

whelming grief. Though other officers in the service may be equally respected, none, I think, are more profoundly beloved.

His sad fate has thrown a great gloom upon the city and the camp, and there is a burning thirst to avenge his death. His intimate relations with the President, his identification with the Zouave arm of the service, and his acknowledged military ability, had made him a great favorite, and the country looked with high hope upon his career, satisfied that he would amply meet their expectations.

It is believed by many that Alexandria will be fired and reduced to ashes, the women and children having been first removed.

The people of that city are in a state of great agitation and terror. Most of the able bodied men are away, and the few citizens remaining belong generally to the non-combatant order, whose rights will be respected.

Acting-Surgeon Ponguent of the 71st Regiment, who made a post mortem examination of Col. Ellsworth's body, reports that the contents of the gun entered the chest a little left of the breastbone, between the second and fourth ribs, fracturing the third, and passed through the left lung. The heart and pericardium was not wounded. The arch of the aorta and bronchus was lacerated. The slugs lodged in the second and third dorsal vertebrae.

An Exploit.

Washington, Monday, May 27, 1861.

Acting Surgeon Rentice of the 28th (N. Y.) Regiment gives me a narrative of an exploit last night which shows how some things are done. The 28th and 5th (N. Y.) are encamped three miles inland from the 69th, whose entrenchments at the head of the Georgetown Bridge they protect, and nine miles from Fairfax Court House, a well-known Secession rendezvous. Lieut. Tompkins of the regular cavalry, who, with 60 men who have seen service in Texas, accompanies the 28th, warned both regiments that the enemy was at hand, and they slept on their arms. At 1 o'clock this morning Lieut. Tompkins, with a squad of mounted men, with scabbled sabers, reconnoitered toward Fairfax Court House. Upon a rise of ground a mile this side, two horses were eyed. Horses without men seemed improbable, so a bagler, riding beside Lieut. Tompkins, sounded the charge, and the horses were surrounded. Two uniformed men started up. One leveled a fowling-piece at the Lieutenant. The bugler drew a revolver, the fowling-piece dropped, the revolver accidentally went off, and the Virginian was shot in his right arm. His comrade raised a saber toward the Lieutenant, who also drew a revolver. Both were taken prisoners. They were fully armed with guns, revolvers, and sabers, with fine horses. It proved to be a picket guard of the rebel force at Fairfax Court House. The wounded man, being too weak to proceed, was left at a farm house. At another further on, the lieutenant, leaving the other prisoner in charge of one behind, stopped for breakfast. Pretending to be a Southern officer, he learned from the host, whose son was an officer, that the force at Fairfax was from 60 to 75 strong. An effort will be made to capture them all to night. The Unionists in this neighborhood, who, so many have been driven away, are now outnumbered by Secessionists, say the sheriff was present at the polls with armed men, threatening all who voted against Secession. The 28th and 5th treat the inhabitants with great courtesy, paying for whatever they use.

COL. FREMONT APPOINTED MAJ. GENERAL.

John C. Fremont has been appointed Major-General, and George Donison Naval Officer.

The Movement on Virginia.

The news this morning is of the most important character. It has been for some time known that a movement was in contemplation upon Virginia from the West. This movement has been commenced. Grafton, a town at the junction of the Baltimore and Ohio and North western Railroads, is the point at which the advancing column is directed to rendezvous, and from that place a movement will doubtless be made immediately upon Richmond, by such a route as will offer the greatest advantages for the rapid march of the troops.

This movement will be under the immediate direction of Gen. McClellan, and the importance of the step demands a leader of no less ability. It is not probable that he will enter Virginia with an army of less than 30,000 men. Such a force as this, threatening the rebels at Harper's Ferry in the rear and on the flank, will cause them speedily to evacuate that position and betake themselves southward, this being the only course by which they can avoid total rout. Nothing will then prevent the Federal troops from pushing on to Richmond, the city whither all the movements of the last few days have clearly tended.

It is said that the rebel Virginians are in considerable force at Grafton, and that a collision is inevitable. It is certain that if there is a determination on the part of the Secessionists to fight they will have the opportunity to show it within a few days.

We learn, also, that a co-operative movement is to be made from Philadelphia on Harper's Ferry, by way of Harrisburg and Chambersburg, by five regiments under command of General Patterson, and that this expedition is to start to-day. Thus this western movement, considered by military men to be the most important of the campaign, and one for the commencement of which they have been impatiently looking, seems to be undertaken after judicious deliberation, and with a force which, skillfully led, cannot know defeat.

Another advance of United States troops into Virginia has been made, as

we are led to believe by the tenor of our dispatches from Washington, though some doubt still hangs over the details. Yesterday morning several steamers, some of them carrying guns, took on board one or two regiments at the Washington Navy-Yard, and sailed down the river. It was supposed that their destination was Aquia Creek, which is the terminus of the Richmond, Frederic, and Potomac Railroad, and in the direct line of communication with Richmond, from which it is distant 75 miles. A battery is erected there, mounting, as it is stated, four 32-pounders, and supported by a vessel carrying five guns of the same weight of metal. The possession of this point is important, and the certainty of its capture may well cause uneasiness to the rebels, who proposed to use the railroad to aid the advance of their troops.

The occupation of Manassas Gap Junction will be likely to closely follow the capture of Aquia Creek, and thus, with these two points in our possession, with a broad way opened from the West into Virginia, and with Harper's Ferry given up by the dis-comfited Rebels, the road will be well open and very plain to Richmond, where the loyal men of the Old Dominion propose to seat the Governor they intend to put in the place of the one who has betrayed them. There will, perhaps, be hard fighting within the next ten days, but there can be no question as to where the enduring victory will rest.

Deserters.

When men volunteer to fight for their country they should not let anything turn them from their purpose. If sick, or disqualified by any bodily infirmities to serve, a man can be honorably discharged; but any one who deserts invests himself with a mantle of shame that will cling to him like the poisoned shirt of Nessus.—Here is an instance of the manner in which a deserter is received at home, copied from a late Berwick paper:—

"Jacob Puff, of Nescopock, Luzerne county, who went with the volunteers from this place, deserted the camp and came home one day last week. He was waited upon by a committee at his home, and brought to this borough on Saturday last. He was then carried through the streets on a rail, and egged. Served him right. He should have been treated to a coat of tar and feathers, which in our opinion would be still too lenient.

Army Peculators.

In these venal times, when men are not ashamed to live by looting black mail upon legislation, we can conceive how it is possible for peculators to get between the Treasury and the Army, and while seeming to be impelled by patriotic impulses, can bend all their energies to making money out of the existing war, by standing as middlemen between a hard pressed Government and its self-sacrificing defenders. As for example: by buying steamers for six or eight thousand dollars each, and chartering them to the Government for ten or twelve thousand per month, with a condition that they be paid for at the rate of \$50,000 in case of loss; and by purchasing tents at \$9 each, and selling them to the Government for \$17; and by laying in with cattle pens wading opportunities to get lean heaves at a low figure, which they have contracted to the commissariat at round, fat prices, managing to give the hide and tallow to some favorite "striker" for butchering them, when he can get it done for half the value of those items; and generally, by hanging round the purloins of tailors' shops, and tanners' shops, and coopers' shops, and all other kinds of shops, in order to levy contributions upon tradesmen who make proposals for furnishing the army with coats, and caps, and caucos, and all other articles for the camp.

We say, we can conceive of jobbery like this. Nay, more—we credit the well authenticated reports, which come to us daily, imploring prominent names in such transactions.

But, how anybody but fiends can, for lucre, willfully palm off upon the Government, sleazy and rotten blankets, and rusty and putrid pork, to cover by night, and feed by day, our brave woeed and brothers, who are enduring unsofted fatigue, and braving death in defense of our country, passes comprehension. And yet, that such things are done by men who furnish equipments and supplies for some of the regiments now in active service, is beyond all doubt. We have heard names mentioned in connection with these infamous transactions. At present we forbear to repeat them. Something must be done to stop these outrages upon our brave troops. Vultures that prey upon the hearts of the dead on the battle field, are human compared with monsters who furnish rotten blankets and rotten meat to the living in the camp. They must be summarily dealt with, and at the very beginning of the war before their crime becomes chronic. Wellington's remedy would be effectual. In the Peninsular War, some peculiar Commissioners, who made money by furnishing bad provisions to the army, were sent by him first to a drum head court martial, and thence to the gallows. Let New York and Pennsylvania traffickers, who palm off rottenness and putrescence upon our troops, profit by the example.—Tribune.

Free Speech.

Thousands of young men have left their homes to fight for their country against the traitors of the South. They go to fight for liberty and law at the call of their country. While these gallant fellows are following the stars and stripes, we must see that the enemy does not receive "aid and comfort" from the counsels and correspondence of traitors at home. The government is safe so long as the States which remain true to the Union do not permit traitors in their midst. Sympathy with rebels is not "free speech," but treason. Let every true heart unite in the sentiment of Jackson—"The Union, it must and shall be preserved."

We are informed that men have been employed to procure signatures to petitions praying Congress to call a National Convention to amend the Constitution and compromise the questions at issue before the country. This movement is altogether too late. A National Convention was proposed by Kentucky last Winter; President Lincoln favored it, and had the rebellious States shown any disposition to accept it, a Convention would have been called. Or, had Virginia alone shown a disposition to adopt this peaceful mode of appealing to the Convention, and declared her readiness to abide by its result, we should have had the Convention. But instead of this, the conspirators were determined exclusively on overthrowing the Union. They wanted no changes in the Constitution; they wanted to destroy it, in order that they might establish their military despotism in its place. They have now begun the most unreasonable, unjust, groundless and atrocious war known in history. Until that war is over, and their heinous designs annihilated, amendments to the Constitution are not in order.—The business now in hand is fighting.

Capture of Spies, etc.

Washington, May 27, 1861.

Senator Chandler, who has just returned from Alexandria, reports the capture of one spy to-day, and three yesterday, and the seizure of 250 concealed pistols, 500 rounds of ammunition, and a large quantity of military clothing which were found in suspected houses. Last night the picket were fired on by Secessionists, and both the Zouave and the Michigan Regiments were under arms all night.—Col. Wilcox this morning informed the inhabitants that they could have peace or war, at their option, but that if they shot down his men the consequences would be on their own heads. Secessionists afflicted with a sickness which requires a warmer climate are eager for passes out of town, which Col. Wilcox gives.

The game of Brag and the Game of Grab on the part of the rebels is soon to give way for a game of ball, on a grand scale—in which the Northern volunteers will hold the bat, and the rebels will catch the ball.

Tit for Tat in Married Life.

This has lately been illustrated by a newly married couple living at Westmore, (West Pascaek.) Getting into trouble about something, the wife burned the husband's hat, to which he replied by making tuder of her best dress, and so they continued adding fuel to the flame till they had no clothes left excepting what was on their backs, after which they separated.—Paterson Guardian.

New Counterfeit.

The following is the description of a new and dangerous counterfeit ten dollar note on the Broadway Bank of New York. Vignette, female reclining against a bale, barrel, &c.; canal cars in the distance, "10" below on right end; female with hamlet, spear, &c.; State arms above on left end. Is a good imitation of the genuine, and the safer plan is to refuse all notes on this bank.

It appears now that we shall not hear so much about returning fugitive slaves. Gen. Butler has given a decision which will furnish a precedent to be very cheerfully followed. Three slaves belonging to Colonel Mallory, now in command of the Rebel forces near Hampton, having got into their heads some "vague notions of Freedom," as well as some very distinct notions that they were about to be sent further South, presented themselves at Fortress Monroe and sought protection. The Rebel Colonel sent an officer with a flag of truce, and had the inconceivable impudence to demand that the negroes should be given up under the provisions of the Fugitive Slave Law.—Gen. Butler stated that under existing circumstances he should consider the slaves contraband goods, and hold them accordingly. He had, in fact, put them at work. So the Colonel was dis-comfited.

Seizing their own Property.

A dispatch to the New Orleans Picayune, from the Balize, says the privateer steamer Calhoun captured on the 15th inst, the bark Ocean Eagle, Captain Luce, from Rockland, Maine, with 3,144 casks of lime, consigned to Crewey & Farwell of New Orleans. The fun of the thing is that the lime was bought and paid for by the New Orleans firm, and therefore the privateer was only robbing citizens.

The peach crop in Western New York, it is said, will be very good. In New Jersey and others places it will be short.

Position of England.

The latest advices from England confirm the report that the Government would treat the Southern privateers as belligerents rather than pirates. The Queen had issued her proclamation warning her subjects that if they engaged in any privateering enterprises they could expect no redress or sympathy from her in case of capture.

AYER'S CATHARTIC PILLS. Are you sick, feeble, and constipated? Are your bowels clogged, with your system deranged, and your feelings unrefreshed? Are you often the prey of nervous humors, some fit of cholera, or of the biliousness of the liver? Take Ayer's Pills, and you will be cured. They stimulate the functions of the bowels, and cleanse out the system from the obstructions which make it sluggish and inactive. They do not irritate, but gently and safely restore the natural action of the system, and induce a healthy and permanent habit. They are often the prelude to various humors. Some fit of cholera, or of the biliousness of the liver? Take Ayer's Pills, and you will be cured. They stimulate the functions of the bowels, and cleanse out the system from the obstructions which make it sluggish and inactive. They do not irritate, but gently and safely restore the natural action of the system, and induce a healthy and permanent habit. They are often the prelude to various humors.
