of a cew to five acres. Each acre had been robbed of one hundred and had been robbed of one hundred and fill up with boiling syrup. Let them stand a short time covered with a The duty of the dairy man, admits then, of thin cloth, then put on brandy paper, and cover them close with corks, skin or paper. From twenty te thirty minutes will generally be sufficient to preserve them. Short and Useful Bule to Find How

PROSECUTING CARELESS FARMERS. The West Cnester Republican states that during the session of the Legislature of 1867, through the influence of a Farmers' Club in that county, a bill was passed applicable alone to Chester county, making it a penal offence for "any person or Essays on the ERRORS OF YOUTH, and persons, owning, possessing, or occupying and holding land or lands, in the county of Chester, to allow any or either of the following weeds to mature seed on land owned or occupied by him or them; viz: The common mullen, the moth mullen, wild carrot. Canada thistle, horse the most peculiar of the grain family in nettle and ox eye daisy. Any person the manner of its ripening—a considera-ble portion being in the milk state when which said weeds, or either of them, shall be found with matured seed, shall be deemed and taken as maintaining a nuithe most, and this is when about half of the grain has turned brown. If the ties as are now, by law, imposed." Railstraw were less sensitive to cold than it road companies are also made liable to the

The first two cases that have occurred entirely arrested and the straw disposed under the law, took place before Justice to an early decay, preventing any farther Whitehead, of West Chester, last week. straw, in which it is peculiarly rich, will ture upon his property. He was held to cause the immature portions to ripen and bail in the sum of \$100, to answer the little will be lost by over ripeness or a charge. Subsequently Ortlep made comlack of it. The common grain cradle plaint against Wood, for the same offense, will be found the best implement for har-Both parties reside in the township of Londonderry.

THE Waynesburg Messenger says: Last week we dug a portion of our po-tatoes—very fine looking ones indeed and put some of them in sacks. In looking at these a few days after, we found vinegar; throw this vinegar away after many of them already rotted—the real potato rot—while another portion dug at the same time and poured out on the sugar, one cup of mixed mustard, one floor, where they had the air, gave no signs of decay. From this it would seem that potatoes should be spread out and thoroughly aired and dried before being packed away. This hint may be of value to our potato raisers. The potatoes that showed the rot were white Neshannocks; those that did not were Buckeyes. The potato crop in this county is unusually good, though we have reason to fear that the rot will destroy many of them.

A PHILADELPHIA paper says that an eminent surgeon of that city had his libraes washed in the morning with water in which one or two sliced onions had been steeped. He found that the flies kept at a respectable distance, while no harm was done to the animals. A sepa rate bucket or vessel other than that used to water the horses, would be necessary, and great relief would be obtained at a small cost.

THE Eric Railway has introduced the system of reserved seats. The passage ticket has a coupon, the same as a theatre or concert ticket, which secures a parti-cular seat to the holder. This is a return to the "first principles" of railroading on the Albany and Schenectady road, where the passenger had a seat in the coach bearing the letter of his ticket.

That plan avoided over crowding, and enabled parties to get sure contiguous

The Fall Term of this School begins SE TEM-BER 6, at 2 A. W., in its new rooms, 392 LIB-ERTY STREET, (Reystone Benk Building.) Application for the admission of pupils may be made at the School Room during the week pre-ceding the day of opening, between the hours of Wand 12 A. W. ceding the day of opening, between the hours of EO and 13 A M.
It is very desirable that all pupils be present the first day of the term.
Parents having some to educate for College or business are invited to communicate with the Frincipal. they derange the whole digestive powers, locking up the secretions, and eventually the patient sinks and diea.

Dr. Schenck, in his treatment, does not try to stop a cough, hight sweats, chills or fever. Remove the cause, and they will all stop of their own accord. No one can be cured of Consemption, Liver Complaint, Dyspepsia, Ustarrin, Canker, Uncersaed Throas, unless the liver and stomach are made healthy.

If a person has constamption, or course the ungs in some way are diseased, eitner tobescles, abcesses, bronchial irritation, pleurs adhesion, or the lungs are a mass of inflammation and start decaying. In such cases what must be done? It is not only the lungs that are wasting, but it is the whole body. The stomach and liver have lost their power to make blood out of for d. Now the only chance is to take Dr. Schenck's three medicines, which will bring up a tone to the stomach, the patient will begin to want food, it will digest easily and make good blood; then the patient begins to grow, the lungs commence to heal up, and the patient give its daily and well. This is the only way to cure Consumption.

When there is no lung disease and only Liver Complaint and Dyspepsia, Schenck's Seawed Tonic and Mandrake Pills are sufficient, without the Fulmonic Syrup. Take the Mandrake Pills freely in a billious complaints, as they are perfectly harmless.

Dr. Schenck, who has enjoyed uninterrupted
