

The Jeffersonian.

THURSDAY JANUARY 23, 1873.

Go to Phillips' for fruit candies and oysters, prices lower than before the fire.

Now for a bully sleigh-ride, with a first-class horse and cutter.

Be sure you read all the advertisements in to-day's paper.

Go to Phillips' restaurant and confectionery for good cigars and tobacco, opposite the M. E. Church.

The greatest usurers in this place are those busy-bodies who take the biggest interest in other peoples affairs.

M. L. Phillips' has the largest and best stock of French and American candies in town. Try them.

Joe Lynn, of the Mauch Chunk Democrat, announces his paper for sale, owing to continued illness.

Don't forget that M. L. Phillips has just opened his place of business up town, opposite the M. E. Church.

For Sale.—Two new seven Octave Pianos, for sale at the Washington Hotel, Dec. 19 '72-tf.

Go to M. L. Phillips, restaurant and confectionery for oysters, the largest and best in town. Only \$1 per hundred.

The little birds have short rations during snow clad weather. If every body would give them a few crumbs or seeds, the little chirpers would sing all the sweeter.

Lewis Graff, proprietor of the Millport Hotel, is about disposing of it to a Mr. Kerchner, of Tannersville, Monroe county for \$5,200. He is going West.—M. C. Democrat.

Arrests last week, in New York city were 1,266; lodgers at station-houses, 4,713; deaths, 558; births, 452; marriages, 169; loss from 36 fires, \$178,790; insurance, \$752,100; taxes collected, \$195,164 10.

We noticed an article in one of our exchanges, that an agent for a certain Hair Dye, representing himself to be from the city of Williamsport, in order to sell his dye, he proposed to give his patrons a chance to draw a valuable gift, which was to arrive in a few days, but unfortunately the prizes never come. Look out for him.

Dr. William Elder of Philadelphia, we observe with satisfaction, has received an appointment in the United States Treasury. The Doctor has rendered great service to the cause of Protection, and is one of the ablest American writers on political economy and finance. The appointment is a well-deserved recognition of his merits, and must prove advantageous to the country.

The Leavenworth Commercial says: "Abraham Barry, aged 61, instead of going to his long home, recently married a buxom girl of 28 summers, at Junction City." And how will the rich man feel when she sleeps in Abraham's bosom?—Chicago Times.

We don't know how the rich man will feel, but the buxom girl will feel old age creeping over her.—Leavenworth Commercial.

The American Odd Fellow for January, commences the fifteenth volume of this standard publication. It is replete with excellent literary matter, illustrated articles, and tidings from the Order in all parts of the world. Many of the best writers of the country contribute to the columns of the American Odd Fellow, and as a magazine for the great fraternity and the household, it is unsurpassed. Take it, read it, and preserve it. Address A.O.F. Association, 37 Park Row, N. Y.; \$2.50 a year.

Mr. Editor.—The last I wrote you was about the business part of Sand Cut. We have all necessary accommodations here except a Squire and Constable, of which we are in great need, being twelve miles or more from any Squire or Constable. Now, Mr. Editor, do you not think, with the business that done here and the number of inhabitants, who comprise the population of the place and vicinity, that we might, without straining ourselves, or diminishing the contents of our pocket books much, have a Squire and Constable, though we are a quiet class of people and rather lamb like, than otherwise, in nature. But still there might perhaps stray into our lamblike community a wolf, and if any damage were done he would have time to take his game, and be far out of reach, before we could drive twelve miles after a Constable; and then, if the teams were in possession of the epizootic at the time we would have to go it a foot. We have gentlemen here fully competent to fill those offices justly; and thereby make our town of Sand Cut more safe and accommodating.

And then, Mr. Editor, do you see any reason why we could not hold our own Elections in our own town, like some of our neighboring towns, and, thereby save us all considerable time, trouble and expense. And I think, Mr. Editor, we can turn out quite a Republic majority, here in Sand Cut and vicinity, and that is the reason I think that our town can boast of being so quiet a town, because we are on the quiet and respectable side. What do you think?

Yours Truly,
YANKEE.

Increase of the German Reformed Church.
Since the last meeting of synod, three years ago, the Reformed (German) church has grown as follows: The ministers have increased from 526 to 586, an increase of 60; the number of classes from 31 to 34, an increase of 3; the congregations from 1,179 to 1,312, an increase of 133; the membership from 117,910 to 130,299 an increase of 12,386; the additions by certificate and confirmation from 28,965 to 32,806, an increase of 3,841; and the contributions from \$228,817 84, the sum total for the three years ending with November, 1868, to \$247,386 12, the sum total for three years which have just ended, the increase being \$18,568 18.

A New Horse Disease.
There is a new and disastrous epidemic prevailing among the horses in the city, which has already proved destructive to a large number of animals. The disease is pronounced by the surgeons to be spinal meningitis, and is believed to be an outgrowth of the distemper which recently afflicted the horses so greatly, and a result of imprudence in working them before they had fully recovered. Every case has thus far proved fatal, and the surgeons assert that there is no way of preventing the disease or curing the horses when attacked. No premonitory symptoms are exhibited by the horses, which come out of the stable in the morning in apparently perfect health, but are attacked suddenly and drop paralyzed in the street. No resource is then left but to kill them. So prevalent is this disease that Superintendent Hartfield of the Society for the Prevention of Cruelty to Animals states that the officers of the Society alone have killed as many as six or seven horses in a day. No signs of the abatement of this new plague are yet visible, and it is feared that there will be a great destruction among the horses before it disappears.—Tribune.

Sick Potatoes.
During the winter and spring potatoes begin to grow old and to decay, when they become particularly unwholesome. Never eat one of these. If there is any taint about them, any bad taste or smell, never put them in your stomach. People in the country do not suffer so much from inability to get good potatoes as people in the city do. In the city they are so much exposed to cold, and heat and get so bruised that they are never so good as when they come from the farmer's cellar. While on this subject we will give our readers a recipe for raising whole, some and delicious potatoes. Choose a soil that is dry and sandy, loam, if possible; but any soil will do except where it is positively wet. With a plough mark out your furrows three and a half feet apart, and eight or ten inches deep. Now fill this furrow with thoroughly rotten oak tan bark, or chip manure, on which is a good sprinkling of salt. Over this spread the soil half an inch thick, and plant the best varieties of potatoes. Strictly follow this rule, and nutritious and delicious potatoes will be the result.

Gold and Silver at the Philadelphia Mint.
Ex Governor Pollock's annual report makes the deposits for the year ending June 30, 1872:
Gold, \$40,382,552; silver, \$10,119,414. Total \$50,501,966.
About one half of the deposits and coinage was at San Francisco.
From 1828 to 1837 about five millions of native gold came to the mint. From 1837 to 1847, about two and a half millions. From 1847, to 1857, California sent us \$228,000,000. From 1857 to 1867, the San Francisco Assay Office did most of the heavy work.
From 1793 to 1872, 1,113,977,701 gold and silver pieces have been coined at Philadelphia.
Native silver deposits at the Mint commenced practically in 1858, when \$15,632 worth came forward from Lake Superior, a new district which yielded that amount annually until 1870; but in 1871, \$173,308, and in 1862, \$637,769. Nevada began its deposits (1102,540) in 1860, increasing them to \$2,476,209 in 1871, and \$1,233,876 in 1872. The total of silver sent forward from these two districts, and from Idaho, Montana, Colorado, Utah, New Mexico and California, since 1860, has been only about \$20,000,000.
Total deposits from 1793 to 1872: Of gold, \$859,270,962; of silver, \$23,065,499.

A Case Suicide.
Mr. Jesse Eilenberger, an industrious and much respected citizen of Ramseyburg, committed suicide, at home, on Sunday afternoon last, by cutting his throat, from ear to ear, with a pocket knife. The direct cause of self destruction is attributed to temporary insanity, brought about by a combination of circumstances connected with the sale of Sewing Machines, for which he was a sub-agent. On Sunday afternoon he was sitting in his house, surrounded by his family, apparently in deep meditation, when he was heard to say that he "believed those Sewing Machines would be the death of him," (or something to that effect,) immediately after which he arose and left the house, by a back door. In a few minutes he was followed by a member of the family, who had scarcely emerged from the house when the almost lifeless body of Mr. Eilenberger, covered with blood, was seen lying upon the snow and ice, but a short distance from the door. Medical aid was summoned, but it was of no avail, as the knife had done its work, and his victim was rapidly sinking into the arms of death. He breathed his last in about half an hour after the deed was committed. It is said that he attempted to speak, when asked a question, but of course was unable to do so. The deceased had been employed in Captain James's Bending Works, at Delaware Station, for a number of years, and was a mechanic possessed of considerable skill. He leaves a wife and four children to mourn his sad and untimely death. His funeral took place on Tuesday afternoon, at the M. E. Church, near Hope.—Warren Journal.

The Girard estate is now valued at \$4,962,735. During the twenty five years of its existence the College has educated 1,696 orphans.

People who have any taste for cigars will rejoice to learn that Connecticut agriculturalists talk of giving up their tobacco crop and raising beets instead.

A lovely Des Moines girl arises at four o'clock every Monday morning and does the family washing, then prepares the frugal meal of pancakes and coffee for all hands, whom she arouses with a hot poker. She is as lively as she is beautiful.

James T. Jorey defeated J. B. Brogden in the pigeon-shooting match, on Friday last, at New Haven, Conn., for the championship of the State and \$100.—Jorey killed twenty six out of twenty-eight birds.

In New York during 1872 there were 8,445 marriages, and 11,898 births of living children. The deaths exceed the births by nearly 11,000. The death roll is 22,341, being 6,000 in excess of last year.

Milwaukee has shipped, this year, wheat and flour to the amount of 17,633,821 bushels. Its manufactures are claimed to foot up \$2,000,000, of which iron and lager beer are the largest, the former yielding \$1,000,000; the other \$3,000,000.

After fourteen years of research a New Yorker thinks he has discovered the secret of perpetual motion. His machine is about as big as a man's fist, only requires an occasional thimbleful of cold water and feeds itself, produces eight hundred revolutions a minute, and is said to possess two and-a-half horse power.

The sewing machine patents are running out. Companies can now form and furnish good machines at a much less cost than we have been paying. The St. Louis Democrat says that "the actual cost of a sewing machine that retails for \$50 will not exceed \$8—the rest goes to pay for patents and close corporations."

Both branches of our Legislature have passed a bill increasing the yearly salary of the Governor from \$6000 to \$10,000. There was a pretty decided majority in the Senate favorable to the increase, but in the House the bill was barely carried in this form. The general idea was that \$8,000 was about the right figure. Pennsylvania will pay her Governor hence forth more liberally than any other State.

In Northampton county, the prison inspectors have recently adopted the prevailing system of obliging the convicts to perform some kind of manual labor.—Carpet looms have been introduced and the prisoners are employed in operating them, the material being furnished by a contractor at Allentown. The plan is found to work well, and it is thought that it will have a tendency to prevent those who are not fond of labor from seeking quarters inside.

The Western express train, which left East Penn Junction at half past seven on Friday morning, narrowly escaped what might have been a terrible accident.—When the train came near a place called Dubbs' Mill, near Allentown, Pa., it was stopped by the trackmen, and it was discovered that the track for twenty five feet was sunken by the rain which fell during the night. The train passed safely over, and had scarcely got out of sight when the ground suddenly sunk to the depth of fifteen feet, carrying with it the track and men. Two of them had their legs broken and were otherwise badly injured. Travel is not delayed, as the passenger trains run to each side of the wash and change cars. The break will be repaired at once.

Mr. Thomas Gibbs, a substantial citizen of Wilcox, Georgia, went into the woods a few days ago to feed some of his hogs. While going along he saw a black fox squirrel, moving very slowly through the grass; and his curiosity being excited, he went up to it, when to his astonishment, he beheld a small highland terrapin holding fast to the squirrel by one of its hind legs. The squirrel used all its strength to escape by actually dragging the terrapin several yards through the weeds, and finally reaching a small sapling, it climbed up that in the hope of releasing the terrapin. But the terrapin held to the squirrel's foot with a death grip, and Mr. Gibbs went to the sapling and shook them out. The terrapin still kept his hold, and was dragged by the squirrel to a gopher hole near by, and was carried into it. This was the last seen of the terrapin and its victim.

In 1876 the hundredth anniversary of the birth of the republic will be celebrated throughout the country as it is fitting that it should be. In the century the United States have increased in population from about 3,000,000 of people to fully 40,000,050; instead of thirteen colonies we have thirty seven States and ten Territories, and in all sorts of ways—as doubtless we will be told two years from now by all orators—we have become the most great and glorious and happy people on whom the sun ever shone, or is likely to shine. The commission having in charge the arrangements to be made for the celebration have concluded to raise \$10,000,000 among the people, the stock to be apportioned equally among the different States and Territories, about \$1,000,000 falling to the lot of New York. There will be a grand fair open in Philadelphia from May to November, 1876, the buildings of which will cover an area of fifty acres in Fairmount Park. Before the subscription books were opened thirty-eight Philadelphia had subscribed \$100,000 in fifteen minutes, and it seems quite probable that New York will not be less willing to give its money for the furtherance of the undertaking.

Important to Soldiers.
January 31st, inst., is the last day for filing claims for additional bounty under the act of July 1866, giving \$100 to any soldier who enlisted in the army after the 19th day of April 1862, for a period of not less than three years, and received his honorable discharge, or \$50 for two years' enlistment after April 15, 1861. Soldiers entitled to the bounty and who have not attended to the filing of their claims should make a note of the fact.

Furnaces on the Lehigh.
The following are the furnace companies in the Lehigh Valley engaged in the production of pig iron: South Easton Iron Company, Glendon Iron Company, Uhler's Furnace, Coleraine Iron Company, Bethlehem Iron Company, Lehigh Iron Company, Robert's Furnace, (Allentown Rolling Mill Company), Allentown Iron Company, Crane Iron Company, Thomas Iron Company, Lehigh Valley Iron Company, Carboon Iron Company.

There are furnaces in operation at Easton, Alburtis, Hellertown and Bingen. Furnaces are in course of construction at Freemansburg, at Topton, and additional stacks are being erected at some works above detailed. Companies have been organized to erect furnaces at Chain Dam, Kutztown and at Millerstown.—Easton Sentinel.

One fact connected with Pacific Railroad enterprises, revealed in the ninth census reports, is the large amount of money loaned by and owing to the Government. Besides the immense amount of land donated to the several railroads, we find that the Union Pacific owes to the United States \$27,236,512, the Central Pacific \$27,850,680, the Central Branch Union Pacific \$1,600,000, the Kansas Pacific \$6,303,000, and the Sioux City and Pacific \$1,628,320, making a total of nearly \$65,000,000. From these large amounts it is pretty well known that individuals here and there all over the country connected with these companies have realized fortunes which are counted by millions.
