THE FEJEE ISLANDS.

Horrible Massacre of White Men and

Polynesians by Mountaineer Savages. The Australian mail brings intelligence confirmatory of previously received brief reports of the massacre in Fejec of a family of white settlers named Burns, and some imported Polynesian laborers, by a mountain tribe of King Cakabau's fellow countrymen and subjects. There seems to have been no survivor who could give any intelligible account of the affair. The following particulars were supplied to the Fejee Times:

About half past seven on Thursday morning some of the imported laborers from Mr. Burns' plantation arrived at Rarawai, stating that the mountaineers had killed Mr. Burns and his wife. Mr. Macintosh immediately despatched Messrs. Stirling and M'Grath, with about forty imported laborers, to render assistance. In about half an hour they got in sight of the wretches, and saw them com ing out of the house as thick as bees .-When they saw the two white men coming they quietly walked away. Stirling and M'Grath followed them up the plan tation until they crossed the river, where they managed to fetch one down at a long distance. In looking about the plantation they saw the bodies of Mr. and Mrs. Burus some distance from the house, both quite naked and mutilated. In a short time after nearly all the settlers on the

river were on the place. At the examination of the bodies I saw that Mr. Burns had been clubbed and tomahawked He only managed to shoot two of them before they managed to give him his death blow. Mrs. Burns, poor The Company is therefore prepared to in- lady, must have suffered agony, by the of her left shoulder on the first attack; her left hand was raised to the wounds, and still remains in the same position now in her grave. She had a cut under her left jaw, part of her teeth down her throat. Two holes, one each side, evident ly made with a spear, which had passed through her body before she tell. I be- possible to upset it. lieve her death was caused by a club .-The mountaineers, on doubt, were taking her away with the intention of eating her, but were too closely pursued and compelled to leave her.

> The little boy was found outside the house, with a deep cut on the right side of his head, and three deep cuts in his right grion, and his little head clubbed to a pulp.

The little girl, an infant, was a shocking sight. It would appear they had taken her by the legs and dashed her brains out against the post of the bedroom door, and then dropped the child among its scattered brains. The four bodies were brought and laid out under the verandah side by side.

As far as I can ascertain at present there are ten Erromanga men, five Tanna men, and one Solomon woman killed .-Two Tanna men, found with their legs doubt for a cannibal feast. A number of clubs, spears, etc., were picked up in and about the house, which, by their appearance, have done a great deal of work in murder and destruction of property.

After ransacking everything they com menced to destroy all they possibly could. Some money, a check and other valuable up such antics like a circus rider?" papers, lettters, a clock, jewelery and a gold watch were found all over the floor; papers, etc., recovered in good preservation. Everything in the bedroom, with the exception of one large mirror and medicine chest (unbroken) were taken away. They were very successful in taking away a number of guns, I think not Every article in store has been selected with less than twenty, but they did not get much ammunition.

Next morning the mountaineers were plainly to be seen with a large amount of to dry. The mountaineers sent us word that they do not intend stopping at this, as they have had a complete success. murdered twenty in all, carried a great deal of property away and destroyed very
