#### The Corn Crop of the West.

Fears were at one time entertained hat, with the large destruction of grain in Chicago, and other portions of the west, as well as the reported deficit in Europe, that there would be a scarity of Bread. stuffs in this country, with prices that: would seriously operate against the poorer classes. Western papers however inform us that the corn crop of the west, the present season, has proved the best harvested for years. In many portions of Indiana, Iowa, Missouri, Nebraska add Minnesota, corn is offered in the cribs at from ten to fifteen cents a bushel. In Illinois and Kentucky the yield has been beyound all precedent. The wheat crop has also been very large. In Europe, on the contrary. there appears to have been a heavey devine). A correspondent of the New ficit in the grain harvests in nearly all York Herald, some time ago, visited the countries. In England the general falling off has been variously estimated at from fifteen to twenty per cent. ; while in Hungary, the Danubian Principalities,

portions of Austria, and in Southern

Russia-all countries that have usually

exported large quantities of grain, there

has been a great decrease from the average

production. The ravages of the potato

rot and the cattle disease in Great Britam

will increase the demand for grain and

animal food, and the United States will

be able to supply to both in any quanti-

ty at reasonable prices, as cheap bacon

and pork, articles extensively consumed

everywhere, are the natural consequence
