IRON IN THE BLOOD.

It is well known to the medical profession that IRON is the Vital Principle of Life El ement of the blood. This is derived chiefly from the food we eat; but if the food is not properly digested, or if, from any cause whatever, the necessary quantity of iron is not taken into the circulation, or becomes reduced, the whole system suffers. The bad blood will irritate the heart, will clog up the lungs, will stupefy the brain, will obstruct the liver, and will send its disease-producing elements to all parts of the system, and eve- September 1, 1864 -1y. ry one will suffer in whatever organ may be predisposed to disease.
