

The Jeffersonian.

THURSDAY, JUNE 27, 1872.

LUTHERAN CHURCH.

Liturgical Services next Sunday. MORNING, 10, - - - EVENING, 7. MORNING SERMON: The House of mourning, better than the House of feasting. EVENING SERMON: Conquering and Denying Christ.

G. W. MARRIOTT, D. D., Pastor.

There will be no paper issued from either of the Offices in town next week.

OUR neighbor of the Monroe Democrat, and our obese friends of the Eastern Argus, appear to be badly exercised, by our position on the gubernatorial and Presidential questions. Now men and brethren do, for Heaven's sake, keep cool. The weather is altogether too hot for gentlemen of your immense rotundity to go to worrying yourselves over matters that should be as plain to your visions as are the noses on your faces.

On the Presidential question the Jeffersonian is, with a slight variation, some what in the same fix with its redoubtable friends of the Democrat and the Argus, and is consequently compelled to await the action of the Baltimore Convention, before settling down in the harness.

Mr. John Bowden, our skillful and accommodating gardener, presented us, on Saturday last, with a fine lot of new Early Rose potatoes. They were the largest and best we have seen this season.

As we travel only where Republican principles and Republican usages point the way, and as Grant, Wilson and Hartranft stand as so many faithful guide boards on that way, it needs no great reach of imagination to find the path in which we tread; no prophetic skill to foretell on which side we will be found working when the time for work arrives.

But how is it really, with our anxious contemporaries? Does not their fix present one face of broad comedy, and another of the melodramatic? Can it be seen without exciting the risibles, and the next moment drawing forth the lachrymal? Is it not a virtual confession of the fraudulent character of modern Democracy?

But how is it really, with our anxious contemporaries? Does not their fix present one face of broad comedy, and another of the melodramatic? Can it be seen without exciting the risibles, and the next moment drawing forth the lachrymal?

Think too of the great Caesar of the Argus, mighty in his wisdom, great in his adherence to principles, immaculate in his political purity and immense in the virtuous indignation with which he knit his eyebrows, and shook his head, at the mere suggestion of selling out Democracy to the "adventurous carpet bidders" at Cincinnati, now caving neckly to the situation.

squelched, all the editorial efforts of a life time, all his asseverations of Democracy and his determination to stand by it, even to death "in the last ditch," are buried, ignominiously, deeply buried, beneath the isms, and antics and white hats, and coats, and boots of the Tribune, that its Editor may stand forth to the world as the leader, aye, even worse than that, the very owner and master of the once great, triumphant Democracy.

Men and Brethren of the Monroe Democrat and Eastern Argus, we deeply commiserate with you in your affliction, but we cannot join you in your support of Horace Greeley and Gratz Brown—the coming apostle, and the horrible example of modern Democracy—for the Presidency and Vice Presidency.

"Christie," not to be behind the times, has taken another step forward for the benefit of the many patrons of his Saloon. At considerable expense, he has procured, and put in operation, an apparatus which is always sure to provide for his customer a cool and refreshing glass of Lager at all times. No matter whether the first or the last glass is drawn from the Keg, the thirsty one it is sure of a wholesome fresh and lucious glass of the great Teutonic Beverage, which, it is said, does not intoxicate though it may exhilarate. "Christie's" enterprise certainly deserves to be rewarded with a liberal patronage.

Prices at Rusters are in accordance with the times, low, low down.

Quite an excitement prevailed in our borough on Saturday last, growing out of a match game of base ball contest, between the Independents of Branchville, N. J., and the White Caps of Stroudsburg. ALLENTOWN, June 27th, 1872.

The 5th Annual Commencement of Mahlenburg College will be held in the Opera House to-day. The graduating class numbering fourteen members, on whom the degree of Bachelor of Arts will be conferred, are as follows:

W. A. Beates, G. H. Rhodes, D. L. Coleman, J. G. Schaidt, M. L. Fritch, J. A. Scheffer, S. W. Kuhns, W. P. Snyder, W. H. Lanbenstein, H. R. Trexler, A. D. Potts, J. M. Whirch, M. O. Rath, G. T. Weibel.

This is a welcome day to the class of '72, one to which they have been looking, with bright anticipations, longing hopes and ardent desires for the last four years. To-day they have arrived at the culminating point and for the present to the height of their ambition. From the hill of science, at least from one plain, they can look back and survey the rugged path over which they have traveled. How many days of hard study and restless nights; how many gallons of mid-night oil; how many aches and sighs; how many trials and troubles and how many efforts it required to arrive at this stage is difficult to compute. May they now go forth and fight the battles of life bravely and win fresh laurels and crowns of un fading fame.

In novelties Ruster is ahead of all competitors, beating even Barnum himself, because there is no humbugging in what he offers to the public.

The formal opening of the Water Gap House, under the care of L. W. Brodhead & Bro., took place on Thursday last. We regret that circumstances, not under our control, prevented our attendance on the occasion. From those who were present we learn that every thing passed off in the most pleasant manner, and that the Messrs. Brodhead spared no pains to make every guest feel comfortable and happy. Several hundred sat down to dinner, and it is the general expression of those who were present, that the feast, in all its appointments, was perfection itself. The house, one of the largest and most complete for its purpose of any in the state, is capable of accommodating some four hundred guests. It is furnished throughout in the best and most elegant manner, has an abundance of the purest and best water in every room, and is lighted throughout with superior gas, manufactured on the premises. From its surrounding grounds, which are left as nearly as nature made them as possible, and from its balconies and turret roof some of the finest views imaginable can be obtained. In point of capacity, on the part of the Proprietors, in managing so large a house, and caring for so large a number of guests, we know of no gentlemen better qualified than the Messrs. Brodhead. They have had experience, they have the means, and we know they have the determination to make all under their care feel happy and at home.

If all who design purchasing goods call on Ruster they will make money both in quality and price of goods purchased.

Gilmore's great Jubilee at Boston began on Monday last week, and has since been progressing with reasonable success. There are present more than 1000 instrumental performers, with a vocal chorus of 17,000 persons collected from all the singing societies of the country. There are beside bands of music from England, France and Germany, whose performances are said to throw our native talent quite into the shade. Boston was crowded with visitors, but the \$5 charge for admission to the Coliseum had the effect of keeping most of them out. After the first two or three days the charge was reduced to \$3, when the vast building became much better filled. Had it not been for this it is probable that the Jubilee as a speculation would not have succeeded. As to the music, it is stated to be in some respects overpowering, and in others disappointing. The immense chorus does not produce the grand effect that might be expected, partly because of the immensity of the building. Yet the event is one that attracts great and deserved attention; and as the concerts will be continued for some thing like a month to come they will be visited by vast numbers of people.

In collars, neck ties, cuffs, &c., for lady's or gents wear Ruster has all the novelties. Call and see them.

Laws. The following are among the more important laws which passed the Legislature of Pennsylvania last session:

An act to allow all defendants to be witnesses in their own behalf in all cases not above misdemeanor, except in indictments for perjury and forgery.

All elections for borough and township officers shall be held at the places designed before the passage of the acts of 1860 and 1871, except where otherwise provided by a decree of the court or statute.

The State Superintendent is authorized to appoint two trustees for each State Normal School.

Enabling married women to purchase sewing machines without the consent of their husbands and making the contract binding.

An act authorizing courts to grant charters of incorporation to water, gas, town, hall and market companies and to associations for the preservation of birds, fish and game.

Go to Simon Fried's for hats and caps.

The Lycoming Giant.

Mr. George Woorster, of Anthony township, who has the honor of being called the Lycoming county giant, has attained a height of seven feet and weighs 250 pounds. It is probable that he will yet reach a greater height and weight, as he is only about eighteen years of age. The health of the young man is good, notwithstanding his extraordinary size at such an early age, and he is engaged every day at work in a saw mill. His parents are of the ordinary size, and none of his brothers show any signs of undue growth. Geo. is a very quiet, well behaved young man, of a retiring and modest disposition. His strength seems to be in proportion to his great size, and when fully developed he will be a giant indeed.—Lycoming Gazette.

Beer Business.

There is no doubt that the consumption of malt liquors is constantly increasing in this country. Henry Clusen, in the opening address before the brewer's congress lately in session, stated that in the United States there are more than three thousand breweries, giving employment to thousands of people, and representing \$100,000,000 of capital. These breweries consume 23,000,000 bushels of barley and 18,000,000 pounds of hops, which require for their cultivation over a million acres of land, thus becoming an important item in our agricultural interests. The direct and indirect revenue paid into the Treasury through the manufacture and sale of malt liquors, has steadily and rapidly increased; in 1863 it was \$1,500,000; in 1870 it was \$6,000,000 and last year it had reached the enormous sum of \$7,200,000.

Benjamin F. Arndt, Esq., a well known citizen of Easton, died on Tuesday morning, 18th inst. at the advanced age of 76 years. Mr. Arndt held many positions of honor and trust during his life, the duties of which he discharged with fidelity.

The Slate Business.

There are twenty four slate companies operating in the Lehigh Valley, that produce about four thousand squares of roofing slate per week and a large quantity of school, mantle and flagging slate, being about one half of all that is produced in the country. The shipments are principally made from Slatington. There are other points devoted to the business, but the shipments are not near so large.

On and after July 1, 1872, every person who sells or offers for sale manufacturered tobacco, snuff, or segars, except manufacturers of those articles who sell only their own products at the place of production will be required to pay a special tax at the rate of \$5 per annum, without regard to the amount of his annual sales. The exemption of persons whose annual sales do not exceed \$100 is repealed by the new law.

A patent is now being worked, by which leather for the sides of boots and shoes is rendered impervious to wet and damp by exhausting the air from the pores of the leather, and filling them up with a substance that unites with and adheres to the fiber, thereby strengthening without impairing the elasticity of the material. When asphaltic pavement becomes general, it will be possible to shoe horses with a material as hard as the asphaltic itself, and which will prevent them slipping.

In Fond du Lac, Wis., not long ago, a man pulled a pretty girl toward him and kissed her, and just at that moment a beam fell from the floor above to the spot where she was standing before. That kiss saved the girl's life. It is said that the girls of Fond du Lac are now terribly afraid of beams from overhead and are continually being pulled out of imaginary danger.

A man passed through Worcester, Mass., last Sunday week, who had traveled nearly four thousand miles in four months, on foot, on his way to Boston. He carried with him a gun and woollen blanket, a haversack and canteen. He declined the proffered hospitality of a citizen, replying that he did not ask any one for his living. When he left Nevada he had \$150, some of which remained unspent when he was in Worcester.

Under the new Tax law all stamp duties now imposed will be removed after the first of October next, except the two cent stamp on checks and drafts. After that date no stamps will be required on notes, bonds, mortgages, deeds, protests, leases, or other contracts or legal papers. Only bank checks will have to be stamped, as at present.

A San Francisco despatch reports the appearance here, at 7 minutes before 8 o'clock on Tuesday evening, of a "comet," a little to the southwest of the zenith. It moved rapidly and somewhat irregularly, and disappeared in six minutes. It appeared like a star of the first magnitude.

Crop reports from all parts of Indiana are very encouraging, both as regards grain and fruit. The yield of wheat, rye, oats and barley will be enormous; corn is coming on splendidly, the grass was never better, and the orchards groan under their weight of fruit.

The scarcity of ships in the navy has compelled the Secretary to recall a number of vessels on foreign stations, so as to have them in readiness in event of any difficulty in Cuban or Spanish waters.

There is a great and unsatisfied demand for laborers in all parts of California. Harvest hands are wanted in the agricultural countries, workers in the mines and laborers on the railroads.

One million four hundred and twenty thousand cubic feet of gold bearing cement were thrown down by a single blast of 250 pounds of giant powder at Dutch Flat, California, on Monday week.

Boston is beginning to import Japanese paper clothing. The paper from which the articles are made is wholly waterproof, is thin and light, an overcoat weighing only two pounds. The goods are capable of being washed several times, and will last a number of months.

The Mahanoy Gazette says that on Monday of last week, some horse thieves visited Mahanoy City, and took a horse from one individual, a wagon from another, and ten bags of flour from a third, and cleared out. This was doing the stealing business up by wholesale.

Mr. Isaac Corbett, of Baltimore, 72 years of age, visited a company with his daughter on Sunday afternoon, and while there pointed out a spot where he wished to be buried. Soon after returning home he was seized with illness, and within three hours of the time of selecting his grave he was dead.

The Chicago Journal says that corn, which is backward on account of the protracted cool and damp weather, is growing rapidly under the effects of the present warm weather, and that, on the whole, the prospects of the grain crops in the West have seldom, at this time of the year, been better than they now are.

Professor Liebig, in a lecture on poisons, said that "people were foolish in using arsenic to poison their enemies; for the billiouth part of a grain can be traced in the stomach," and "if the person should die it remains there forever." Arsenic is so injurious when used in coloring materials that he even objects to children using green covered school books.

A terrible railroad accident occurred near Belleville, Ontario, Canada, on Saturday morning. The engine jumped the track and telescoped the smoking and second class cars, leaving them on top of the engine, where they were exposed to the escaping steam from the boiler. Sixty-five men and women were fearfully scalded, and the medical men in attendance do not anticipate that more than four or five will survive their injuries.

A remarkable case of vitality is attracting great attention from the medical profession in Chicago. About the middle of last month a woman of the name of Simons was shot by her husband in that city, the bullet entering the brain. It was supposed the wound would result fatally within a day or two, but at the expiration of twenty five days the woman was still alive, and gaining strength gradually. The bullet remains in her head, but its precise location is unknown, the surgeons not having dared to probe for it for fear of hurting some uninjured portion of the brain. At the last accounts she was able to talk with some efforts, but her memory was confused. Still she was able to give an intelligent account of the manner in which she received her injury, saying that her husband fired three times before he hit her, she dodging him in the half dark room.
