friend." Will they explain how it happened that he came to be regarded in that region, by the working people, as the very Jonah of evil, and was cast by them into the canal for want of a convenient sea?

THE Reading Eagle affirms that Mr. Packer "worked for his money." If he would only impart to the men who work for him the art of making one million of dollars a year by "hard knocks," in. stead of paying them two dollars a day, he would become their benefactor. That, ponents. indeed, is a trick multitudes would like to learn.

WHEN Mr. Packer was in Congress he gave very little attention to public business. During one session, which extended through two hundred and thirtyfive working days, he was in his seat only fifty-four days. But he drew hay just as if he had been in attendance and at work all the time. If any one of his numerous workmen had been equally negligent, he would not only have his pay reduced proportionately, but have been dismissed. Who knows that Mr. Packer is more ready now to perform any public duties he may assume than he was then?

A FEW days ago the GAZETTE refused to publish a communication signed "RE- and ready whenever a favorable mo-FORMER," because it contained an unjustifiable assault upon the Republican party. The document was then offered to the Commercial, and by it declined. However, the conductors of that journal thought the matter over, concluded the stab at the party was too good to be lost, sent for the manuscript, and printed it yesterday morning, headed "advertisement," to convey the impression that it was paid for, and hence the proprietors should not be held responsible. The whole proceeding is characteristic.

THE DRIFT OF THE FINANCIAL CURRENT.

We quote some remarks from the noney article of the New York Herald: Some curious truths are deducible from some curious truins are deductive from the events of the past week. The green-back currency, which is so derided by one set of political theorists, was the sal-vation of the general trade of the country. Had the circulating medium been gold and silver the panic would have ended in a grand crash of all interests. Another fact is also evident—the country is growing to specie payments, and will reach that stage all the sooner if the cur-rency is not meddled with, or, if amend-ed at all, made uniform.
