

HINTS FOR OCTOBER.

Preparations for the Wintering of Stock.

In consequence of the deficiency of pasture during the past summer, and the stunted growth of corn, potatoes and root crops, we apprehend that every farmer having stock to keep will be obliged to economize food in every possible way, and to resort to every available means to render the coarser kinds of fodder palatable and nutritious. Cornstalks that otherwise would be rejected and trampled under foot by stock, if cut by a machine, steamed—either by means of a steam box constructed for the purpose, or by putting them into a large box or hoghead, pouring boiling water over them, and covering up tightly till cold—and mixed with bran, shorts, middlings, or grain for the purpose, will go much farther in economizing hay and grain than if fed without any preparation. Another means of diminishing the use of hay and grain, is the more general use of oil-cake. If English farmers have found its value to be so great that they come to our own markets to purchase; and then transport it three thousand miles to be converted into flesh by their own stock, surely it is worth our while to retain at home so valuable an article of food. Another important consideration, worthy of note, is the increased value given to the manure. Repeated experiments have satisfactorily shown that the manure dropped by animals fed on rich and highly nitrogenized food is worth far more than that from animals scantily fed, and not kept in a thriving condition; also that manure from full-grown animals is worth more than that from young stock. In the one case, only those portions of food requisite to supply the daily waste, and that aid the deposition of fat in different parts of the system, are absorbed by the nutrient vessels; in the other, not only are the materials necessary to supply the daily waste absorbed, but also those requisite for the formation of bone and muscle, and the different tissues of the animal. It is thus a material point that we use that food which will economize the labor of the animal machine—that is, to convert it into flesh, milk, &c. By bruising grains, and cutting fodder, and softening the woody portions of plants, we assist nature to a certain extent, and even render a less amount in bulk adequate to proper nourishment.

Another condition in the economical keeping and feeding of stock, is the providing of proper shelter, guarding against exposure to cold and driving storms, and keeping your animals in such a state of physical warmth and comfort that a healthful growth shall at no time be arrested. No one who pretends to be a humane man will allow his animals to be shivering by the roadside of trying to get the protection of a fence only, from our cold wintry storms. An acquaintance in the central part of this State, two years since constructed six boxes, or stalls, in the cellar of his barn, the barn being situated on a hill side; the cellar being entirely open to the east. The sides of these boxes were about six feet in height. Each box had a door swinging on a wooden pivot inserted into a block of wood sunk into the ground—the upper hinge also formed of wood (we mention these points to show that these fixtures were made by using such materials as every farmer can supply)—and when closed fastened with a sliding bolt. A good plank floor was laid in each one, and straw for litter was plentifully supplied. After a week's time each animal took its place; and when turned out for air and exercise an hour or two each day, you could see them anxiously waiting for the liberty to enter. His experience, as related to the writer, showed conclusively that animals cared for in that way were fed with more economy, and with far greater convenience, than by promiscuous feeding in the yard; and last, what may more interest the milk-maid, it was much more pleasant and agreeable to open the door and sit down by the side of a gentle and cleanly-kept cow, than, formerly, to select if possible a dry spot in the yard for milking.

Warmth, to a certain extent, is an equivalent for food. By a wise provision of nature, whatever may be the external temperature, the living animal has its own invariable standard of vital heat.—This degree of heat varies in different races of animals, but each has its own.—By the consumption of food this temperature is maintained; and the colder the external temperature, other circumstances remaining the same, the more food must be consumed to keep up the vital heat. Now, precisely at this point every one's experience tells him that, to a certain extent, shelter is an equivalent for food. We might give numerous illustrations on this point; but will give only one experiment from *Johnson's Agricultural Chemistry*, page 609:

"A lot of sheep, twenty in number, were fed in the open fields, during the months of January, February and March. Another lot of twenty, as nearly in size, weight and condition to the former as possible, were fed under shelter. Both lots were fed upon turnips, as many as they chose to eat, half a pound of linseed cake, and half a pint of barley, to each sheep per day, with a little hay and salt. The sheep in the field consumed the same quantity of food, all the barley and oil cake, and about nineteen pounds of turnips per day, from first to last, and increased in weight, on the whole, five hundred and twelve pounds. Those under the shed consumed at first as much food as the others; but after the third week they ate two pounds less of turnips per day, and in the sixth week again two pounds less, or only fifteen pounds per day. Of the linseed cake they ate about one-third less than the other lot; and yet they increased in weight seven hundred and ninety-eight pounds—showing a gain of two hundred and seventy-eight pounds by reason of the shelter provided."

But while we urgently recommend warm and comfortable quarters for stock, be sure and make the provision for fresh air and ventilation, or your kindness may become positive cruelty. The experiments now in progress by the Agricultural Societies of England and the United States, if carefully considered and analyzed, would go far to render the science of productive farming less empirical than it is too much the case at present. It is only by a careful and systematic course of procedure that the value of any system of feeding can be ascertained; and we trust every one who has at heart the good of agricultural science, will take note of whatever facts he may observe, and communicate them for the benefit of others. "Teaching we learn, and giving we receive."

Mechanics, Inventors and Manufacturers.

\$570 IN CASH PRIZES. \$570

Voluntarily of the "SCIENTIFIC AMERICAN" commencing on the 16th of September. It is chiefly devoted to the advancement of the interests of Mechanics, Inventors, Manufacturers and Farmers, and is edited by men practically skilled in the arts and sciences. Probably no other journal of the same character is so extensively circulated, or so generally esteemed for its practical ability. Nearly all the Valuable Patents which issue weekly from the Patent Office are illustrated with Engravings, and the claims of all the Patents are published regularly in its columns as they are issued, thus making it a perfect Scientific and Mechanical Encyclopedia of information upon the subjects of Mechanical Improvements, Chemistry, Engineering and the Sciences generally. It is published weekly in quarto form, suitable for binding, and each volume contains Four Hundred and several Hundred Engravings, with full and complete Index. Its circulation on the last Volume exceeded 23,000 copies per week, and the practical receipts in one volume are worth to any family much more than the subscription price.
The following Cash Prizes are offered by the Publishers for the fourteen largest lists of subscribers sent in by the 1st of January, 1855:—\$160 will be given for the largest list; \$75 for the second; \$65 for the third; \$55 for the fourth; \$50 for the fifth; \$45 for the sixth; \$40 for the seventh; \$35 for the eighth; \$30 for the ninth; \$25 for the tenth; \$20 for the eleventh; \$15 for the twelfth; \$10 for the thirteenth; and \$5 for the fourteenth. The cash will be paid to the order of the successful competitor immediately after the 1st of January, 1855.

Terms.—One copy, one year \$2; one copy, six months \$1; five copies, six months \$1; ten copies, six months \$2; ten copies, twelve months \$1; fifteen copies, twelve months \$2; twenty copies, twelve months \$3 in advance.
No number of subscriptions above twenty can be taken at less than \$1.40 each. Names can be sent in at different times and from different Post Offices.
Southern and Western money taken for subscriptions.

Letters should be directed, post paid, to Mess & Co 128 Fulton street, N. Y. Messrs. Mess & Co. are extensively engaged in procuring patents for new inventions, and will advise inventors, without charge, in regard to the novelty of their improvements.

MONROE COUNTY Mutual Fire Insurance Comp'y.

The rate of Insurance is one dollar on the thousand dollars insured, after which payment no subsequent tax will be levied, except to cover actual loss or damage by fire, that may fall upon members of the company.

The net profits arising from interest or otherwise, will be ascertained yearly, for which each member in proportion to his, her, or their deposit, will have a credit in the company. Each insurer in or with the said company will be a member thereof during the term of his or her policy. The principle of Mutual Insurance has been thoroughly tested—has been tried by the unerring test of experience, and has proved successful and become very popular. It affords the greatest security against loss or damage by fire, on the most advantageous and reasonable terms.

Raising Blood
And Consumption, pain in the side and night sweats, Asthma, Whooping Cough, palpitation of the heart, Liver complaint, Bronchitis, and all diseases of the throat, lungs and liver cured by Sherman's All-Healing Balm.

RAISING BLOOD & CONSUMPTION
Mr. Mine, Builder, in Brooklyn, was attacked with raising blood, followed by a cough, pain in the side, and all the usual symptoms of consumption. He employed two of the best physicians; they did him no good, and told him he could not live.
Hearing of the wonderful cures performed by Sherman's Balm, he sent at 10 o'clock at night to Mrs. Hayes, 136 Fulton street, and got a bottle; it operated like a charm, stopped the bleeding and cough! Before he had taken one bottle he was able to be about his work. It had saved his life. His daughter, residing at 127 Myrtle Avenue, can attest it.

Miss Ann Maston, of Williamsburg living in Tenth, near South Fourth st., says—That she had been troubled with a hacking cough, and pain in the chest, for a long time, which at last became so bad that she was obliged to give up her school for more than a year. She then commenced taking the All-Healing Balm—which soon alleviated her symptoms. She is now fast recovering, and has resumed her laborious occupations as a teacher.

14 years Mr. John O'Neil, 10th avenue and 21st street, suffered with a cough, raising of phlegm, and pain in his side. He could get no relief till he tried the All-Healing Balm, which drove the pain from his side, allayed the cough, and brought the disease upon the surface; and before he had taken three bottles, was entirely cured.

PLEURISY AND CONSUMPTION.
Mrs. Bagdas, a lady upwards of 70, residing 88 Sheriff street, has for years been subject to attacks of Pleurisy, Raising of Blood, severe Cough, Shortness of Breath, Pain in her Head and various parts of her body. Her friends believed her recovered. The All-Healing Balm relieved her at once of all her alarming symptoms, and now she is able to attend to her work.

ASTHMA AND WHOOPING COUGH.

OFFICE TO PROCURE Soldiers' Land Warrants.

By a recent Act of Congress it is enacted that each of the surviving, or the widow or minor children of deceased commissioned and non-commissioned officers, musicians, or privates, whether of regulars, volunteers, rangers or militia, who performed military services in any regiment, company or detachment in the service of the United States, in the war with Great Britain, declared by the United States on the eighteenth day of June 1812, or in any of the Indian wars since 1790 and each of the commissioned officers who was engaged in the military service of the United States in the late war with Mexico, and shall be entitled to lands as follows:

Those who engaged to serve twelve months or during the war, and actually served nine months, shall receive one hundred and sixty acres; and those who engaged to serve six months and actually served four months, shall receive eighty acres; and those who engaged to serve for any or an indefinite period, and actually served one month, shall receive forty acres. Provided, that wherever any officer or soldier was honorably discharged in consequence of disability in the service, he shall receive the amount to which he would have been entitled if he had served the full period for which he had engaged to serve.

Under the above act, and the acts of Congress generally, the subscriber offers his services as agent to procure Land Warrants for those entitled to receive them, as above specified. He may be found at his office in Stroudsburg.

B.A. FAHNESTOCK'S VERMIFUGE.
A SURE REMEDY FOR WORMS.

The testimony in its favor is over whelming. The proprietors are daily in receipt of letters and certificates, going to prove its remarkable efficiency to all cases of worms, both in children and adults. The relief given, and the immediate improvement of health which follows its use, has called the attention of physicians to this article, and they freely recommend & prescribe it in their practice. The retail price is 25 cents per child which brings it within the means of all.

Brooklyn, L. I. January 16, 1847.
I do certify that I gave one bottle of B. A. Fahnestock's Vermifuge to my child, and in seven hours it passed 23 large worms. Any person doubting this may apply for further information at my residence corner of York and Jackson sts.
JAMES McCAFFREY.

Doughkeepsie, N. Y. March 2, 1844
I certify, that I took two vials of B. A. Fahnestock's Vermifuge, which I found to be the greatest cure for worms I have ever used. I have been troubled with tape worms for a number of years, and I have never found so good a medicine as B. A. Fahnestock's Vermifuge. I therefore recommend it.
MARTHA CLIFT.

The public is cautioned against counterfeits and spurious articles, and to put no confidence in statements that "Koln-stock's," and "S. Fahnestock's Vermifuge," are the same or as good as the only genuine article, which is B. A. Fahnestock's Vermifuge.
