D R. J. L A N T Z ,

Surgeon and Mechanical Dentist,

Still has his office in Main Street, in the second story of Dr. S. Wallon's brick building, nearly opposite the Stroudsburg House, and he flatters himself that by eighteen years constant practice and the most skillful and judicious treatment, he has become equal to his profession, that he is fully able to perform all operations in the dental line in the most careful, tasteful and skillful manner.

Special attention is given to saving the Natural Teeth, also to the insertion of Artificial Teeth on Rubber, Gold, Silver or Continuous Gums, and perfect fits in all cases insured.

Most persons know the great folly and danger of extracting their teeth to the inexperienced, or to those living at a distance.

MONROE COUNTY

Mutual Fire Insurance Company.

STROUDSBURG, PA.

CHARTER PERPETUAL.

The By-Laws of this Company, have recently been very materially changed, placing it upon a basis equal to that of any Fire Insurance Company in the State.

Important among these changes are the following, viz:

Policies, instead of being perpetual, are now for five years.

All property is classified and the premium is fixed according to the risk of the property.

Premium notes are taken, and all assessments are made on the notes.

Property is insured for not more than two thirds of its actual cash value, and the full amount of insurance paid in case of loss, provided the loss be equal to the amount of insurance.

"Annual assessments" only are made, except in cases of heavy loss, and where a special assessment is necessary.

The Company is therefore prepared to insure property upon terms much more desirable than under the old system.

Applications may be made to any of the Managers, Surveyors, or Secretary.

Powers and Duties of Constables.

Judge Ross, of Montgomery county, recently defined the power and duties of constables. As the law in relation to these officers is the same throughout the state, its publication may be of general interest:

The office of a constable is one possessing at common law large powers and vested with the performance of duties which are gravely important to good order, and good morals, peace and decorum of the community.

His first and general duty is to keep the peace, and for this purpose he may take into custody, and may break open the doors of houses—in fact no act of authority, which is not of itself illegal, may not be lawfully done by a constable to prevent a breach of the peace. I Chitty, s. C. L. 20 to 26 I Blac. Com. 366. If there is a reasonable ground for suspicion he may arrest without a warrant, and hold the offender for examination but his action in this regard is at his own peril—for he may not make an arrest unless the facts and circumstances would justify a prudent man in assuming that the grounds of suspicion were reasonable—that is, exhibited cause to believe that a felony had been committed.

Premium notes are taken, and all assessments are made on the notes.

Property is insured for not more than two thirds of its actual cash value, and the full amount of insurance paid in case of loss, provided the loss be equal to the amount of insurance.

"Annual assessments" only are made, except in cases of heavy loss, and where a special assessment is necessary.

The Company is therefore prepared to insure property upon terms much more desirable than under the old system.

THE CAVE AT THE DELAWARE WATER GAP.

Nature's Refrigerator.

Two or three years ago a Mr. Frear bought 100 acres of land on the Kittatinny Mountain, near the Delaware Water Gap. One day last summer Mr. Frear, while cutting wood on the mountain, discovered near the base a wall ten or twelve feet high laid up against a perpendicular precipice of apparently solid rock. He took down a portion of the wall, and came to an opening in the rock large enough to permit the passage of his body. The instant the opening was uncovered a strong current of air escaped. It was so cold that Mr. Frear was in a very short time chilled through and through.

Determined to explore this singular cavern, Mr. Frear entered the opening. He found himself in a large chamber, the walls being of rough and jagged rocks. The cold was so intense that he could not explore the cave further than fifty feet.

Since then no person has penetrated further than six or seven feet under the mountain. The draft of air is so strong at the mouth that trees thirty yards distant are kept in constant motion. One can stand but a few minutes in the mouth. A thermometer standing at ninety degrees above zero will in a short time fall thirty in the current.

A piece of pure lead, a gun barrel, and a collection of bones were found by Mr.
