ducement, grapes bringing twice the sum the year 1857. they do in Cincinnati; being within but several hours of either New York or Philadelphia by railroad, the market is unlimited. Adjoining Hammonton is a bottle manufactory, and every appliance necessary for extensive wine-making.

Hammonton is a new settlement but of marvellous growth, rivalling many of the Western towns in rapid increase. A litthe over a year ago the tract of land was latter. The sales to the trade range from opened to sale, and within that time the \$5.50 to \$6.25 for superfine and from population has increased some 1500; over 300 buildings have been put up; stores, mills, schools, churches and overy facility of an old place introduced. It was a portion of an old tract of land, which bas been held for generations in one family, nia Red Wheat at \$1 40, and 700 bushand is only now thrown in the market for sale.

Its proximity to market and advantages of climate insures its rapid improvement. The soil is said to be early and very productive. The crops raised are excellent. Many persons from this State are going there, and we are sure it is much more desirable than many points at the West.

## Right Good.

Bennett, of the New York Herald, boasts greatly of bringing out Presidential candidates. Speaking of bringing out George Law in 1856, it says, "we trotted out George Law, rubbed him down, currycombed him, brought out his best points, got him in condition, and July 14, 1859. then trotted him back again into the stall, not backing him finally for the Presidentisl race." To this the New York Mer cury pungently adds: "There is in the above confession a single omission, which we beg leave to correct. Bennett did more to his nag than rub him down, currycomb him, and trot him back again .--He bled him profusely!" Bennett is rather distinguished as a phlebotamist.

## Scrofula, or King's Evil

is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused | consisting of Cloths, Cassimeres, Vestings, by mercurial disease, low living, disordered or unhealthy food, impure air, filth, and filthy habits, the depressing vices, and, above all, by will sell very cheap. He has also a splenthe venereal infection. Whatever be its origin, did lot of it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the at prices varying from 50 cents to \$6

of the fathers upon their children." Its effects commence by deposition from the blood of corrupt or alcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptions or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases: consequently, vast numbers perish by disorders which, although not scrofulous in their nature are still rendered fatal by this taint in the system. Most of the consumption which decimates the human family has its origin directly in this scrofulous contamination; and many destructive diseases of the liver, kidneys, brain, and, indeed, of all the organs, arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medi-
