Woman.

FEMALES, OWING TO THE PECULIAR and important relations which they sustain, their peculiar organization, and the effects they perform, are subject to many sufferings. Freedom from these contribute in no small degree to their happiness and well-being, for none can be happy who are ill. Not only so, but no one of these various female complaints can long be suffered to run on without involving the general health of the individual, and ere long producing permanent sickness and premature decline. Nor is it pleasant to consult a physician for the relief of those various delicate afflictions, and only upon the most urgent necessity will a true woman so far sacrifice her greatest charm as to do this. The sex will then thank us for placing in their hands simple specifics which will be found efficacious in relieving and curing almost every one of those troublesome complaints peculiar to the sex. **HELMBOLD'S EXTRACT OF BUCHU.**—Hundreds suffer in silence, and hundreds of others apply vainly to druggists and doctors, who either merely treatize them with the hope of a cure or apply remedies which make them worse. I would not wish to assert anything that would do injustice to the afflicted, but I am obliged to say that although it may be produced from excessive exhaustion of the powers of life, by laborious employment, unwholesome air and food, profuse menstruation, the use of tea and coffee, and frequent childbirth, it is far oftener caused by direct irritation, applied to the mucus membrane of the vagina itself. When reviewing the causes of these distressing complaints, it is most painful to contemplate the attendant evils consequent upon them. It is but simple justice to the subject to enumerate a few of the many additional causes which so largely affect the life, health and happiness of woman in all classes of society, and which, consequently, affect more or less directly, the welfare of the entire human family. The mania that exists for profuse education and marriage, causes the years that nature designed for corporeal development to be wasted and perverted in the restraints of dress, the early confinement of school, and especially in the unhealthy excitement of the ball-room. Thus, with the body half-clothed, and the mind unduly excited by pleasure, perverting in midnight revel the hours designed by nature for sleep and rest, the work of destruction is half accomplished. In consequence of this early strain upon her system, unnecessary effort is required by the delicate votary to retain her situation in school at a later day, thus aggravating the evil. When one excitement is over, another in prospective keeps the mind morbidly sensitive to impression, while the now constant restraint of fashionable dress, absolutely forbidding the exercise indispensable to the attainment and retention of organic health and strength; the exposure to night air; the sudden change of temperature; the complete prostration produced by excessive dancing, must, of necessity, produce their legitimate effect. At last an early marriage caps the climax of misery, and the unfortunate one, hitherto so utterly regardless of the plain dictates and remonstrances of her delicate nature, becomes the unwilling subject of medical treatment. This so disastrous picture of the experience of thousands of our young women. Long before the ability to exercise the functions of the generative organs, they require an education of their peculiar nervous system, composed of what is called the tissue which is in common with the female breast and lips, evidently under the control of mental emotions and associations at an early period of life; and as we shall subsequently see, these emotions, when excessive, lead, long before puberty, to habits which sap the very life of their victims; ere nature has self-completed their development. For Female Weakness and Debility, Whites or Leucorrhoea, Too profuse Menstruation, Too Long Continued Periods, for Prolapsus and Bearing Down, or Prolapsus Uteri, we offer the most perfect specific known: **HELMBOLD'S COMPOUND EXTRACT OF BUCHU.** Directions for use, diet, and advice accompany.
