at 1371@1381. FROM TO MORROW onward until 8th of next month, Governor GEARY will devote his attention almost entirely to the canvass in the western counties of

the State. SPAIN sends large reinfor her troops to Cuba, by way of response to the little "suggestions" of our Minister at Madrid. American diplomacy at the Escarial is not yet to be complimented upon its achievements!

ALLEGHENY COUNTY is awake! Our Republican friends here understand themselves, and appreciate the responsibilities of the hour. Our voters will attend at the October polls with their usual punctuality, and in their usual We feel quite safe in the prediction that they will count out as good an average for Allegheny, in comparison with the last Presidential vote, as in any other county of Pennsylvania. Remem-

ber that ! THE CUEAN INSURRECTION WIll be permitted to worry itself through, whatever issue fate may reserve for it. The American government will avoid any intervention which could embroil us on either side, and the two leading maritime powers of Europe, England and France, will follow our example. Least of all, do the latter propose to inflame American sympathies, by any overt demonstrations to sustain the Spanish authority. They are too wise to fall into that

WE HAVE already announced that the trap. Democratic City, Ticket for Philadelphia, which was first nominated, created so much dissatisfaction among reputable members of the party, that all the candidates were constrained to withdraw. A fresh list of candidates was brought out; but these seem to be no more acceptable than the others. Three of the Democratic Sunday papers of Philadelphia opened simultaneously upon the new candidates, and this appears to be only the preliminary display of the internal opposition to be encountered.

THE SELECT BRANCH of the City Councils did not concur in the action of the lower body in granting to the California Pioneers the hospitalities of the city, being restrained from so doing by the impoverished condition of the finances of our municipality. The Pioneers will come nevertheless, and should receive some welcome from our people. Will not our manufacturers and merchants themselves see to it that they are hospitably entertained? Let our energetic citizens set about to at once prepare for their reception in a fitting and becoming manner, for we cannot afford to give them the "dry shoulder" on their advent among us. Who will move? It will certainly be damaging to our own interests to permit our visitors to enter and depart from our city without any aign of recognition or

The danger to the State does not proceed so much from the bad for incompetent men who push themselves into the management of politics, as from men whose morals are ble, but who refuse to discharge the political duties which devolve on them as members of society. It is not the selfassertion of the profligate, so much as closed that poshing but a case of damptexpression of the meetaling which have politics, as from men whose motions are counters is reduced to its minimum by pure and whose abilities are unquestions. proper use of the Davy lamp, which ble, but who refuse to discharge the pofaithfully warned of the existence of the assertion of the profligate, so much as peril which it protects him from. Yet the remissness of the other sort, that demining experience abounds with cases generates practical politics. Do not the where the most fearful disasters have been declaimers against politics and politicians directly traceable to the recklessness comprehend that a sin of omission is of the operative in uncovering his light, just as much a sin as one of commission? that he may the clearer see his work. Continued impunity encourages him until, at last, a blow of his pick releases the deadly gas from its confinement, the fire touches it, and death flashes through every For such racklessness, no extent c scientific instruction can supply a reliable remedy. The legislative authority only can supply the police restrictions which may yield a more complete protection.

the cattle in? We trow not. There are many men here in Allegheny county, as everywhere else, who are constantly declaiming against parties and and Baltimore a larger number of first class passages have been taken to Europe grumbling about politicians; but they do this year than in any before, and as the cry literally nothing to make the case better. of hard times has found its echo in those They cast off and contemn the responsicities too, we may well consider whether bilities which nature and the laws lay upon their shoulders, and then set up continuous howls about the way in which their neighbors dispose of their respective shares of these same duties. Especially is this true as to local or municipal affairs. Fall upon a chronic grumbler, and you encounter ordinarily a man who has done, and means to do, nothing towards correcting whatever disorders may exist. He has his own views of what ought and What ought not to be done, and these are so sharply defined in his mind as not to admit of contradiction from any of his peers; but he will put forth no sultable efforts to have his own conceptions carried out by those who occupy positions of legal authority. There is decidedly too of this; and the sooner every such citizen reaches the con-The speech recently uttered by Prince both in municipal and general politics,

clusion that he has something to do of more consequence than growling, NAPOLEON in the Corps Legislatif of the better it will be for all concerned. If a people can be named who have suffered the loss of liberty or any minor evils through the exertions of small and debasing politicians, we are confident that many have been vitally injured by the sickly sentimentality of classes of population too fastidious to perform the rough work inevitable in this world, and who preferred the immaculate whiteness and delicacy of their hands to a grand cause energetically pushed, and the highest results heroically achieved.

THE Rock Island (III.) Union says a Mrs. Hellin, residing in that county, gave birth to six children, three boys and three could be the same of the same three same t girlat im the evening of the 7th last. The

This, when there is not little less fame, and also of but little less word in the book mis-spelled, skill in this specialty. We refer to the last male descendant of Wm. Penn, who for a score of years has been periodically beauty in the rich dialects of a country, dying in both continents; and in abject noverty as well as in comfortable cirumstances. He died again a few days In Hans Breitmann there is nothing ago, and will now, we hope, rest in peace.

A Remarkable Spring in Michigan. The Lansing (Mich.) Republican says hat in attempting to bore a salt well at St. Louis, Gratoit county, in that State, a spring of fresh water was tapped, at the depth of a little more than two hundred fect, which throwsout water at the rate of two hundred gallons per minute. This water is thrown some distance above the mings, but it is not so appropriate to the ground; and the first thought of the people of that village was, that if they had failed in obtaining a salt well, they had poems, the fun remains if the poem is stripped of its broad Scotch, but the secured the means of providing pure, soft, identity of it is quite lost. Some months ago the two publishing houses of Harits healing qualities was the result of accident. Three traveling agents went down to the spring, and finding the water cold, it was proposed that each should hold his hand in the per's and Lippincott's, Breitmann's former publisher, had a quarrel of the "heftiest" sort. Can it be that that is the reason for the apparently unaccountthat each should hold his hand water, to test the question of physical water, to test the party had long able tack of appreciation in an ordinarily endurance. One of the party THE light wine question is getting to be of more and more importance every

suffered from rheumatism, and had been unable to open his hand for many years.
This hand was placed in the water, and when compelled, after some moments, to withdraw it, he was able to straighten his fingers, and he exclaimed: "My God! I can open my hand, and have not done it before for ten years." This marvelous healing caused great excitement among the inhabitants, and further experiments proved that the water was filed with electricity or galvanism. Knife blades held in the current flowing from the pipe for the first time, and as but few vineyards became sufficiently magnetized in minutes to lift a tenpenny nail and retain the power as if imparted from a loadstone. ble opponent to both the whisky and the total abstinence rings. Of the many un-The news of its medical properties

spread far and wide, and those from chronic rheumatism and neuralgic diseases came to drink and found restored health from the waters. The analysis of Professor Duffield, of Detroit, proved the truth of the assertion that the waters were charged with electricity. Provision has been made for the accommodation of patients and the furnishing of baths, and cle for a small price, intoxication is rarer than it is common in this country or in ehess would open them; for we ourselves, without having paid particular

A few days since Messrs. Christian and diseases in the light of a merely Patterson, of Lansing, went to St. Louis to try the virtue of the waters, and were attention to this question, are able to greatly benefitted. An old man who had contradict almost every one of his asserbeen unable, from rheumatism, to walk tions from personal observation. But a for more than three years, hobbling about few years, however, will have empsed as best he could with crutches, his feet before we shall be able to study this imespecially being in a terrible condition, portant question without going abroad. he took two baths and drank freely of the water, repeating the same on the following, and on the third morning he THE summer is about over, the people walked ten rods and back without crutches, almost entirely healed in two who were out of town are in again, the warm weather of September has lasted

nearly its accustomed time, and the equiday's time.
Messrs. Patterson and Christian have been the means of making another discovery in relation to these waters, which noctial storm is anxiously looked for. We hope that the complaints of hard will excite a profound sensation throughtimes are over too. These complaints will excite a projound sensation through-out the State and country. The water had been conducted through a six-inch tin have been wide-spread, but everything seems to show that they have not been pipe from the mouth of the spring. For justifiable. In our own experience we some purpose, a portion of the mouth of this pipe had been cut off and allowed to have never before known so many of our citizens to spend a portion of the sumdrop upon the ground, where it was constantly kept wet by the flowing water.
Upon the surface of this tin had accumumer away from home and business, nor have we ever before known of so large a ated a galvanic coat of metal resembling proportion of that number taking the expensive trip to Europe. From New York

burnished gold.
Mr. Patterson, who discovered it, proposed to bring the entire piece to Lansing, but was told that others might like a piece as a curiosity; and a couple of pieces, each about three inches square, were brought to this city, one of which is in our possession. An examination shows this constantly increasing journeying to that the coating is as finely placed upon Europe and the consequent increase of the tin as if done by the best galvanic process, and a test of acids made by Prof. purchases by private parties there, has not something to do with it? But then process, and a test of actus made, proves Crane, of the Lansing Museum, proves again, on the other hand, if times are the metal to be chloride of gold. water holds this valuable metal in soluhard, how is it that the number of travtion, and it may turn out that the spring is not less valuable as a source of wealth elers is so much larger than usual? It is a question that has two distinct sides, to the owners than it is conducive to the and admits of two antagonistic answers health of those afficted with rheumatism, paralysis, gout, sciatica, dyspepsia and neuralgia. STATE NEWS.

Work on the Dauphin county Soldier's Monument has been suspended A HEAVY rain and thunder storm passed over a portion of Lancaster county on Friday of last week, doing much damage to property. Fences were swept away, barns struck by lightning and burned, and cattle killed. The storm raged with great fury in Marietta. The streets of that town were overflowed and people compelled to leave their houses and seek

refuge elsewhere. DR. JOHN HEISELEY, one of the oldest and most respectable citizens of Harrisburg, died at his residence in that city on Baturday evening last, of paralysis, in the seventy-fifth year of his age. soldier of '12, and was wounded in the battle of Bladensburg. From the time of the erection of the Smithsonian Institute, Washington, up to a late day, the Doctor furnished meteorological observations for that popular establishment. was also a regular contributor to the Journal of the Franklin Institute, of Philadelphia, furnishing meteorological data for that work, and was generally regarded as the "clerk of the weather."

IN DARBY, Delaware county, there was considerable excitement last week over case of bigamy and attempted suicide. James Dougherty, of that borough, married a young woman in the employ of Mr. Pusey, and some three weeks after the marriage he induced her to give him \$500, on the pretext of buying a home. Getting the money, he eloped with a woman to New Castle, Delaware county, and there married her. The legal wite learned of this, and took a quantity of corrosive sublimate, with a view to end all her troubles. The dose was too large to operate with fatal speed, but first in flamed and then produced mortification of the stomach, from which, at last accounts, she was slowly dying. erty was arrested.

In Washington city, last Thursday, a negro, who lived in a low part of the city with his wife and mother in law, vented his drunkun rage upon them by chopping both to death with a hatchet His wife had that day arisen from childbed, and when her husband came home intoxicated her mother ordered him out of the room. He returned with a hatchet and deliberately backed their heads to pieces, while they screamed "murder !" until death hushed their voices. The negro expresses no regret. Another negro expresses no regret. Another double murder took place at Union Hill.
N. J., Friday morring. A German who had besotted bimself with drinking until natural affection was gone, resented the attempts of his two sons, one 21 and 28 years old respectively, to restrain him, and Friday morning took a carefully sharpend knife and desembowlled both the young men as they lay asleep in bed. Then apparently horrified at what he had, done he cut his own throat. The sons died, but the father did not succeed in taking his own life.

A COMPANY has been organized in Michigan for the manufacture of gas and water pipes of wood, varnished with 1102 and covered with composition.

THOU BRINGEST ME LIFE LUNG-WORT.

One of the truest and most suggestive ideas can be obtained from the caption at the head of this article; for of all diseases which impair human health and shorten human life, none are more prevalent than those which affect the lungs onary tissues. Whether we regard lung which is but the fore runner of a more serious malady, or as a deep lesion corroding and dissolving the pulmonary structure, it is always pregnant with evil and foreboding of disaster. In no class of maladies should the physician or the friends and family of the patient be more seriously forewarned than in those of the lungs, for it is in them that early and efficient treatment is most desirable, and it is then that danger can be warded off and a cure effected. In DR. KEYSER'S LUNG CURE you have a medicine of the greatest value in all these conditions. An alterative, a tonic, a nutrient and resolvent, succoring nature and sustaining the recuperalive powers of the system, Its beautiful workings, in harmony with the regular functions, can be readily observed by the use of one or two bottles: it will soon break up the chain of morbid sympathies that disturb the harmonious workings of the animal economy. The harrassing cough, the painful respiration, the sputum streaked with blood, will soon give place to the normal and proper workings of health and vigor. An aggregated experience of over thirty years has enabled Dr. Keyser, in the compounding of his LUNG CURE, to give new hope to the consumptive invalid and at the same time speedy

relief in those now prevalent, catarrhal and throat affections, so distressing in their effects and so almost certainly fatal in their tendencies, unless cured by some appropriate remedy. DR. KEYSER'S LUNG CURE is so thorough and efficient, that any one who has ever used it, will never be without it in the house. It will often cure when everything else fails, and in simple cases will cure oftentimes in a few days. The attention of patients, as well as medical men, is respectfully invited to this new and Valuable addition to the pharmacy of the coun-

DR. KEYSER may be consulted every day until I o'clock P. M. at his Great Medicine Store, 167 Liberty street, and from 4 to 6 and 7 to 9

A DEFENSIVE MEDICINE. "In time of peace prepare for war," is a sound military maxim. "Let not the sickly season and you unprepared," is an equality good rule in military maxim. "Let not the sickly season ind you unprepared," is an equalty good rule in medical jurisprudence. The man must be made of fron who inds himself as the close of summer can be said to the control of the first season of the state of the control of the first season of the six the close of summer the human family. Muscular and constitutional vigor cozes out of us in the broiling weather of July and August, and few of us, at the opening of the Fall, are in the best nossible condition to defy the unhealthy inducences of the season.

Fever and ague and billious remittent fevers, together win a variety of complaints that affect the digestive organs, the liver and the bowels, form a potition of the saitumn programme. Bear in mind that exhaustion invites these disorders, in mind that exhaustion invites these disorders, and that staminal vigor enables the system to and that staminal vigor enables the system to and that staminal vigor enables the system to easy a stam to his defeated legions, in 'Paradise lost,' '' and the axiom is correct, though it comes from an evil source.

Hot then, ye weak and feeble, fortify yoursite and station as a course of HOSTETTER'STOMACH BITTER'STOMACH B

ing, either in themselves or in the rel tions which they sustain to the masse a of mankind? Are there no "black sh sep" among merchants, manufacturers, bankers, lawyers, doctors and cler gymen? Many such, first or last, fail into the clutches of the law, and mar y clearly ought to who do not, but mar age by wit or guile to escape.

by all others, are thousarids and tens of housands who have no superiors either as respects moral character, or natural amount of \$5,087,056.76 more, and, in the last three years of the eight, took off \$4,240,670.99 of real and personal taxa. tion -- a total of fourteen and a half millions of dollars paid off from our debts, Three years of Democratic rule (June '58 to Jan. '61) sold the public works, re-

be matched, for brilliancy and worth, in any other department of activity. The reason is obvious. Politics being

If they do not, they had better brush up their ethical comprehensions. Nay, it happens not unfrequently that a duty omitted entails as great disasters as any crime actually consummated. The greater part of the grumblers against politicians are in this very dilemma; their refusal to do their own manifest duty, furnishes the men of whom they complain the opportunities whereby they thrive. Who, then, are chiefly responsible? If a These restrictions should be so framed as man's field is destroyed, will he discrimito reach the individual operative as well nate between the offender who let down as the proprietary which employs him, the bars and the other offender who drove since by far the largest percentage of

underground casualties is to be attributed to direct causes for which the former have The Prussian laws insist on the em ployment of all the precautions which science has yet discovered for the protection of miners, and yet nearly three hundred lives were lost in their collieries in the single year 1867. It is admitted that, but for the use of these precautions, the casualty lists would be very much larger. The Prussian system of compulsory insurance for the workmen has a direct and potent influence in diminishing the hazards of under-ground life, but even that falls of a complete restraint

upon individual recklessness. Our Legislature, at its next session, expected to consider the whole subject carefully, and to provide effective regulations for the business of mining. We trust that this legislation may not be limited by the experience of other countries, but that it shall successfully meet and provide for contingencies and hazards which no laws, at home or abroad, seem yet to have touched.

CHRONIC GRUMBLERS AT POL-

France has resounded throughout the civilized world, thrilling and reassuring the friends of representative government everywhere. Yet he gave utterance to no opinion or sentiment of superior significance and force to this one, "that the duty of every good citizen requires him to take an interest in politics; indifference in such matters being dangerous to the

In the United States it has, unfortucountry." nately, become common for large classes of citizens who enjoy high social rank and claim exalted moral character, to sneer at politics and politicians, as neces: people would resent as a deep afront the mother and children at last accounts were imputation solve being politicians, and doing well, and the father is said to be sarily, degraded, and degrading. These would feel a need for washing their hands "perfectly delighted."
