Experimental chemists have repeatedly an race the air at unhealthy searons, in the hope-stecting the invisible wirms which produces op emic disease. They have not yet discovered i emic disease. They have not yet discovered it, and exactly any two of them agree as it olis name. This is of little consequence. It is entationate to know that this poisonous principle exits, and that a saferuard against its insidious placed to the saferuard against its insidious placed to the saferuard against its insidious placed to the saferuard against its insidious principle experiments of the saferuard yet were, and other period gal diseases of that day return with a course of Henetster's Romanch Blirrie to exap; them. If this presention has been rejected, which it never ongle to the thin any direction of the saferuard way is the saferuard with the saferuard and the years of that powerful wegetable toxicand site-dry may aways be checked and brokes up by a outre of that powerful wegetable toxicand site-principle against the saferuard way as well and for year. The title so we genter-print it is now genter-
