there were but three Republican newspa-pers issued in Mississippi one year since, where there are now sixteen, and several more will soon be started.

THE OHIO RIVER BRIDGE at New Albany, now in progress of construction, will be exactly one mile in length from town will have twenty seven spans, all but eight of which have already been

A son of an Ex-President of the United States from Virginia, who has become utterly debased by indulgence in strong drink, was the other day admitted to a charity ward in one of the bospitals of Washington.

It is reported that the narrow gauge is to be substituted for the broad on the Eric Rallroad. When this shall be done, shall we be able to perceive less force in the familiar line, "Broad is the road that leads to death?"

THERE were six births on the same day in a house in Barroll county, Georgia, last week. A lady had two twins, and two of her daughters each had twins. The six were all boys. This story is told by a Georgia paper, as a sequel to the

THE London Fun has the following: "It is rumored that one of the conditions on which Mr. Motley is instructed to insist with regard to the settlement of the keep him here. The condition is a hard one."

AGRICULTURALISTS in California are turning their attention to raising oplum. | turn within sixty days. The poppy plant, it is found, will grow there almost without cultivation, and the gathering of the juice of the heads, of which opium consists, is as simple an operation as the making of maple sugar. Raw opium is worth about \$20 a pound.

THERE is a report that Hon. John. R. Allison, of the Treasury Department, and Hon. C. Delano, Commissioner of Internal Revenue, have accepted an invitation extended to them by the State Ex-ecutive Republican Committee of Pennsylvania, and they will stump that State in compliance therewith, during the latter part of the campaign.

THE only dealer in the Wisconsin hop country who has the hardihood to offer any price at all for that commodity, puts in a paltry bid of fifteen cents a pound for A No. 1 hops. Stung with mortification at this offer, the hop growers have one precious consolation, i. e., that the worm will leave but few pods to be disposed of at such humilisting rates.

posed of at such humiliating rates. A CHILD in Minnesote recently swallowed a cup of water in which a quantity of potato bugs had been thrown to drown. The parents fed the babe for two hours on Davis' pain killer and sweet milk, and beyond "distress," which might naturally be attributed to the heroic remedy, there were no serious consequences, though the potato bug is reputed poisonous in the

A young man of respectable appearance recently applied to a police magistrate in Paris to obtain an entry into a lunatic asylum, as he could not withstand the temptation to strangle every child he met. He was a teacher in a large school, and although he had succeeded so far, he declared it utterly impossible to keep his hands off the children under his charge

THE NEW traveling costumes, says a Paris correspondent, are made of waterproof cloth in shot colors, such as brown and gold. The skirtis short, with a simple hem round the bottom. Paletots are loose to these, revers of taffeta, plaited sash of taffeta to match, straw bat, gauze veil, waterproof boots. Mactarlane mantles, with coachmen's capes of red and white plaids, are the best evening dress

A LADY of New York city has just come into the possession of an original painting by Rubens, which was brought to this country half a century ago by an Italian artist, but has never yet been placed upon exhibition. It is the draft of his celebrated "Plague of Venice," and exhibits some of the finest characteristics of the great master. The owner has consented to place it in a gallery for public

THE other day the dead body of an infant was found in a sac on the banks of the Mississippi, at Muscatine, Iowa, showing that it had been drowned. With the sack as a clue, a policeman ferreted out the mother, who acknowledged the whole thing. Her own brother was the ville's firm are the patentees of the Albi-father of the child, and had drowned it ni Brauedlin rifle, adopted by the Italian immediately after its birth. The man was arrested and put in jail and the woman released on bail.

What can the ladies use to make themdanger? Chignons convey disease and vermin, (so they say), hair dye is rank poison, and now we are told now? vermin, (so they say), hair dye is rank poison, and now we are told peculiar cosmetics contain ingredients that produce paralysis and disfigured faces. But where do all the ladies who, if these stories he true must be eximpled and these being fitted together stories be true, must be crippled and ren-dered hideous, go to? We never meet any of them anywhere.

A young lady, residing near Earlville, Canada, wearing a highly pollahed silver pin, was looking at the colipse considera-ably through the ordinary smoked glass, during the time of the transit, and afterward discovered that the eclipse had daguerreotyped itself upon her pin at the time that the sun was about half obscured. The impression remains there permanently, resisting the action of rubbing,

as well as exposure to the atmosphere. AFTER the sermon at the Ohio penitentiary, on Sunday last, an interesting epi-sode in the exercises took place. Colonel Burr, rising, showed the prisoners the large strap used in former times for whipping and brutalizing men, remarking that this and other similar practices had been abolished. Then holding up a set of the tin table furniture, he said that this said that this said that the said that t too, had been dispensed with, and dishes substituted in its place at a cost of \$600.

On Wednesday morning near Cochranton, says the Meadville Republican, an oil car attached to a freight train, was struck by a meteor. The engineer states that he had just stopped the train when the

side was rowed in this harbor on the 10th inst., between the cutters of the United States steamer Iroquois and her Britannic Majesty's frigate Ocean. The latter beat the former in a five mile race four minutes and twenty eight seconds. This result again gives the boast to the British-THE Vicksburg Republican states that ers in these waters, which was won from them about a year ago in a contest be-tween the Ocean and Oneida."

If the reader of this paragraph owns a razor imbued with the equine quality of "pulling"—one that "draws" tears to his eyes—let him put it half an hour in water to which has been added one twentleth of its weight in muriatic or sulphuric acid; then wipe it off, and, after a few hours, set it on a hone. The acid supplies the place of a whetstone by corroding the whole face of the blade evenly, so that nothing is wanting to insure a keen edge, but a smooth polish.

Two prairie dogs, owned in Portland, Maine, were observed a few days since to gather quantities of grass, which they rolled up into balls and dried in the sun, after which they carried them to their burrows. They have also stripped the cucumber vines of their fruit and carried vines and cucumbers to the same place, together with such other food as they could secure, and on the 20th of the month they went into winter quarters, and will not reappear again until next spring.

THE California pioneers' excursion to the Atlantic States will leave Sacramento for New York on September 15th, 1869. The round trip is charged for at half fare, and the cost for each ticket is \$112,50 in gold, or \$150 in currency. The parties sist with regard to the settlement of the Alabama claims, is that we shall receive George Francis Train in England and keep him here. The condition is a head jority may determine on. Sleeping cars solely for the excursionists have been provided. The tickets are available to re-

> In Decatur county, Iowa, there lives an aged hermit, by the name of Vander-croft, who emigrated to the spot which he now occupies twenty-four years ago. For fourteen years he has not been half a mile from his hut. He is described as talkative and intelligent, and appears to have considerable education. He is very kind to the domestic animals which he has gathered about him, not wishing to sell a balky horse, for fear it would receive unkind treatment at the hands of another, and he will not pay the man who butchers his hogs, if he allows them to squeal during the operation.

ON SATURDAY a shocking accident occurred near Bucyrus. As an eastward bound train on the Pittsburgh, Fort Wayne and Chicago Railway was approaching the station, an elderly gentleman and lady, whose names our information could not ascertain, attempted to man and lady, whose names our information and could not ascertain, attempted to drive across the track. The vehicle was struck by the engine and shivered to atoms. The lady was instantly killed, and the gentleman was frightfully mangled. He was alive when taken up, but it was thought impossible for him to live imany hours. No blame was attached to many hours. No blame was attached to the officers of the train, as the proper signals were given before reaching the crossing.

THE laws of Ireland are ridicuously strict in punishing little expressions of feeling, held to be dangerous to the pushic pace. One man, for avowing himself "a Papist to the backbone" was fined forty shillings. Henry McCool was arrested for "blessing the Pope" in Smithfield Market. THE London Lancet, in speaking of "the women of the period," whom it describes as "a race of chlorotic girls, acting wives, and inedicient mothers," says that "the scrofulous, consumptive, dyspeptic; pimpled women, who crowd physticians' waiting rooms and swallow every advertised remedy, from Parr's Pills to Pancreatic Emulsion, would be strong, vigorous, and healthy, and need no med-icine at all, it they followed a few simple directions. directions. These are: To allow their own hair to be just bound down as a natural covering to their heads when out of doors; to clothe their bodies sensibly, without pinching themselves hideously into unnatural shapes; to wear well-shaped boots, in which they might walk comfortably and taste the pleasure of ex-

The entire work consists of a light sea wall and platform, a plank wall and a heavy sea wall and the filling in of the flats. The light sea wall is to be built in a trench dredged two teet below the spring tides. There are to be five parallel rows of foundation piles, the rows to be two and s half feet apart. The whole space to be occupied is nine feet wide, with stone chips or oyster shells rammed between the piles. The wall is to be 3 feet wide at the bottom, and 5 feet at the top, and 18 feet high. The heavy see wall on the 18 feet high. The heavy sea wall on the outer side, next the main harbor, is to be laid in a trench 25 feet wide at the bottom, with a level surface, 23 feet below mean low water and always on a hard bottom.
