

Agricultural.

Tomatoes and Lima Beans.

During the early part of the growth of either of these crops, the surface of the soil should be frequently disturbed. When tomatoes have set their fruit, they should be shortened in, and it may be deferred until the largest of the fruit is of half size, when it may be readily observed that 99 per cent. of the fruit is within 18 inches of the ground, while 99 per cent. of the vine or bush is beyond that distance. The vine, therefore, should be trimmed in within half an inch of the tomato nearest the end of each;—this will admit sun and air freely, and although 10 per cent. of the tomatoes that might have grown will be taken away, still the remaining portion will be greater in weight and measure, than if the vine had not been shortened in. Tomatoes are also several days earlier by this treatment, and therefore bring a much higher price in the market.

Lima bean vines are suffered to wind themselves around a pole 12 or 15 feet high, and before the vine reaches the top of the pole, some beans are already of a size to be pulled near its bottom. Lima beans should be pinched off when 5-12 feet high, and they will readily throw out side shoots well filled with pods which will ripen before frost; whereas when not shortened in, the beans on the upper ends of the vine cannot perfect themselves in time to be saved. It is unfair to expect a gill of sap to travel through 40 feet of vine wrapped around a pole, and make perfect beans at the extreme end of it. That immense amount of imperfect and half formed vine through which it has to travel causes too great an evaporation of moisture before arriving at its point of destination. The Lima bean with us is an exotic, and its behavior during growth is very different from its habits where native, and therefore the mode of cultivation as with the tomato, peach, &c., must compensate for these differences.—*Working Farmer.*

Galls on Horses.

To cure galls on horses, take whiskey, and add as much pulverized alum as it will dissolve; with this bathe parts affected. I have known the very worst of galls healed in this way, and the horse kept in constant use. I have resorted to this remedy, carrying it with me wherever I journey, and continue its use with undiminished approval. I apply no other remedy. When a horse has been put out for the winter, and has not been used, his breast and back get very tender; a single hour's use then of a hot day, will send his breast so as to cause serious injury.—My uniform practice, therefore, has been, for a week or so before beginning to use the harness, to harden the breast and back by bathing them regularly two or three times a day. No injury has resulted from the application of the collar.

Bushel and Acre.

What difference is there in the United States bushel and the English—also in the acre of the two countries? *Ans.* The standard bushel of the United States is the same as the Winchester bushel, which was the standard in England from the time of Henry VII, to 1826, and contains 130.4 cubic inches. The present standard in England is the "Imperial bushel," which contains 221.8102 cubic inches being within a fraction of 68 cubic larger than that of the United States. The acre is the same in both countries.

Adzes are a Sarcot for Bones.—Bones are a valuable manure and should be regularly thrown into a pile on every farm. They can, as we have often stated in these columns, be dissolved and used. If placed in a pile and covered with ashes of fossil coal, leached ashes, or common sand, and left exposed to the rain and atmosphere, they will soon crumble into powder. This manure is worth as much as guano. Test the matter for yourselves.

Rhubarb.

This plant is coming very extensively into use. It is admirable for pie making and we would say one word as to the mode of treating it. Some persons peel the stalks before cooking, while others stew them before putting them into the pie. Neither is worse than useless. The way is to wash the stalks simply, then cut them into small pieces, put them raw into the pie; apply the seasoning and bake.—One who tries this will never depart from it.

Women are like horses—the gay the harness they have on the better they feel. We got this from an old bachelor, who was early crossed in love, and afterwards went into the pawn-broking business.

In Utah, a man who has not more than two wives is rated a bachelor.

WHOLESALE BOOK AND STATIONARY HOUSE

ON THE CASH PLAN:
EXTENSIVE SALES AND NO LOSSES.
Make it profitable to sell at very Low Prices.
MASON BROTHERS,
Park Row opposite the Astor House N. Y.
Offer one of the most extensive Stocks and complete assortments in the country of
BOOKS AND STATIONARY,
FOR CASH ONLY.

The Amount of goods in our line purchased by country merchants is usually quite small compared with their dry goods, hardware, and other bills, and this very circumstance absolutely compels jobbers in the book business, who sell on time, to get larger profits in order to make up for the losses and extra expenses necessarily involved in a credit business of small amounts. It is also easy for the merchant to make arrangements to buy his book bill for cash; though it might not be so convenient for him to purchase his larger bills in this way.

These considerations have led us to adopt in our business, from this date, January, 1854, the following principles, viz. SMALL PROFITS, EXCURSIVE PRICES AND TERMS ALWAYS CASH. Being ourselves the sole publishers of a number of the leading and most extensively selling School Books in the country, as well as works in other departments, our facilities are unsurpassed.

Call upon us, or send an order, and judge for yourselves, if the saving you can make by buying of us for cash is worth while.
Our location is very central, and easily found. Stand on the Astor house steps, and look straight forward across the corner of the Park, and you cannot avoid seeing our signs. **REMEMBER THE NAME IS MASON BROTHERS.**

Raising Blood

And Consumption, pain to the side and night sweats, Asthma, Whooping Cough, palpitation of the heart, Liver complaint, Bronchitis, and all diseases of the throat, lungs and liver cured by Sherman's All-Healing Balm.
RAISING BLOOD & CONSUMPTION
Mr. M'ine, Builder, in Brooklyn, was attacked with raising blood, followed by a cough, pain in the side, and all the usual symptoms of consumption. He employed two of the best physicians; they did him no good, and told him he could not live.
Hearing of the wonderful cures performed by Sherman's Balm, he sent at 10 o'clock at night to Mrs. Hayes, 136 Fulton street, and got a bottle; it operated like a charm, stopped the bleeding and cough! Before he had taken one bottle he was able to be about his work. It had saved his life. His daughter, residing at 127 Myrtle Avenue, can attest it.

Miss Ann Maston, of Williamsburg living in Tenth, near South Fourth st., says—That she had been troubled with a hacking cough, and pain in the chest, for a long time, which at last became so bad that she was obliged to give up her school for more than a year. She then commenced taking the All-Healing Balm—which soon alleviated her symptoms. She is now fast recovering, and has resumed her laborious occupations as a teacher.

14 years Mr. John O'Neil, 10th avenue and 21st street, suffered with a cough, raising of phlegm, and pain in his side. He could get no relief till he tried the All-Healing Balm, which drove the pain from his side, allayed the cough, and brought the disease upon the surface; and before he had taken three bottles, was entirely cured.
