Another Great Improvement. SIFTING ASHES MADE EASY. Every housekeeper knows that the process of sifting Coal Ashes is attended with much inconvenience and annoyance from dust, &c., and unless the ashes are sifted much coal will be wasted that can be used after sifting. In the American Cooking Stove this disagreeable process is entirely overcome by the ingenious arrangement of an ash sifter, in the hearth or ash box, of the stove, by means of which after the grate is dumped into the ash box the ashes can be sifted in a moment, with the ash box all closed, and without any dust in the room, and the coal and cinders are all retained in a separate apartment, and can be returned to the fire chamber, or be removed elsewhere, and the ash pan can then be removed containing the ashes without any dust whatever. This arrangement does away with the old fashioned ash sifters, and must commend itself to all, and is another long stride towards perfection, and must add largely to the already extended reputation of this deservedly popular stove. This improvement is fully secured by letters patent. SHEAR, PACKARD & CO., 17 and 19 Green St. Albany. For sale by FLOREY & BROTHER, March 21.—3m.] Stroudsburg, Pa.
