

**Pennsylvania Troops for the West.**

The destination of most of the volunteer regiments of Pennsylvania will probably be the West. It is already stated in Pittsburgh that a new brigade, under Gen. Negley, is ordered to join Gen. Fremont. This brigade consists of the regiments of Colonels Hambricht, Stambaugh and Sirwell, a battery of six pieces of artillery from Erie, and a cavalry company from Philadelphia, called the Negley Guards. The Forty fifth regiment, under Col. Welsh, is ordered to the West also, and other regiments will proceed as rapidly as possible in the same direction. Probably as many Pennsylvania troops will be sent to Kentucky as to Missouri. Heretofore most of the Pennsylvania regiments have been employed along the line of the Potomac, from Williamsport down to Alexandria. The force there being sufficient, we are very glad to learn that the new regiments are to be sent westward. There is as great a work to be done in Kentucky, Missouri, and along the Mississippi, as there is in Virginia, and the gallant soldiers of Pennsylvania will rejoice to fight alongside of their Western brethren in defence of the Union. It is evident that the Government is determined to have the army of the West put on as fine a footing as that of the Potomac, and will endeavor to have such reforms introduced as have been introduced by Gen. McClellan since his arrival in Washington. The visit of Secretary Cameron to visit of Secretary Cameron to St. Louis probably has reference to this, and the ordering of Pennsylvania troops to the West shows that it is determined to have a very large army in Kentucky and Missouri.—*Philadelphia Bulletin.*

**October Elections.**

Pennsylvania this year elected only Representatives, part of a Senate, Judges in some districts, and local officers. The new Senate is Republican or "People's" by nearly three to one, the House ditto by a small majority. The Pennsylvania soldiers in the Union armies were entitled to vote as if at home, and the non return of their votes leave many local results in uncertainty. Ohio elected a Union War State Ticket by some 50,000 majority—David Tod (Democrat) Governor. It is just justice to his Democratic opponent, H. J. Jewett, to say that he also declared himself for a vigorous prosecution of the war. The new Legislature will of course be strongly "Union," though pretty equally divided as to political antecedents. Iowa has elected Gov. Kirkwood and Chief Justice Lowe (Republican) with a Republican to take Col. Curtis's place in Congress, (House). The Legislature is understood to be also Republican. Minnesota has elected Gov. Ramsey (Republican) and gone Republican generally by a heavy majority. In all cases, we believe the vote is light. Baltimore City has chosen Unionists to fill her Municipal Council (half elected this year). The Secessionists did not see fit to contest. From Secession, we learn that Georgia has elected Joseph E. Brown Governor by from 5,000 to 10,000 majority.—He is a great stickler for State Rights, and, though a Secessionist, obeys Jeff. Davis only when he sees fit.

The great Naval Expedition so long talked of appears to have at last got afloat. Eight immense vessels left New York on Saturday—eight more followed on Sunday, and by Wednesday half a dozen in addition steamed out of the harbor. The 3d Rhode Island Regiment and 500 of Col. Serrill's Expedition and Miners took passage in the Expedition. The vessels are to rendezvous at Annapolis and Fort Monroe. At the former place it is believed that about 15,000 troops will go on board the transports, and the whole Expedition will give employment to 25,000 men. The ultimate destination of the Expedition is known but to the Government and Gen. Scott, and even when the fleet sails, the General in command of the troops will probably receive sealed dispatches, which he will be instructed to open when in a certain latitude. The utmost care has been taken to insure the success of this Expedition, and we are safe in asserting that when the blow is struck the effect upon the South will be terrible. We may add to the above that nearly 1,000 horses accompany the Expedition, that 15,000 spades were put on board one of the vessels, and that a vast body of laborers have been engaged for service in this enterprise. Evidently, our treasurers are to be built somewhere, and it is not unlikely, from the number of horses employed, that plenty of artillery is to be brought into use. There is a general hope that Charleston is the point aimed at. Nothing would give greater satisfaction than to see that city subjected to merited chastisement, because there the great conspiracy originated, which is now shaking our Union to its centre.

**A Noble Example.**

Gen. S. L. Williams, an old gentleman living a mile from Mount Sterling, Ky., came in on Wednesday and enrolled his name as a Union volunteer in a company being raised. He is seventy two years old! He says he has not long to live anyhow, that he has strength enough to pull a trigger and destroy his country's enemies, and that if he should be killed, it was consolation enough for him to think that the bullet he received took but little of his time while perhaps it saved the life of some young man who would be of more value to his country. Cannot be Arrested. By a recent decision made in Erie county, Pa., Judge Mason holds that an enlisted soldier cannot be arrested for any debt or contract during his term of service.

**New Orleans Blockaded.**

A dispatch from New Orleans on the 4th inst., (to the Richmond Examiner) tells of one of the most important achievements of the war, so far. Thus it embraces information that the United States blockading squadron have dug a passage through the mud of one of the five mouths of the Mississippi to the Sand Spit, which commands the whole five of them, and now have the Vincennes, Water Witch, and other vessels of the squadron to protect the prompt erection of works, which in less than a week will command all five of the mouths, passes or entrances to and from the Mississippi river. Once promptly built, this work alone will absolutely control the communication of New Orleans with the sea, as completely as a blockading squadron of 20 ships of war could accomplish that object.

**A Vast Gold Field.**

A recent arrival from California brings intelligence of the discovery of an "El Dorado" of immense extent. It seems hardly credible that gold should exist in such quantities on the western part of our continent; but from what is already known, we feel confident that the mineral wealth of our "great west," when that vast region is fairly developed, will be found to exceed the most sanguine expectations. The subjoined paragraph contains the last report of gold discoveries: "The correspondent of the Dallas Mountainier says it is demonstrated beyond dispute that the whole region of country embraced between the Cascade and Rocky Mountains is one vast gold field, and only requires development to revolutionize that entire coast. An area of 3,200 square miles had been sufficiently prospected to establish the existence of the mineral everywhere. Exploring parties have been fitting out for the Elk county and Bitter Root Valley."

**The First Secessionist.**

Abraham was the first distinguished secessionist in the world. He sought to induce the people to secede from David, and he succeeded for a time. This traitor was arrested and hung on an oak in the wood of Ephraim, and afterward buried beneath a heap of stones. This attempt to break up the government of Israel was put down by a military force, and the union of the tribes happily preserved. Jeff. Davis and his followers should go into a brown study of the fate of Abraham. It is possible that some Ephraim may hold the title to a wood-lot in Virginia, convenient. There is no man in the country whom the people of the Northern States have a great desire to see elevated to a high position than Jeff Davis. He is fitted to occupy any high post.

**A Curious Conscience.**

One of the editors of the New York Observer, who is now rusticating in the country down East, relates the following in his letter to that paper: "I heard of a man the other day who had a curious conscience on the subject. It was Mr. Jones, who lives down in the hollow. His neighbor John-on, whose hay was all in, saw that a large quantity of Jones' crop was down, and looked very much like rain, he went over on Sunday, toward noon, to advise him to get it in, and to offer the whole force of his men to help. Jones and all his boys were gone; nobody was at home but Jones' wife; and she said that her husband thought no good ever came of working on Sunday, and so he and the boys had gone to the Sound a fishing."

When red hot shot is fired, the ordnance used is elevated to the position desired before the gun is shot. The powder in the gun is kept from explosion by means of the wadding. Between the explosive substance and the heated mass are three layers of wads. The next to the ball is dry, the second is wet, and upon the powder a dry piece rests. The ball is discharged soon after being placed in the cannon.

A fellow charged with stealing a box, was discharged upon trial, it being proved that the article taken was an axe. The matter was a regular *ho ax*.

**Death of Thomas Wilkey.**

BALTIMORE, Oct. 19.—The venerable Thomas Wilkey, the founder of Odd Fellowship, died at his residence in this city this morning very suddenly.

A Pittsburgh paper says "the girls in some parts of Pennsylvania are so hard up for husbands, that they sometimes take up with lawyers and printers."

That sterling patriot, John J. Crittenden, notwithstanding his advanced age, was the first to join the Frankfort Home Guard, as a private, and has declared his intention to go into camp and remain in service until every rebel is driven from the soil of Kentucky.

**A Soldier with an Unpatriotic Wife.**

A husband, with a loving wife, volunteered in Capt. Doran's Syracuse Company a few days ago. On Sunday he visited his spouse at home, a few miles from camp. She tried in vain by cajolery to seduce him from his duty to his country, and failing, she took a razor to bed with her, and when her protector was fast asleep, made a vigorous attempt to incapacitate him from service by cutting off the forefinger of his right hand. The husband is more determined to fight now than ever, and avows his intention not to visit home again till he "goes for good," after the war is over.

**AYER'S PILLS**

Are curing the Sick to an extent never before known of any Medicine. INVALIDS, READ AND JUDGE FOR YOURSELVES. JULES HAUVEL, Esq., the well known performer, of Chestnut Street, Philadelphia, whose choice products are found at almost every hotel, says: "I am happy to say that your CATHARTIC PILLS, that I have found them a better family medicine, for common use, than any other within my knowledge. Many of my friends have realized marked benefits from them, and coincide with me in believing that they possess extraordinary virtues for driving out diseases and curing the sick. They are not only effectual, but safe and pleasant to be taken, and qualities which must make them valued by the public, when they are known."
