

## The Ieffersonian.

#### THURSDAY, JANUARY 21, 1858.

We last week, in our srticle on the "Consistency of the Monroe Democrat," committed an an error or two; which we wish to correct. The article reads "flue tuations of the Democrat;" when we intended it to be fluctuation, &c.

The next is, "we held that Congress was not the proper party to determine whether slavery should go into territory tion, in like manner as if he had signed that was free at the time it came in possession of the United States." We intended it to be, we held that Congress was Bank the proper party &c.

The New U. S. Treasury notes, which have just been engraved by Rawdon & Co., New York, are to be forwarded to Washington, to be signed and delivered early next week. They are pronounced exquisite specimens of art. The Tribune says "the 1000's have the American Eagle with expanded wings for the princpal viginette, with the portrait of the President of the United States on the right and a figure of Justice on the left. The 500's bave for the principal device, two figurerepresenting Agriculture Manufacturers; on the left is a portrait of the Secretary of the Trea-ury; and on the right are the Eagle and the Shield containing the arms Chester and Philadelphia Railroad to illustration from scriptural history: of the Union, with emblems of Commerce make payment on their mortgages. Conand Peace. These notes are printed in indestructible inks, (black and green) as a protection against photographic counterfeits and alterations. The portait of the Secretary of the Treasury has been en graved expressly for these notes, and is a perfect likeness.

#### Mexico.

A very formidable opposition to Comonfort seems to have been organized in Mexico; at least, so late advices indicate o'clock to morrow morning We can tell but little about that country, bowever, even so short a distance away as it is from us, so conflicting are the advices which come to us. We have always had an impression that Comonfort was navs 33. the strongest man at present prominent in Mexico.

Spain has been talking about seeding an army to Mexico for a long time, and by last accounts, were actually preparing therefor. Any positive attempt on the part of the mother country to reposses its self of Mexico, will however, bring on not only a formidable union of all the parties in that now distracted country against her, but also invite a co-operation on the part of fillibu-ters here, which will ultimately bring the "Halls of the Moutezumas" under the stars and stripes, where it will be likely to remain .- Daily News.
