have found them a be ter family medicine, for common use, than any other within my knowledge. Many of my friends have realized marked benefits from them, and cofriends have realized marked benefits from them, and co-incide with me in believing that they possess extraordinary virtues for driving out diseases and curing the sick. They are not only effectual, but safe and pleasant to be taken— qualities which must make them valued by the public, when they are known."

They are sure in their operation, and perfectly safe—qualities which make them an invaluable article for public use. I have been in the receipt of a great number of letters from all parts of New England, asking me if my hair still continues to be good; as there is so much traud in the manu acture and sale of various compounds as well as this, it has, no doubt been basely unitated and been used, not only without any good effect, but to absolute injury.
