AN EARLY DAY INSURRECTION.

Page from History.

The "negro plot," as it was termed in the city of New York in 1741, is a matter of history. Few, however, are familiar with the story of the plot. In 1741, one fifth of the inhabitants of the city, who numbered about ten thousand, were negro and Indian slaves. The punishment to which these slaves were subjected for the most trivial offences were severy. Should three or four of different owners be found conversing together they were liable to receive thirty nine (a favorite number at Real Estate Agent. the whipping post) lashes upon the bare back, and the same penalty if found alone outside the master's grounds with a club or other weapon without a written permit to earry it. The leading merchants of the city were engaged in the slave trade, the policy of the Government being to encourage their importation. Public sales of slaves was a weekly occurrence in the market place at the foot of Wall street.

A number of robberies had occurred in the city, and many slaves were pun ished therefor. This was followed by several incendiary fires. Suspicion was fixed upon a lot of Spanish negroes, formerly sailors on a Spanish ship, which had been taken as a prize and brought to New York, where the sailors were con demned and sold at auction as slaves. Having been freemen, they murmured loudly at this hard usage, and rashly let fall threats which were now recalled as words of ominous import.

The Spanish negroes! the Spanish negroes! was the general cry, and the city was aroused, and the magistrates had a woman named Eary Burton brought before them. She deposed, under promise of freedom, that Cae-ar Vaarek, Prince Amboyman and Cufl Philips used to meet frequently at Hughson's and talk about burning the city, and that Hughson and his wife promised to assist them. That Hughson was to be Governor, and Cuff to be King, but that she had never seen any white person in their company when such conversation took place. The information was received with avidity by the magistrates. Mary Burton became the heroine of the day. The accused parties denied the charges, but many negroes were arrested, and they, frightened hadly, began to accuse each other of the crimes. Power of Music.

To regard music in the light of a medicine seems rather a strange idea, yet its curative power was fully recognized long ago. Frequently the life of a dying man may be saved by music not too near his bedside. It is only to catch his atten tion and hold it with something that imparts pleasurable feelings, in order to sustain him beyond the moment of supreme exhaustion, which marks the crisis of discase. Usually, however, the ears of the dying are regaled with no sweeter music than the sighs and sobs of their sorrowing friends. Of course they are troubled and depressed, and when the critical treath comes, fail to catch it, and so die There is much in this theory, startling as If you would be imposed upon by it seems Music, as an agent for promoting health, is of high value. If invalids would devote an hour or two daily to practicing vocal music, it would restore without knowing how, be a drunkard, them to health. Persons with weak lungs may thus ward off fatal lung diseases. The effects on the body and mind are excellent.
