Stroudsburg, May 10, 1866.

A Journal of Agriculture, Horticulture, Literature and Art,

Published every Saturday, in quarto form, eight pages, on fine paper and new type .--It is illustrated with engravings of

For the Jeffersonian. The Machinery of the Heavens.

eternity; surrounding the Earth on all most bewildering subject, that the mind of mortals can dwell upon.

The Sun is the center of our system. His average distance is about 95 millions on Main-street, in Stroudsburg, next door to of miles. He has no orbit but revolves the Post-office, where they have on hand round a point on its axis. The Earth, and the other planets, revolve round the Watches, Clocks, Jewelry, Drugs, Paints, Sun with different velocities. These nearest the Sun move quicker, and those at a greater distance, slower. The force of attraction is more intense on the planets which move nearest; while at the distance of Uranus, or Neptune, it is almost powerless: consequently their speed round the Sun is slower, which makes their year almost as long as 83 of ours; 3d. We are determined to please all who besides the plane of their orbits describes

a distance almost inconceivable.

If you look at the broad expanse of The heavens, on a clear night, and watch leisurely, you will discover too, that the Please call before purchashing elsewhere. stars also revolve round their respective NO CHARGE FOR SHOWING GOODS. centers, on the same principle, that the GT Particular attention paid to the re- Earth moves round the Sun. The aerial pairing of Watches, Clocks and Jewelry, &c., field like an immense banner studded with innumerable stars, contains the theatre of the universe, where each little world performs a part in the grand mechanism of gravitation. Each moves round its center, and has satellites according to their proportion of magnitude. The larger body, or center, has an attractive, or cohesive influence over the smaller

one; and this influence is limited by the square of the distance. Mercury moves round the Sun with greater velocity than the Earth; and the Earth travels with more velocity than Neptune.
